THE DOMESTICS AROUSED.
No more fight in the lords! One might clash, which resulted in defeat, was enough. So the Insurance Bill has been accepted "without a division."

But a new difficulty has arisen, from an unexpected quarter. The domestic servants object to any form of taxation, and thousands of them are protesting in letters that are pregnant with meaning. The mistresses are said to be behind the movement, supplying the money, mental power and energy which the agitation requires. It is surely an ominous proceeding and one which must surprise the chancellor of the exchequer.

He has overcome many difficulties by his shrewdness. His greatest toil was in pacifying the fraternal societies, and before he succeeded he had many conferences with representative men. The women constitute an entirely different proposition. He was prepared to give them votes, because he realized that a general franchise would put in the hands of a radical element a power that would more than counter-balance the aristocratic element so powerful among the suffragettes.

He encounters, however, in the domestics, a problem so ominous that he may for the time being be non-plussed. The mistresses, for whom Mr. Lloyd-George seemingly has small regard, may be getting even with him in a unique way. They are fighting him, as it were, with his own ammunition.

THE BONUS SYSTEM.
The Board of Education has met the demand of the teachers for increased remuneration by adopting the bonus system. This is discriminatory and judicious. It aims at giving reasonable rewards to those who earn them by the superior efficiency of their service.

There is now in force a schedule which permits of an annual increase in the stipend of the teacher to the extent of \$25, and though it is supposed to be dependent upon the merits of the individual, it is so small that the committee of management and the Board of Education have not deemed it expedient to withhold it from any one. Under the new arrangement the old increases will continue, and in addition, upon the report of the inspector, there may be three successive bonuses of \$50 each, and including them, the maximum earnings may be increased to \$750 per annum.

The scheme may not be acceptable to some teachers. It involves "superior efficiency," as to government and discipline and teaching power. The inspector does not desire to be limited in his judgment as to the service of any teacher, and can be depended upon to pass fairly upon the work of every one. The effect of the new schedule, or the addition with regard to bonus increment, may not be immediately realized.

Undoubtedly the expenditure at the end of the first year will not be as large as it would be under the scheme suggested by the teachers, but eventually the advantages will be apparent in the increased efficiency of the staff and recognition which it warrants.

DANGER IN THE WATER.
The report which Dr. Williamson has made to the board of health in effect that the water taken at the pump house five days out of ten is impure, and fit for domestic use only when it has been dosed or treated with chlorine.

It is not for the medical health of the city council what it should do. He can help it, no doubt, with a great deal of valuable information when it is called for.

The truth seems to be that the water in the lake is now contaminated by reason of the sewage that is dumped into it by all the towns and cities along the lake front, and sooner or later the recommendations of medical and sanitary experts will be acted on. This contamination must be stopped. That is the one safe course, and to secure it the legislatures of Canada and the United States must co-operate.

There may be a filtration plant, but it is remarkable that in Toronto the new plant has not caused the bacteria to disappear. They were found in the new reservoir, after the water has passed through the filtration beds, and the conclusion was that filtration was not a guarantee against contamination. But the presence of bacteria was not dangerous.

Dr. Williamson's report must be considered. It will go to a department that, at the close of the year, cannot be expected to act, and before the proposed consolidation of departments can be carried into effect, months may transpire. Meanwhile chlorine is the only thing that stands between the people and typhoid fever.

REFERENCE TO POWER.
The Whig does not wonder that the ratepayers are confused with regard to the power question upon which they will pass in the municipal elections. The announcement of the Globe is that "twenty-six municipalities will vote upon the question of throwing in their lot with the Hydro-Electric scheme." Four of them in the east are Peterborough, Kingston, Prescott and Lakefield. Brockville will have a ballot upon the question two weeks later.

Now it must not be assumed that in the reference in Kingston any contract is involved. The issue is an academic one. The council was given to understand that under the law governing the service of the Hydro-Electric Commission, it is necessary that the people, by a public expression, shall authorize it before undertaking to formally negotiate for power.

The power department, as a matter of fact, has had correspondence with and conferences with the Hydro-Electric Commission. It has been supplied with estimates of the cost of erecting transmission lines and furnishing electric energy in various quarters for thirty years. The Seymour company, through President Kery, has also submitted calculations as to what it can deliver power in Kingston, in any required quantity, and for short contracts from year to year, or for five or ten years. There is no lasting liability of any sort incurred in this proposition.

The property owners will, on New Year's day, consent, as they ought to do, to the negotiations for power from the Hydro-Electric Commission. There is nothing binding or committing in this referendum. As a matter of principle the city eventually should submit the offer of the Seymour company and the Hydro-Electric Commission to the ratepayers, with such a statement of facts as will enable them to dispose of the matter intelligently.

For this referendum the Whig contends, and it can see no hope of the question being settled satisfactorily in any other way.

EDITORIAL NOTES.
The C.P.R. made forty millions of dollars last year. Time it was cutting the freight rates and giving their western people the boon they desire.

Manitoba's phone rents have been reduced from \$4 per month to \$1.50. This is under government ownership. It suggests the boon Ontario might enjoy if Sir James Whitney would only loosen up and let some of his antique ideas go.

It cost \$6,000 to diagnose, through experts, what was the matter with the Ottawa water department and to suggest a remedy. The services of men who battle with bacteria come high.

So the board of works has at last decided to make a recommendation in connection with the engineer's office. Mr. McClelland is the man. Worth, zeal, usefulness, are to get their recognition.

WARNED IN TIME

SIR JAMES ADVISED TO HURRY UP AND ACT.
New Ontario Neglected—Hon. Frank Cochrane a Failure—Depreciation of Mr. Rowell—He Can Stand It.

Toronto Telegram (conservative). Ontario contrasts the Temiskaming country at the end of Hon. Frank Cochrane's provincial ascendancy as the Temiskaming country was at the beginning of Hon. Frank Cochrane's provincial ascendancy.

And the contrast does not raise this province to the heights of Sir James Whitney's admiration for Mr. Cochrane as an enlightened and progressive steward of the possibilities of New Ontario.

It is fortunate for Sir James Whitney that his own bluff honesty, the progressive policy of Adam Beck and many administrative virtues covered the Ontario government with the flag of merit. Thus an indignant people had to shoot through the colors of public ownership and public rights in order to blow holes in the imperfections of Whitneyism.

Ontario has declared that the virtues which are to be admired in the work of Sir James Whitney are mightier than his faults. Ontario recognizes the sad truth that the virtues of the N. W. Rowell leadership offered no hope of escape from the faults of the Whitney government. Sir James Whitney's worst enemies are the flatterers who interpret the meaning of the election as an intimation that Sir James Whitney should "sit at ease in Zion."

Even Sir James Whitney will do well to take heed to his ways. Sir James is entitled to cherish his own opinion of Hon. Frank Cochrane. But Sir James will do well not to make that opinion the law of his future. If Sir James Whitney and Hon. W. H. Hearst do not do more to open up the Temiskaming country in the next four years than has been done in the same direction under the auspices of Hon. Frank Cochrane in the last six and a half years, not even the merits of Adam Beck and the hydro-electric policy will save Sir James Whitney from rebuke when next he calls the people of Ontario to the polls.

CONDEMN MAYOR'S "SPUDS."

Indianapolis Price Busting Tubers Frozen, Inspector Says.
Indianapolis, Ind., Dec. 15.—A carload of "shank potatoes" has been condemned by W. B. Stout, inspector of the board of health, and the mayor or has been given strict orders not to sell any of these potatoes. The car, now lying on the track with a large and glaring sign bearing the warning, "Condemned by the city board of health!"

The potatoes were condemned after H. R. Atkins, the major domo for the mayor, had taken some of the tubers to the market for sale.

Stout found the potatoes to be frozen, and then proceeded to the market and there condemned the potatoes being sold. Atkins stated that he had sold about fifty bushels of them, but that on receiving orders from the board of health he immediately stopped the sale.

WOMEN IN WAR.

Proposed Law For Compulsory Military Service.
Dusseldorf, Dec. 15.—The Patriotic Women's League has appointed a committee to promote a law for compulsory military service of German women in war and peace times as nurses and helpers in the transportation, commissary and uniform departments of the navy.

"Week End Chocolates."

We have just received another large shipment, fresh from the factory and will sell them on Friday and Saturday. Regular 50c. lb. for 25c. Mahood's drug store.

Taft Still Hopes.

Port Hope, Dec. 15.—J. A. Culverwell, hydraulic engineer of this town, was a delegate to the convention of the Atlantic Deep-sea Association held at Washington, and addressed the association on the subject of canals.

Mr. Culverwell met President Taft, and the president said to him that the United States would have reciprocity with Canada yet.

Kodaks for Christmas. Mahood's drug store.

Don't boast of your knowledge. Practically all you know is what you have read or have been told.

Don't forget Mahood's chocolate sale; all fillings, 50c. lb. for 25c.

Never judge by appearance. Sometimes a man's nose is naturally red.

No man is expected to shine as a talker when his wife is present.

Don't utter sweet words for 25c. Mahood's drug store.

The end of love may be a quarrel or it may be a mother-in-law.

KEEPS EYE ON CUBA.
State Department Watching the Acute Political Situation.

Washington, Dec. 15.—Further evidence that the political pot is boiling with enough sputtering in Cuba to attract the attention of the state department here, was seen yesterday. The high tension due to the movement to replace office holders who sided with Spain during the Cuban revolution with men who aided the Cuban cause, has engendered the hottest kind of a political controversy, which officials here believe will need careful handling.

How easy it is to think you would lead the list of philanthropists if you only had the money.
