

MAKE DOUBLE TRACKS

4,000 MEN BEGIN WORK ON ERIE SECTIONS.

Alberta Farmers to Ask Grain Elevator Subsidy—Canadian Pacific Railway's New Mileage.

New York, July 12.—Contractors are now at work on the two hundred and fifty miles of double track for the Erie railroad. Nearly 4,000 men are distributed over the four sections from Corry, Pa., to Chicago.

The work represents improvements costing \$8,000,000 and in many places involves relocation and bridge building. It is expected that the new trackage will be ready for operation in December.

It is a part of the system of improvements projected by F. D. Underwood, its president, and is regarded as an important supplement to the recent extensive grade reduction of eighteen feet to the mile.

At the office of the president it was said that since the efficiency had been increased the traffic also showed improvement.

First Dividend.
The directors of the Canada Foundries & Forgings, Limited, have started off the second half year of their existence by the declaration of a dividend of 3 1/2 per cent. on the preferred stock for the first half of 1912.

The meeting took place on Tuesday at Brockville, and the dividend was made payable on the 15th inst., to shareholders of record on June 30th, 1912. W. M. Fair, of the financial firm of J. A. Mackay & Co., was at the same meeting elected a director of the company. It is thought that dividends will be quarterly hereafter.

Made Temporary Loan.
The Canadian Bank of Commerce has issued treasury bills for \$615,000 to Shortt's city at 4 1/2 per cent. for three or six months, pending improvement in money market abroad. The city has been paying six per cent. on over \$500,000.

Canadian Patents.
Applications for patents in Canada in the last fiscal year totalled 5,253, an increase over the preceding year of 256. Of the total number, issued 4,992, sixty-eight per cent. are to residents of the United States.

Grand Trunk Figures.
G.T.R. earnings for first week of July, \$1,012,051. Increase, \$68,956.

Financial Items.
In Chicago, hints that rust had appeared in the north-west, unsettled prices of wheat.

The discount rate of the Bank of England is unchanged at three per cent. A year ago it was also three per cent.

C.P.R.'s mileage shows a total of 11,117 miles, an increase of 135 miles since last month. The increase since the beginning of the year is 275 miles.

Bank clearings throughout Canada continue to furnish evidence of the magnitude of the progress that is making in most sections of the Dominion.

A London cable says: Montreal and City of Victoria's agents are in the old country metropolis, endeavoring to place \$500,000 in six months' treasury bills at about 4 1/2 to 4 3/4.

The Trusts and Guarantee company announces that the stock of the Cobalt Majestic Silver Mines, Limited, which went into liquidation some time ago, are now receiving payment of their claims in full.

It is again circulated that Mackay, common, is a worth watching. The tip is being passed around that the stock will be placed on a six per cent. basis next quarter. Meanwhile a good deal of July dividend money is finding its way into this stock.

At the next meeting of the provincial legislature of the province of Alberta a strong effort is to be made to secure the passage of a bill similar in effect to the Saskatchewan act, which grants a subsidy of eighty-five cents on the dollar to farmers for the erection of grain elevators. It is stated by Alberta grain growers that immediately the act is passed at least 100 elevators will be built on these terms.

Make Your Will To-day.
If you have not already made your will you should lose no time in doing it. The unexpected usually happens. The Trusts & Guarantee Co., limited, 43 and 45 King street, West, Toronto, make a good executor under all circumstances, and at small expense to your estate. Appoint the company executor, and let them hold your will in their security vault, free of charge until required.

Smoke Traps in Theatres.
Smoke traps are used in the Stetion-theatre, Germany, to provide a means of escape. They are placed in the roof above the stairs. Six traps are mounted on the vertical sides of a skylight, so that a large opening is given by raising all the traps. The opening devices are controlled from the stage.

How to Keep Face Young and Attractive
(National Hygienic Review.)
The way to ward off old age is not to fear it, but to allow one's self to be oppressed by the dread advancing years. Use only legitimate preventives and avoid trying experiments with preparations not indorsed by physicians. An entirely safe and very effective way to keep the complexion young-looking and beautiful is to apply ordinary mercurial wax at bedtime, using it like cold cream, washing it off in the morning. This gradually absorbs the withered, faded cuticle, which is replaced by the more youthful, pink-tinted under-skin. One ounce of this wax is had at any drug store, is enough to completely rejuvenate a worn-out complexion.

Wrinkles and flabbiness of cheek and chin, the first signs of advancing age, may be lessened by a simple, harmless preparation made by dissolving an ounce of powdered asphaltite in a half pint witch hazel. It is used as a face bath.

DOMINION FAIR

At Ottawa This Year Will be Very Attractive.

Novel features are being secured every day for the Dominion Exhibition to be held in Ottawa from September 5th to 16th. These innovations, with the expansions in the main departments, will form an aggregate of attractions and displays that will create a bustle and stir in every part of the hundred acres of fair grounds. The exhibition association has prepared a bulletin of the features secured up to date, which will be sent to any applicant in the main departments, will form an aggregate of attractions and displays that will create a bustle and stir in every part of the hundred acres of fair grounds.

The result of the judging in the live stock departments will be impressive, as demonstrated to the public at 1.38 p.m., Thursday, third-last day of the fair, by a monster parade of the animals winning Dominion Exhibition premiums. The procession will be repeated at the same hour Saturday. On Friday and Saturday an extra display will be made before the grand stand of the championship stations, one of each breed to be designated by printed cards. This is chiefly for educational purposes. Another special number on the programme for Friday afternoon is the lining up before the grand stand of the heavy horses which will compete in strings of ten for a purse of \$100.

Some of the special features are mentioned in the advertisement which appears in another column.

George P.'s Advice.
George P. Graham wisely advises young political speakers to steer clear of agricultural statistics before an agricultural audience unless farming is their every-day occupation. The advice comes out of a full heart. Once Mr. Graham was campaigning through Kent county, and if there is any county that knows the hog-raising business it is Kent. Standing on the rear of Sir Wilfrid's train at flag station, Mr. Graham was called upon by twenty or thirty farmers to give them a speech. The cabinet minister naturally chose the question of hogs.

"What was the price of pork when this government took office?" Was it not five dollars and sixty cents?" he thundered.

"No, sir," chirped up a farmer boldly, "it was five dollars even."

Mr. Graham accepted the correction and proceeded: "And what do we find hogs selling at to-day in this beautiful county of Kent? Just seven dollars and thirty cents, gentlemen."

"Wrong again!" piped the mathematical farmer from the crowd, "you're fifty cents shy."

Repeating the incident to a friend Mr. Graham added: "When it comes to statistics on farm produce after this I hold my tongue."

What the "Wildebeest" Is.
Stewart Edward White in the World's Work for June is able to describe very amusingly this unfamiliar animal, as a result of personal experience. He went on a visit at Japa, an American estate in South Africa. He says:

"The wildebeest is the Jekyll and Hyde of the animal kingdom. His unusual and familiar habit is that of a heavy, sluggish animal, like our van-bred bison. He stands solid and inert, his head down; he plods slowly forward in single file, his horns swinging, each foot planted deliberately. In short he is the personification of dignity, solid respectability, gravity of demeanor. But then all of a sudden, at any small interruption, he becomes the riddiest of created beings. Up goes his head and tail; he buck jumps, cavorts, gambols, kicks up his heels, bounds stiff-legged, and generally performs like an irresponsible infant. To see a whole herd at once of these grave and revered animals suddenly blow up into such light-headed capers goes far to destroy one's faith in the stability of institutions."

A Useful Invention.
A Yorkshire farmer was paid by cheque for some cattle he had sold. It was the first time that it had ever happened.

"What's this," he said.

"Why, money for the beasts," said the cattle dealer.

The farmer stared and had to be assured that if he took it to the bank they would give him gold for it.

"Well," said he, "Aw'll try, but if it's a wrong 'un thou'll hear about it."

The cheque was cashed, of course, and the farmer went home happy, but he could not sleep. He had seen a wonderful thing and it had excited him. As soon as day broke he made for the cattle dealer's house and woke the dealer.

"It's me," he said. "Where's the got them bits of paper from? Aw cud do w'y half a dozen myself!"

YOUTH'S COMPANION.

Stricter Wireless Regulations.
New York Herald.

The regulations proposed by the International Wireless conference establish silence periods of ten minutes every hour for the detection of distress calls, and impose stricter rules for the exchange of business between rival companies. Most satisfactory of all is the subordination of everything else to safety. That is the first function of wireless telegraphy, and the emphasis put upon it evidences a recognition of the lesson enforced by the worst of modern sea tragedies.

Buried 100 Days, Hog Still Lives.
Pinned under the ruins of a church near Evergreen, Ala., which was blown down on February 21st, a hog was found to-day, alive, and while weakened from the long imprisonment, was able to eat and drink. The animal was over 100 days without food, perhaps a record for fasts. Several people were present when the debris of the church building was removed, and the finding today, alive, and while weakened from the long imprisonment, was able to eat and drink. The animal was over 100 days without food, perhaps a record for fasts.
