Reaching End of Steel. The blast of the Grand Trunk Pacific railway contract is still being felt against the rocky walls of Tete Jaune Cache to make way for locomotive and the shrill echoes of the locomotive whistle later on.

Going westward from Edmonton along the Grand Trunk Pacific route the traveler sees the trail of the steel come already strongly marked, and Tete Jaune Cache is the objective point at present for the end of steel. By the spring of 1912. At present the Grand Trunk Pacific steel is beyond the Great Divide and over the summit of the Yellowhead Pass.

Historically, Tete Jaune is a centre of interest in Western Canada, this point was the site of one of the Hudson Bay posts one hundred years ago, when the route from the Pine, the Peace and the Fraser rivers brought the furs and the merchandise through this gateway.

At the present time there is only a band of Shuswap Indians camped on the south side of the Fraser, and as soon as the steel reaches this locality and civilization with its kodaks and pocket books will effect the establishment of a permanent order of things.

No Advance in Tea Prices. There has been a great deal of speculation as to the outcome of the present Chinese revolt and its bearing on the tea situation in general. Mr. McVillie, of Thomas J. Lupton, states that indications are now far more favorable, some believing that the Chinese trouble will be over about February 15th, the Chinese New Year. Though tea will not be cheaper, he does not believe there will arise any necessity for advancing prices this year.

The crops from China will probably be a little late coming forward, but these teas are used very little in Canada, except possibly for cheapening blends. The rapid advance last year in the cost of Ceylon and India teas has spent itself and the markets are now practically stationary for good teas, though for very common teas the market is somewhat easier.

Most salves are nine-tenths animal oil or fat. Zam-Buk hasn't a trace of animal fat in it. Most salves contain mineral coloring matter. Zam-Buk is absolutely without! Many salves contain poisonous astringents. Zam-Buk doesn't. Zam-Buk is actually more powerfully antiseptic than crude carbolic acid. Yet it stops instead of causing pain and smarting when put on a wound. It heals more quickly than any known substance, abscesses, ulcers, eczema, blood-poisoning, cuts, scalp sores, chaps and all skin injuries and diseases. OPERATIONS AVOIDED By Lydia E. Pinkham's Vegetable Compound

Belleriver, Que.—"Without Lydia E. Pinkham's Vegetable Compound I would not be alive. For five months I had painful and irregular periods and inflammation of the uterus. I suffered like a martyr and thought often of death. I consulted two doctors who could do nothing for me. I went to a hospital, and the best doctors said I must submit to an operation, because I had a tumor. I went back home much discouraged. One of my aunts advised me to take your Compound, as it had cured her. I did so and soon commenced to feel better, and my appetite came back with the first bottle. Now I feel no pain and am cured. Your remedy is deserving of praise." Mrs. EDNA CATTEL, Valleyfield, Belleriver, Quebec.

Another Operation Avoided. Poughkeepsie, N.Y.—I run a sewing machine in a large factory and got all run down. I had to give up work for I could not stand the pains in my back. The doctor said I needed an operation for womb trouble but Lydia E. Pinkham's Vegetable Compound did more for me than the doctors did. I have gained five pounds. I hope that every one who is suffering from female trouble, nervousness and backache will take the Compound. I owe my thanks to Mrs. Pinkham. She is the working girl's friend for health, and all women who suffer should write to her and take her advice.—MISS TILLIE FLEWING, 3 Jay St., Poughkeepsie, N.Y. Thirty years of unparalleled success confirms the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases.
