### Cooking is a pleasure when you have a "McClary" Gas Range in your kitchen

Sold By

MITCHELL

You wouldn't think of lighting the furnace during the intense heat of summer. Why persist in cooking on a coal range during the hot weather? GAS is a much cheaper fuel than coal-far more convenient and easier on the cook in the ummer time. Any McClary gas range pays for itself very quickly in the actual money it saves.

The Model shown in the cut is "McClary's" latest production and therefore the greatest range value there is.

The first glance convinces you that your comfort and convenience have been studied by the designers and builders of this range. It is quite apparent that you can cook a big dinner on this range without being crowded. The big roomy Oven is placed high. The Broiler is also elevated. There is no "stooping or bending" over this range.

Like other "McClary" ranges, this model has the white enamelled broiler and drip pans. Also Anti-Rust linings which add to the life of the range. The body is finished in bright, black enamel, and is easy to clean.

Just see the many styles of "McClary" gas ranges at your dealer's. All "McClary" gas ranges can be changed from artificial to natural gas in a few moments if necessary-see them and pick out the gas range that mits you best.

SOME TIMELY HEALTH HINTS FOR SUMMER SEASON.

Fruit and Vegetable Diet-Safer to Avoid Meats and Eggs in Large Quantities - Abuse of Cooling Drinks, With Food Source of Dis-Journal of American Medical Associa-

In Europe during the summer of 911 the excessive heat was observed by De Fleury to have had a proafter using two of the bottles, the PARISIAN SAGE is without doub! increase in sickness during the hot hair came in until now I have as the most efficient hair grower period, but after its subsidence many good a head of hair as I had before beautifier and dandruff cure in the persons developed gastro-intestinal world; and people who are wasting disturbances, congestion of the liver

> ing scalp; will put life, lustre and says that the abuse of cooling drinks with food, the tendency of foods to spoil and the increasing virulence of disease germs were important factors, but he believes that the most important factor was the Civersion of the water in the body from the kid neys to the skin, with increased exeretion of water, with lowering of blood-pressure, but with decreased

> > The sweat-excreting apparatus of the skin is equal to about a fourth to me when I suffered with distressing of the filtering apparatus of the kidneys and during the hot weather fluids are excreted by the skin most entirely. It was De Fleury's observation that persons who lived on a fruit and vegetable diet, to the exclusion of ment and eggs, escaped gastro-intestinal disturbances. Hot drinks also acted in a prophylactic way, as Ad the employment of the lactic ferments. Drugs which increase the blood-pressure and stamulate th kidney function also had beneficial ef-

The observations of De Fleury would seem to confirm the dictum that in hot weather it is desirable to decrease the amount of protein food intake, to limit the diet more closely fruits and vegetables and to drink plenty of plain water or other bland drinks while the stomach is empty. in order, if possible, to increase eli-

mination by the kidneys. The frequency of congestion of the liver would seem also to support the theory of a deficient elimination poisons as an important cause of morbidity due to the heat.

### A Clever Canadian.

Donald Maemaster, the Unionist member for the Chertsey Division, s a Canadian who has rapidly made his mark in Great Britain. When he contested the Leigh Division of Lancashire in 1906 he made a great im pression on the electorate, and i caused no surprise when he found his way to Parliament, by way of Chertsey, at the election of 1910.

Mr. Macmaster was born at Wil liamstown, Ontario, and educated at McGill University. He displayed the greatest aptitude for legal stud ies, and when he began to practice at the Canadian bar he was marked out as a man with a brilliant future. He soon fulfilled these expectations and rose to be the Crown prosecut-

or in many celebrated cases. He acted as arbitrator between the Newfoundland Government and the Reid-Newfoundland Railway. He was also counsel for the United States in the Gaynor and Green extradition enquiry, and served on a Royal Commission which was appointed to inquire into the Government of Quebec. For four years he was a member of the Canadian House of Commons, and was elected president of the Montreal bar. He which he declined, and after securing all these honors he evidently looked for fresh worlds to conquer. He went over the water a few bar, and soon obtained a commanding position. Though well advanced in years, he is hale and vigon the threshold of his career

To Teach Peace in the Schools. In these days of boy scouts, mili tary drill, war games and toys, and a general strenuous, hat-in-ring, antimollycoddle, knock em-though-theropes atmosphere in the nursery, it is interesting to note that the United States Bureau of Education has mapped out and recommended course of peace and good-will for use in the public schools. The final aim of the course is to impress the needless-

ness of war between nations. The child is at first to be taught kindness toward his companions and his animal pets. Later on he is to be instructed in the desirability of gentle-ness in the home, and of kindness and consideration in school and at play In the fourth grade it is proposed to teach the city relationships, in the tion, in the sixth there is to be instruction in the essentials of unselfishness as applied to good citizenship In the seventh and eighth grades is offered a view of world relationships, of the larger brotherhood, and of the desirability of peace,-Cleveland Plain

### Healthy Rivalry.

Evidently a healthy spirit of rivalry is growing up between Vancouver and Prince Rupert, it's ambitious young rival, as Pacific ports. "Why can't the truth be told about Prince Rupert climate?" plaintively inquires the Weekly Empire, of that place. "If ever city was maligned, misrepresented and unfairly criticized from the standpoint of weather, that city is Prince Rupert, It's about time facts were told. It's time that people were made aware that here is a city where the mellow richness of Indian summer lingers till after mid-winter and where the summer months are unsurpassed for beauty and salubriousness. Down in Vancouver it's a favorite and miserable sort of a jest to advise travellers to Prince Rupert to be sure and take their mackintoshes and rubbers. A thread-bare and hollow joke. The other way round would be more

"Fruit-a-fives" Makes Wonderful Cura

GLENCOE, ONT., Aug. 15th. 1911. "So much has been said and written about "Fruit-a tives" that it might seem unnecessary for me to add my experience. But "Fruit-a-tives" were so beneficial Dyspepsia, that I feel called upon to inform you of the remarkable and satisfactory results I have had from

Dyspepsia and Indigestion as everyone knows, can give you more uncomfortable hours and days than most common

"I am glad to be able to say to you that although in the past I suffered excruciating agony with Dyspepsia, I am now in perfect health. "Fruit-a-tives" accomplished the desired result and I have to thank them for my very favorable and satisfactory

state of health" N. C. STIRLING. Why don't you try "Fruit-a-tives"? 50c a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa,

# The Best Treatment for Itching Scalps

To allay fiching and irritation of the scalp, crusts, scales and dandruff, and promote the growth and beauty of the hair, the following special treatment is most effective, agreeable and economical. On retiring, comb the hair out straight all around, then begin at the side and make a parting, gently rubbing Cuticura out me into the parting with a bit of soft flannel held over the end of the finger. Anoint additional partings about half an inch spart until the whole scalp has been treated, the purpose being to get the Cuticura oint ment on the scalp skin rather than on the hair. It is well asked once, when he was telling the scalp skin rather than on the hair. scalp skin rather than on the hair. It is well to place a light covering over the hair to protect the pillow from possible stain. The next morning, shampool with Cuticura soap and hot water. Shampool alone may be used as often as agreeable, but once or twice a month is generally sufficient for this special treatment for women's hair. Notwithstanding Cuticura soap and ointment are soid everywhere, those wishing to try this treatment may do so without expense by sending to "Cuticura." Dept. 4M, Boston, U. S. A., for a free sample of Cuticura soap and ointment, with \$3-p. book on skin and hair.

WOULD REVOLUTIONIZE NAVIES Invention of Oil Motor Engines

Means Advanced Step. There is in London at the present oment the man whose researches e destined to bring about the greatest change in power production since the steam engine was worked out-Dr. Diesel, who lectured before the Institution of Mechan-

ical Engineers. It is a significant fact that twenty years ago this quiet, thoughtfulooking man, with gray hairs and eyes that twinkle through spectacles, was regarded as little better than a charlatan. Engineers, even in his own country, spoke of his invention with contempt. Dr. Diesel has lived that down and has had an ample revenge. To-day he is a rich man, with the possibilities of untold wealth shead of him.

Engineers in Europe and America are competing against one another in the production of his engines. The navies of the world are eagerly experimenting with Diesel motors, commercial vessels have been fitted with them, they are driving electric lighting and other plants, a beginning has been made in using them as locomotives. All this Dr. Diesel foresaw and predicted years ago, but he had the sanguine spirit of the inventor. He knew the wender of what he had done, he did not realize how long it would take him to conquer the world.

instead of using coal mirect in steam engines, we will, in the future which Dr. Diesel predicts, distil it from the tar and tar oils which can be utilized by the Diesel engines, and finally employ the coke for heating and metallurgical processes.

In these ways every ton of coal will be made to yield far more work than in the past. We shall be consuming our coal scientifically and completely, instead of wasting ninetenths of it, as is now done. In the current number of the Review of Reviews, the Selandia, which is driven by Diesel engines, is spoken of as "a ship of destiny, perhaps in more ways than one a ship of doom." "She heralds (1) the dethronement of King Coal, the monarch upon whose throne rests British and industrial prosperity; (2) the scrapping of the Dreadnoughts, and (3)

est of our assets as rulers of the Lord Fisher said two years ago that in five years the whole of our mercantile marine would have to be rebuilt owing to the coming of the motor-steamer, Only nineteen years have passed since the first Diesel engine was built, a little machine of five horsepower. To-day huge engines of six cylinders, each cylinder capable of 2,000 horsepower, can be constructed. From the land the Diesel engine has gone to the sea where it is running in boats of con-

siderable cargo, in submarines, tor-

pedo boats, and at least in one lin-

It was recently announced that the Emperor Francis Joseph had accepted the petition presented by his nephew, the Archduke Ferdinand Charles asking for permission to resign all his rights as a member o the Imperial Family. A pretty love romance lurks behind this remark-

able renunciation. The Archduke met Fraulein Rose Czuber in a Vienna ballroom years ago, and, attracted, by her beauty, intelligence, and accomplishments, obtained the entree to her

father's house. -His attempts in 1903 to obtain the Emperor's consent to his marriage were not successful. A year later a family council was held to arrange an alliance between the Archdue and a lady of royal rank but the Archduke said he would marry Fraulein Czuber or no on In consequence of his attitude he retired from the court in disgrace and, on his health failing him, relin

quished service in the army. As soon as the petition is formally granted the Archduke will married in Switzerland, where both Fraulein Czuber and himself are

It is stated that the Archduke will adopt the name of Burg. The Emperor will grant him an appanage of £1,600 per annum, and the couple will reside in Switzerland. The Archduke will have to renounce all his rights to the dual throne, although there are only three lives between him and the succession.

### Anxious to Heip the Ignorant.

Dr. Edwin A. Alderman, the presdent of the University of Virginia, tells this story, illustrating the importance of being careful in "I know of a certain instructor in

charity in what they wrote. A young man brought on one occasion a very carefully prepared essay. "A good piece of work," said the instructor, "but, Mr. Smith, you should remember to write every sentence so that the most ignorant person can understand every word

rhetoric who always impressed up-

on his students the necessity of

you put down." "The young man looked worrled and asked anxiously: "What part of my essay was not clear to you, professor?"

### Asparagus Etiquette.

Asparagus was a great dish with and Falling Hair Dean Swift. Dining with him one day George Faulkener, the Dublin publisher, asked for a second helping of his revent dry, thin and falling hair, remove favorite vegetable, but Swift pointed to the stalks on his guest's plate and said: "Sir, first fmish what is before you." "What !" exclaimed Faul-

# The Crisp, Tasty Toast

Food science has taught us that there is much body-building nutriment in the whole wheat grain which we do not get in white flour. The only question is how to make the whole wheat grain digestible. That problem has been solved in the making of

the shredded whole wheat wafer.

It is the whole wheat, steam-cooked shredded, compressed into a wafer, and baked-the maximum of nutriment in smallest bulk. Many people prefer it to ordinary bread toast. Heated in the oven to restore its crisppess it is delicious for luncheon or for any meal, with butter, potted cheese or marmalades
