In one small town alone we know of some sixty conservative votes, which were pledged to the liberals if they would adopt an advanced temperance plat-form, and we do not doubt that the next election will see a veritable reurrection of temperance votes.

"In the rural sections the temperance vote seems to be overwhelmingly strong, and even in the cities it is not by any means a negligible quantity, and with a platform which is sufficiently advanced to be worth voting for, and a leader whose reputation commands general confidence, it would be political folly to ignore it. The man who thinks that the temperance

Already we are being told that it not radical enough, and an effort being enade to show that certain tem perance leaders are dissatisfied with it, because it does not abolish club and shop licenses, And on the other hand there are those who say that the bar is a necessity and must be tained. But in spite of all criticism it is practically certain that when the real fight comes, the temperance vote will be thrown against the bar and the liquor vote will be in favor

From Profits-or Losses?

WE all advertise.

A man advertises his character by his deeds, his wisdom by his words or by his silence. A merchant's store, stock, and windows speak either well or ill of his business.

So when a man says "No, I do not advertise," he knows not what he says. What he really means is that he does not publish printed advertisements.

Some proclaim this as though it were a virtue-yet spend much effort and invest much money in advertising their business through mediums other than the printed word.

They may make their wares fit for a king - yet hesitate to introduce them to Brown or Smith.

This is inconsistency.

The truth is, printed advertising is a vital force in every business, just as is the "silent" advertising of a product's quality or a inerchant's service.

When you employ the Printed Word as your solicitor in the Court of Public product or service-a good will that results in profit.

If unrepresented at this Court, your interests are as unprotected as though, when involved in a law suit, you failed to "enter an appearance" and the case is decided against you - by default.

So it is clear you pay for advertising - one way or the other. If you pay it wages, it will work for you.

If you refuse its offers of service, it will work against you, in just the measure of its employment by your Competitors.

So you are paying for advertising either out of your profits or by your losses.
