The Chocolates That Are Different.

The first enticing piece of Neilson's Chocolates you taste, will show you how different are these delicious confections.

To secure the richness of flavor and delicacy that are inseparable with Neilson's "Hard Conters", we use rich, sweet cream -and make the centers only firm enough to be easily featen. To keep these centers just right-neither too soft not too hard-is the perfection of candy-making and Neilson's "Hard Centers" are as . perfect as they are different.

The chocolate coating forms a thick, firm, crisp shell perfectly enveloping each wholesome centre.

All these chocolates have the "Extreme Split Dip". It's a Neilson specialty-exclusive with Neilson's Chocolates de Luxe -another touch of distinction that makes them different. Perhaps you prefer Creams to "Hard Centers"-or "Cherries

in Maraschino Chocolate Dipped"-to either You can get all three under the Neilson name-also 30 other packages of these different Chocolates. If you cannot get Neilson's Chocolates in you
