LAKE VESSEL ARRESTED, But Proceeded on Voyage on Promise to Settle.

Montreal, May 25.—A warrant was issued by Registrar W. S. Walker, of the exchequer court, Quebec admiralty division, for the arrest of the steamship Dundurr, a Hamilton vessel, plying on the great lakes. This action was taken pursuant to a demand entered by two seamen, who claimed that they had been refused payment of wages, which they alleged were due them. It appears that the seamen in question were engaged at Toronto, and came down with the vessel to

Montreal. Once here they considered their engagement was at an end, and demanded payment for their services. The captain contended that they were obliged to make the return trip to Toronto before they could claim any payment. There was no written contract passed between the parties. The warrant was duly issued and served on the vessel, but later permission was given the captain to proceed on his way to Toronto, on promise being made by Messrs. Lafleur, Macdougall & Macdougall, on behalf of the proprietors, that the amount represented by the claim of the seamen would be deposited with the court.

DEAR FOOD IN JAPAN.

"Half the Children Suffering from Want."

A public meeting at Tokio recently discussed the prevailing high price of rice. Amongst those who took part in the discussion were several members of parliament and Count Okuma. The veteran statesman came to the meeting direct from a tour through some of the poorer quarters of the city, where he had been to investigate the pauper condition. He said: "The middle and upper classes really know nothing about the high price of rice and the misery it is causing. The average monthly income of the people I have just been seeing is Y.17 per family, or about twenty-five cents per day. The average monthly expenditure is Y.25. It is impossible at the present time for the lower classes to earn sufficient for their bare needs, and crime is on the increase. The number of convicts has increased by 60,000 to 80,000 in the last five years. One half of the children are absolutely suffering from the want of food.

"Contrary to rule, the price of labour has not risen with the rise in foodstuffs, but has fallen, as the severe competition between the unemployed forces them to accept work for bare pittance. The abolition of the duty on rice is needed, but the authorities refuse to comply or listen to the cry of the people. The price of rice will soon be Y.30 koku, and wheat is expected to leap to Y.20. A direct appeal from the people is necessary in order to right the oppressive conditions.

There is a great amount of unrest in the country. It is a matter of serious consideration whether this cannot be better allayed by the reduction of taxes on food than by religious congresses or charitable collections later.

BURNING OF THE IONA.

A Remarkable Coincidence That is Recalled by F. E. Hall, of Montreal, Oswego Palladium.

The crew of the steamer Iona which was burned in the lake Saturday night, left Henderson for Montreal Monday night, John S. Parsons, of this city, arranging for the transportation at the request of the owner, F. E. Hall of Montreal. In a letter to Mr. Parsons, Mr. Hall calls attention to the fact that ten years ago, May 18th, the Iona burned to the water's edge at the Lackawanna trestle, that being the day the anthracite miners declared their coal strike. The fact that the steamer burned and sunk in the lake ten years after that date, the day that the strike in the anthracite regions was declared off, is regarded as a coincidence.

The Man On Watch.

The sale of lots in Calgary and Saskatoon for non-payment of taxes, principally by easterners, reminded the Lampman of the days when Kingston people bought land in the great North-West that afterwards was found to be under water. If people here would invest some of their money in home industries and enterprises in stead of in golden lands far away, it would be better for themselves and the old town. The Lampman notices a desire on the part of people to shoot for the west. Let them do a little booming of their own home town and help it along, instead of buying lots around Calgary and other western cities, and after a time being forced to relinquish them to the tax man.

If that young Indian who is under sentence of death at Sarnia for murder is proved to be innocent the twelve good men and true who composed the jury that tried him will surely have need to be ashamed of their verdict, which could not have had a good foundation, the Lampman thinks. Circumstantial evidence has caused the death of a good many innocent men. Long ago the Lampman determined that if he was a juror in a murder trial, and when circumstantial evidence was all that could be produced, he would never convict a man on the kind of evidence that was given even in the Crippen trial, no matter whether he thought that the prisoner was guilty.

There is no need for a strike of the carpenters, says the Lampman. These men a year ago gave notice that they would expect higher wages, and in view of this all that the contractors had to do was to contract on the basis of the increase. Since an announcement has been made of a possible strike the Lampman would suggest to the board of trade that it step in before the fatal day and try and prevent a hold-up of building operations in the town. Let it close the stable door, as it were, before the horse is stolen, and not wait until the town is in the throes of a strike.

The other evening the attention of the Lampman was drawn to some members of the 14th regiment in uniform who were proceeding from the armories with umbrellas to protect themselves from the falling showers. He consulted officers about the matter and found that it was an unwritten law that no soldier should ever use an umbrella as a protection. A rifle or a cane is the only thing he should carry. It will be in order for some one in the old 14th to give the men a little lecture on how to "shoot" home through the rain without getting wet.

THE TOWN WATCHMAN.

Your Summer Vacation.

"The Seashore," a forty-eight page booklet with a striking cover and more than 100 illustrations has just appeared describing the (New London) district of Connecticut on the line of the Central Vermont railway which promises to be an even more popular resort for Canadians in general and Montserratians in particular than was Old Orchard in its palmiest days. Anyone who is worried over the annual "summer vacation problem" will find interest if not inspiration in the contents.

Just how varied are the resources of this new territory can be realized from the statement that they include deep sea fishing and bathing at New London; river boating on the Thames; salt water bathing and sand for the youngsters at Ocean Beach, Watch Hill, and Block Island; as well as golf and tennis at Fisher's Island. New London is the scene every year of the Harvard-Yale boat race which corresponds in America to the historic contests between Oxford and Cambridge Universities on the older Thames of the British Isles, and this sporting event attracts large crowds of college men and "summer girls" to the sturdy sea port town.

Copies of this publication may be obtained for the asking from any agent of the Grand Trunk railway system or Central Vermont railway.
