MAGIC BAKING POWDER
THE STANDARD AND FAVORITE BRAND

The Toppo, Tasty Toast

Food science has taught us that there is much body-building nutriment in the whole wheat grain which we do not get in white flour. The only question is how to make the whole wheat grain digestible. That problem has been solved in the making of

TRISCUIT
the shredded whole wheat wafer.

It is the whole wheat, steam-cooked shredded, compressed into a wafer, and baked—the maximum of nutriment in smallest bulk. Many people prefer it to ordinary bread toast. Heated in the oven to restore its crispness it is delicious for luncheon, or for any meal, with butter, potted cheese or marmalades.

IT RESTS WITH EVERY WOMAN TO BE ATTRACTIVE

No woman, perfect features or otherwise, can afford to have an anemic or worn-out tired appearance if she would wish to be thought of as either beautiful or attractive. Good features are to be prized, but many a woman possesses them who never impresses you with the fact, "Why? Because she is pale, sickly and worn-looking."
Good features, however, are not the essential factors, for how often do you see homely people whose faces are attractive? The healthy complexion, the bright eye of health, the altogether fresh appearance make it so.

These Qualities Are Within the Reach of Every Girl and Woman

by using Restoratorne Tablets. Prompt in action, they restore the natural freshness of youth. It is their capacity in this direction that makes Restoratorne Tablets stand first. In short, they are attracting great attention. Their continuous effect is entirely beneficial, while their tonic properties raise the vitality and nutrition of the whole organism, thus restoring the blood to a healthy normal condition—the real secret of a good complexion. Restoratorne Tablets have been tried and tested in hundreds of cases; all you need to do is to give them a trial to be convinced of their wonderful virtue. They are recognized as being the most natural and, therefore, the best treatment for all undermining or diseased conditions found in girls and women.

For sale by your druggist at 50 cents a box or six boxes for \$2.50 or sent postpaid on receipt of price by writing.

NICOL HALL, SCHOOL OF MINING, KINGSTON.

By Prof J. C. Gwillim in the Canadian Mining Journal.

Nicol Hall is the latest addition to the group of grey limestone buildings of Queen's university. Beside it is the newly built and equipped Gordon Hall, devoted entirely to chemistry, a gift the Ontario government, to the School of Mining.

Nicol Hall is to be given over entirely to mining and metallurgical engineering, as may be seen by the accompanying floor plans, which are the inner outlines of the architects' more complicated designs.

The building is composed of two parts: the main building of three floors, and an attic, 80 feet x 48 feet; and the furnace building a single floor, with a few small rooms over its central portion.

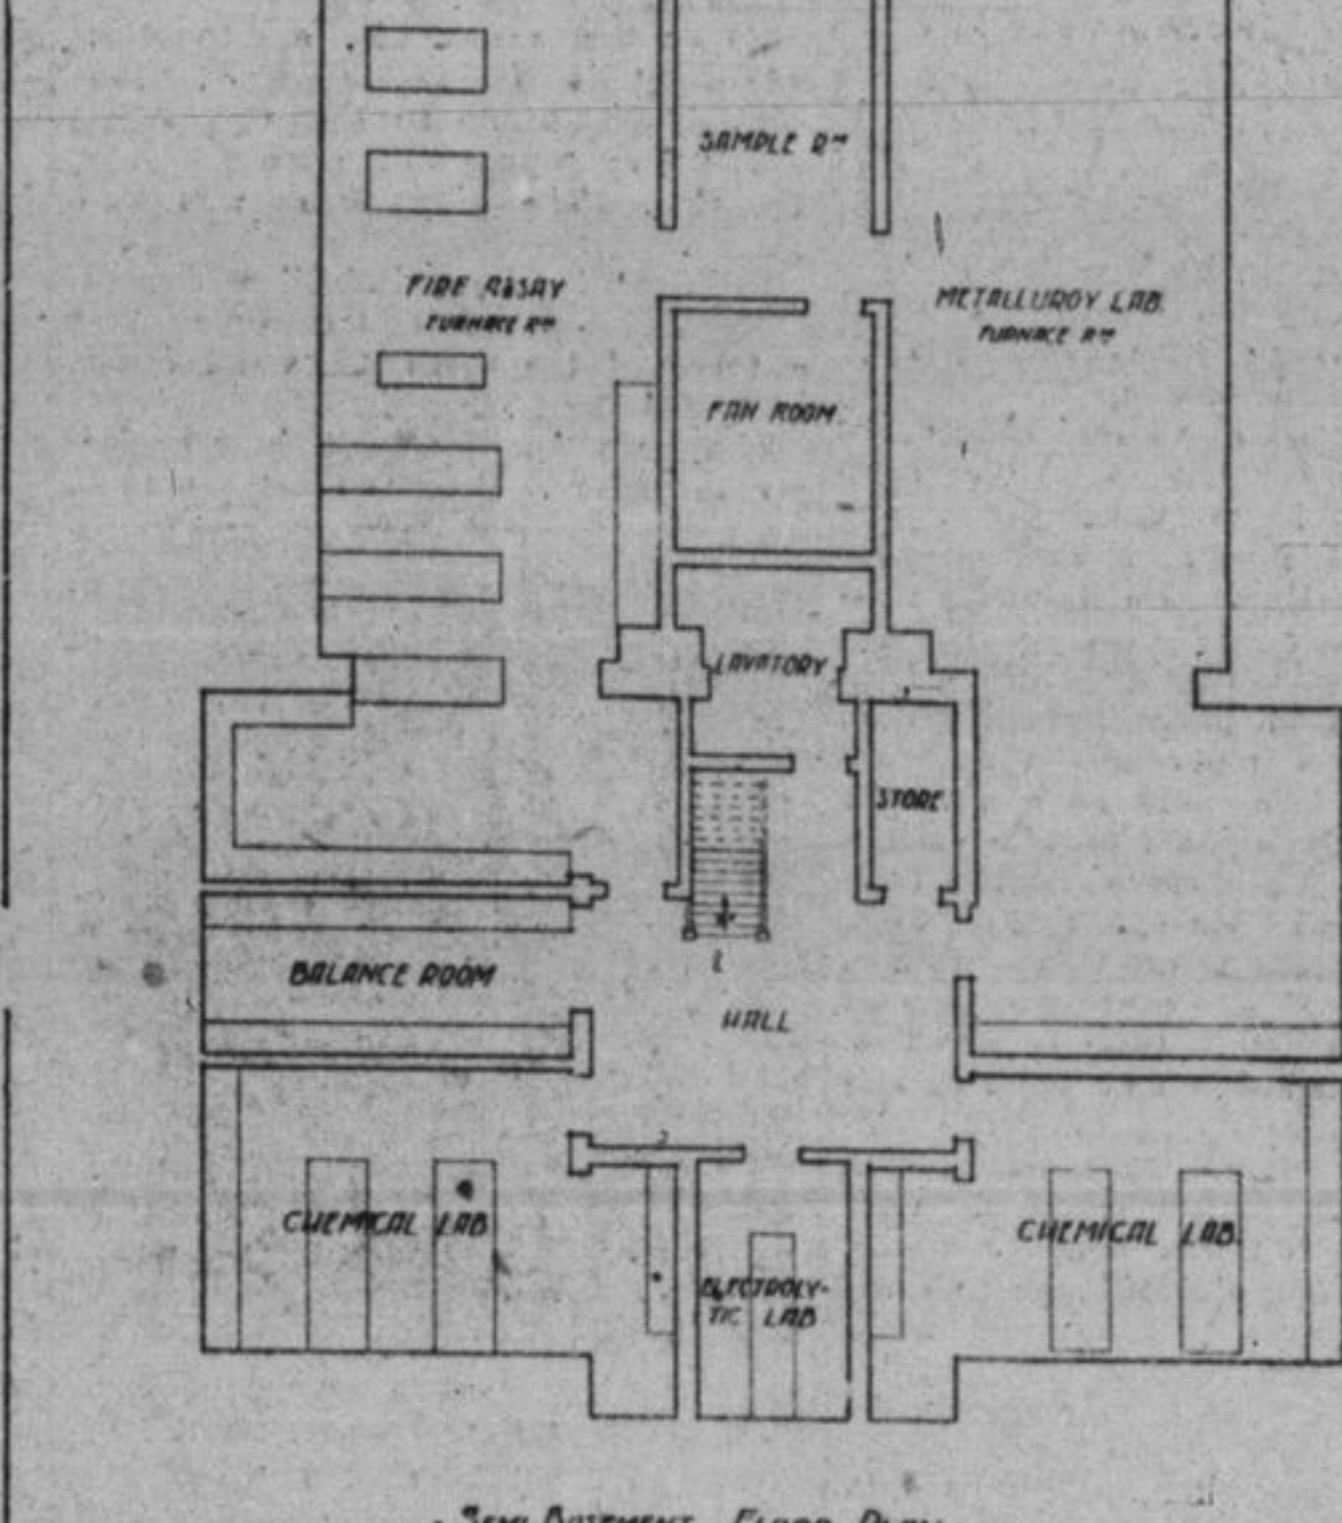

This combined building will, it is expected, accommodate the department of mining and metallurgy in a way suitable to its merits and its long traditions with make-shifts in the other buildings. The milling of ores and concentration work will still be carried on in the old wooden building, which has served so well, until the happy day when a solid stone structure is attached to these new laboratories.

Besides supplying laboratories, library, and lecture rooms for the students, there will be carried on for the federal government mines branch some extensive metallurgical research work. This building merits more than passing notice for it is the gift of a professor, William Nicol, and of graduates and alumni of the school of mining.

At the time of its inception, May, 1910, there were 254 graduates, all young. Eighty-eight of these were graduates in mining and metallurgy, but one hundred and twelve

subscribers contributed about \$10,000. Another \$10,000 was subscribed by an older graduate of Queen's and present governor

Nicol Mining & Metallurgy Building - SCHOOL OF MINING - KINGSTON ONT.

Semi-Basement Floor Plan.

Ground Floor Plan.

of the school of mining, whose name is much honored in the mining world. The principal gift, and the original idea, came from Professor Nicol, whose devotion to mineralogy and his Alma Mater, Queen's university, inspired him to build a suitable home for mining and metallurgy, partners of the earlier history of the school of mining, in old Carruthers Hall.

Over its front entrance is graven "Nicol Hall," and upon the corner stone is this inscription: "The cornerstone of this building erected with money given by Professor William Nicol and Graduates in Science was laid by James Douglas, Esq., LL.D., October 18th, 1911."

The floor plans are from the office of Power & Sons, the architects; the prospective view from O. G. Wellton and the photos from Dr. Clark, of the school of mining, and have been kindly loaned to the Whig by the Canadian Mining Journal, Toronto.

KAISER HONORS KOCH.

Royal Institute of Infectious Diseases to Bear His Name.
Berlin, April 27.—In connection with the thirtieth anniversary of Professor Koch's announcement of his discovery of the tubercle bacillus the kaiser has ordered the Royal Institute for the Study of Infectious Diseases in Berlin, in which Professor Koch worked for twenty years, to bear Koch's name hereafter.
The kaiser in his decree says "Professor Koch by his discovery opened the combat against the greatest scourge of mankind, which has since been conducted with unprecedented success and has made suffering humanity his eternal debtor."

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Sold by all Druggists. Take Hall's Family Pills for Constipation.

Father, Mother, Sister, Brother, All Should Use Parisian Sage.

Prevents Baldness—Banishes Dandruff—Stops Falling Hair and Itching Scalp.

PARISIAN SAGE is a family hair tonic and dressing that will do much good in every home.

The man who uses PARISIAN SAGE if only occasionally will never grow bald. Baldness is caused by dandruff germs which dig down into the roots of the hair, devour its nourishment and cause the root to die and the hair to fall and thin out.

PARISIAN SAGE is a scientific hair remedy that not only kills the dandruff germs, but gives the hair root just the same nourishment that nature gives it.

PARISIAN SAGE first kills the germs; then nourishes the weakened hair root and causes a growth of healthy hair.

This same nourishment (PARISIAN SAGE) causes the hair to grow

vigorous, which means that the hair becomes full of life and lustre, and grows radiant and beautiful.

Thousands are wasting time, losing hair and growing bald because they are using superficial tonics. While they may clean the scalp and make it feel refreshed, they do not get to the root of the hair where the real destroyer of hair, the pernicious dandruff germs, thrive and multiply.

Try PARISIAN SAGE for all hair trouble; it means death to the dandruff germs; life to the hair. It is pleasant to use and so harmless that it can be used by every member of the family from the oldest to the little tot.

You will be proud of the bread you'll make with PURITY FLOUR

AFTER seeing a batch of big, golden-cruised, snowy-white loaves, that you have baked from PURITY FLOUR, you will, indeed, be proud of your cooking-ability—and proud of your wisdom in deciding to pay the little extra it costs to procure such high-class flour. You will admit, too, that we are justified in the pride we take in milling this superb flour.

PURITY FLOUR

"More bread and better bread"

PURITY FLOUR is milled exclusively from the best Western hard wheat—the world's finest. More than that, PURITY FLOUR consists entirely of the high-grade portions of the wheat. The low-grade portions are separated and excluded during the PURITY process of milling. Such high-class flour, of course, expands more in the baking. It makes "more bread and better bread."

It makes lighter, flakier pastry, too, if you just take the precaution to add more shortening. On account of its unusual strength PURITY FLOUR, for best results, requires more shortening than ordinary flour.

Progressive dealers, everywhere, sell PURITY FLOUR and take pride in recommending it.

Add PURITY FLOUR to your grocery list right now.

J. A. McFARLANE, KINGSTON DISTRIBUTOR

"END THE QUARREL."

Redmond on Fear of Religious Intolerance.

To the current number of Home Rule Notes William Redmond, M.P., contributes an article, which is an answer to the sermons preached in Belfast on "The Religious Aspect of Home Rule."

Mr. Redmond deals with the fears expressed as to the possibility of religious intolerance, and states that the supremacy of the imperial parliament under a home rule bill is the real answer to such apprehensions. He adds that "whatever religious bitterness exists in the country is directly the outcome of the absence of home rule."

He also says that "at least one-half of Ulster, judged by any test, is in favor of home rule," and that "the vast majority of Irish people recognize that free trade between Great Britain and Ireland is essential for Ireland, at any rate."

In conclusion, he urges that the Irish people are anxious, on fair terms, to end the quarrel with England, and to enter into a future of real and genuine union and good feeling. He also ridicules the idea that the Irish have any desire to exchange English rule for the rule of another people.

In the same issue of Home Rule Notes Sir Frederick Pollock, who recently declared his adherence to home rule after having been a unionist since 1886, writing of the Ulster question, remarks:

"As for the talk of the Ulster rebellion, I don't believe it. On the contrary, I believe that, within ten years at most from the coming of home rule, we shall find the Ulster people taking a leading position in the Irish legislature, and very probably on the government bench."

Mother Whips "Masher."
Muncie, Ind., April 27.—It cost D. Atherton, a telegraph operator here, a beating and a fine to speak to a girl he did not know. The girl was walking near her mother and when Atherton said, "Hello, there, Kiddo," mamma broke an umbrella over his face and then had him arrested. Atherton said he had been drinking and offered to make an apology, but the mother of the girl told him to tell his troubles to the court.
