## ANCESTRY OF DOGS.

Indian Wolves and Canines.

A professor in the Natural History Museum in Paris has communicated skulls to the Academy of Sciences, He the skull of almost every species of wolf and jackal differs from the skull of the shepherd-dog to an extent that makes it impossible that this

contrary, shows some points of resemblance. This, indeed, is the only savage canine the top of whose head projects like that of our dog. There are, moreover, other charac-

teristics which the Indian wolf has in common with the dog and which the ordinary wolf does not share with them, although his origin and that of the dog have long been supposed to

The conclusion of this scientist is that the Indian wolf is the progenitor of the shepherd-dog and the blood hound. There were two primitive races of dogs enalogues to these which were first domesticated in Centra, Asia. whence they passed to Europe, and there seems no reason to doubt that' aris, which, in 1872, was crushed gest anything you eat and overcome a the bloodhound of to-day is the di sistressed, out-of-order stomach five rect descendent of the dog spoken of by the ancients as "the dog of the age of bronze."

"I hardly know how to thank you for the good Peruna has done me.

"I suffered five years with pain in the stomach. About a year ago it became so bad I could hardly bear it. I coughed day and night and grew weaker and weaker. The pain extended through my body and I also had difficulty in breathing, which made me cough. Everyone thought I had consumption.

"My husband heard of Peruna and bought five bottles. This treatment virtually cured me and now I recommend Peruna to every one who is suffering.

"I thank Dr. Hartman for this excellent remedy." Ste. Julie de Vercheres, P. Q., Canada.
