

### A SUMMER DRINK WHICH STRENGTHENS

A delicious summer drink is iced Bovril. Mix a spoonful in a cold split soda water. This is both cooling and strengthening. Cold bouillon served alone or with toast or crackers is an exquisite afternoon refreshment. Make a quantity of Bovril with boiling water in the usual manner and cool it in the ice box. Many hostesses are serving this bouillon which is always excellent.

The best way to buy Bovril is in the 1 lb. bottles. These are by far the most economical, being retailed usually at \$1.75, and contain eight times as much as the bottle usually sold at 35c.

We will gladly send on application a very useful leaflet on "invalid and general dietetics," which explains why Bovril aids digestion and enables you to absorb the full nutriment from your ordinary diet.

Address: Bovril Limited, 27 St. Peter St., Montreal.

### BEAUTIFUL HAIR AT SMALL COST

A Simple Remedy Beautifies the Hair, Cures Dandruff, Stops Falling Hair.

What a pity it is to see so many people with thin, wispy hair, faded or streaked with gray, and realize that most of these people might have soft, glossy, abundant hair of beautiful color and lustre if they would but use the proper treatment. There is no necessity for gray hair under sixty-five years of age, and there is no excuse for anyone, young or old, having thin, straggling hair, either full of dandruff or heavy and rank smelling with excessive oil.

You can bring back the natural color of your hair in a few days and forever rid yourself of dandruff and loose hair, and make your hair grow strong and beautiful by using Wyeth's Sage and Sulphur Hair Remedy. For generations common garden Sage has been used for restoring and preserving the color of the hair, and Sulphur is recognized by Specialists as being excellent for treatment of hair and scalp troubles.

If you are troubled with dandruff or itching scalp, or if your hair is losing its color or coming out, get a fifty-cent bottle of Wyeth's Sage and Sulphur hair restorative, and notice the improvement in the appearance of your hair after a few days' treatment. Agent, G. W. Mahood.

### ALBERTA SHEEP INDUSTRY.

Draws Big Ranchers From South America.

Calgary, Alta., July 19.—South American sheep ranchers who are coming to Alberta with good South American fine stock have purchased four sections of non-irrigable and two sections of irrigable land in the Canadian Pacific irrigation block east of Calgary. Charles P. Heustock, of Rio Gallegos, Patagonia, has purchased four sections near Rued, and will go extensively into the sheep business. He declares that all prospects here are much better for the sheep industry than in South America. H. Calest, from Patagonia, has also arrived, and will buy land for sheep. These are all experienced sheep men, and should give great impetus to the industry in Alberta.

When a married woman wants her own way she is apt to get peeved if her husband insists on letting her have it.

Give some men rope enough in the guise of campaign cigars and they'll vote the other ticket.

## FANTASTIC ARITHMETIC AND CEMENT

Protection Amounts to But 23 1-2 Per Cent.

### CONIAGAS DIVIDEND

WINDSOR DEBENTURES SOLD TO TORONTO CONCERN.

Robb Engineering Works Will Go Into the Hands of a New Company—The Government Has Made a Loan—To Develop the Oil Fields of New Brunswick.

Montreal, July 18.—Some fantastic arithmetic is being indulged in by some of the tariff experts that inspire the cement duty articles in the government press. It is being stated that the protection on cement amounted to about thirty-five per cent. The truth of the matter follows:

American cement can be bought at certain points at seventy cents a barrel. United States government statistics show that the average price is really eighty-seven cents a barrel. But even at the price of seventy cents the protection works out as follows:

The sacks containing the cement cost about 40 cents for the equivalent of a barrel in bulk and shipments are made in sacks. This makes the real price of a barrel of cement \$1.10. The duty on a barrel of cement is 22 cents plus four cents duty on the sacks for a barrel. This makes a total duty of 26 cents. The ratio of 26 cents to \$1.10 is 23.67 per cent, which is the total of protection.

And yet a section of the press is preaching that the protection is thirty-five per cent.

**Coniagas Dividend.**  
The Coniagas Mines' directors have declared the usual quarterly dividend of six per cent, and a bonus of three, payable August 1st.

**La Rose Rumors Denied.**  
Montreal, July 18.—Reports emanating from Toronto that part of the La Rose surplus is invested in other ventures are emphatically denied. President McGibbon asserts they come from persons who seek to injure the company and its stock.

**Windsor Debentures Sold.**  
Windsor, July 18.—By the adoption of the minutes of the previous session the city council has virtually given formal ratification to the sale of \$195,000 worth of 4 1/2 per cent. debentures to Wood, Gundy and Company, Toronto, at a price of \$188,000.

**Take Over Engineering Co.**  
Montreal, July 18.—Steps are now being taken to incorporate and organize a new company to take over the properties of the Robb Engineering company, of Amherst, N.S. The company has defaulted in the payment of its assessments and taxes and also in the payment of its bond interest, due on July 1st. The outstanding liabilities amount to approximately \$900,000.

**Blue Sky Law in Manitoba.**  
Toronto, July 18.—One of the most interesting developments in many years is to be found in the enactment of the Sale of Shares Act in the province of Manitoba. This legislation is, in effect, a "Blue Sky" law, and is modelled after the similar code in the state of Kansas. Its purpose is to put a stop to the sale of worthless scrip, and to keep the promoters of unsound and insecure "investments" out of the west.

The most startling feature of the Sale of Shares Act is that it is having in effect which has presumably not expected by its sponsors. The regulation provides under a penalty of not less than \$50 or more than \$500, or in default of which six months in jail, that it shall be unlawful for any one to sell, offer or attempt to sell any securities not incorporated under a Manitoba charter without first having obtained from the public utility commissioner a certificate in the manner provided.

The law quoted means that the majority of stocks traded in on the Toronto or Montreal exchanges, as well as those in New York and London, cannot be offered for sale offering them first getting a certificate from the commissioner.

**Wire Companies Combine.**  
Toronto, July 18.—A merger is said to be pending in the hardware and wire trade, which will include three independent wire mills. It is said, however, that the Imperial and Wire Co., of Collingwood, will be the holding company for this merger. This company recently enlarged its preferred stock capital by \$300,000. This stock will be available for the purpose of acquiring a few competitors.

**\$20,000,000 New Loan is Made.**  
London, July 18.—It was reported on the stock exchange that the

Everybody now admits Sunburn is best for them. Let it give YOU ease and comfort.  
Druggists and Stores everywhere  
**Zam-Buk**

government had placed \$20,000,000 three per cent. 15-year's exchequer bonds at 93 to 93 1/2, with a large financial house.

### Financial Notes.

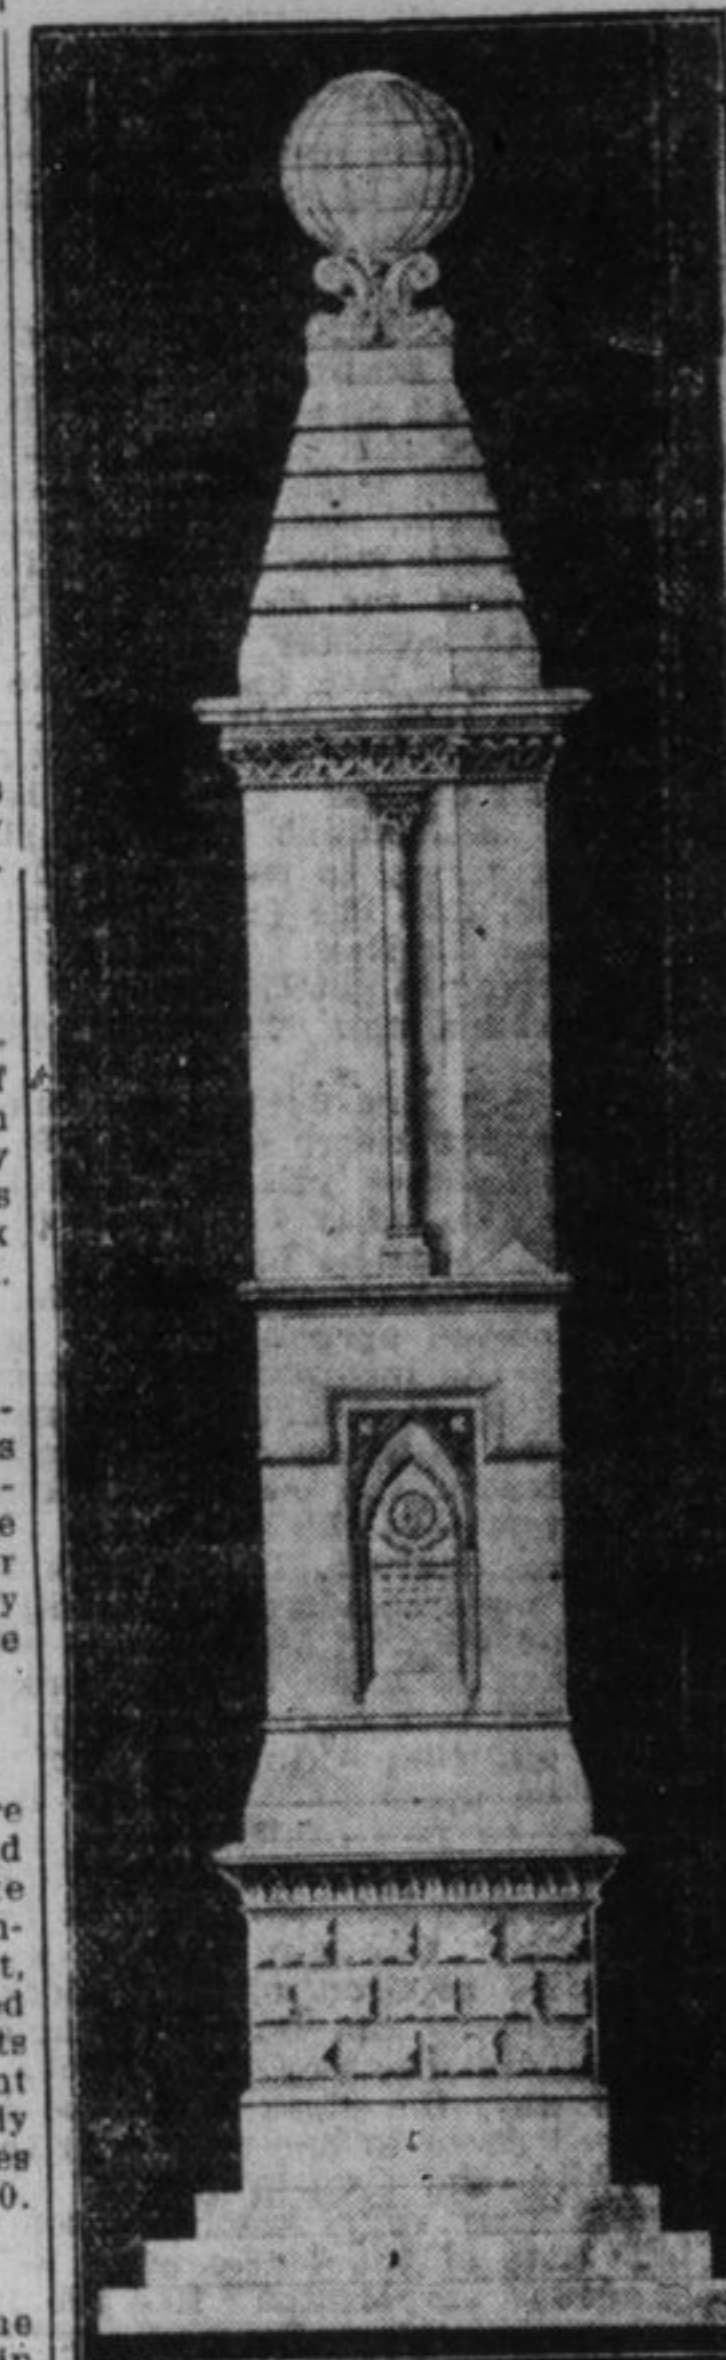

W. J. Thorold, director of the Canadian and General Trusts, Limited, of London, England, has been elected a director of the Sherbrooke Railway & Power Company to represent the English interests in the company.

Grand Trunk Railway traffic earnings from July 8th to 14th are as follows:—1912, \$1,037,863; 1911, \$994,809. Increase, \$43,054.

An oil development company, with a capital of \$25,000,000 has been formed and will soon be in operation for the development of the oil fields of New Brunswick. It will have ample financial backing, since the Mackenzie and Mann interests are believed to be in control.

The Dominion Reduction company, organized to take over and carry on the work of the Nova Scotia Cobalt property and to operate the mill, has received its charter. The capital is \$400,000.

C.P.R. traffic earnings for week ended July 14th, \$2,701,000; same week last year, \$2,170,000.

HANLAN MEMORIAL MONUMENT. To be erected at the cost of twenty thousand dollars on Toronto Island as a memorial to the late Edward Hanlan, of Canada, who was a years rowing champion of the world.

**Budget From Newburgh.**  
Newburgh, July 17.—The local baseball team played a friendly game with Yarker team, on Saturday last, and suffered defeat. W. E. Dunn has sold his property in the village to R. Wartman, barber.

A sudden death occurred at Point Anne to one of Newburgh's old boys, last Sunday, when Joseph Barnes, aged thirty-three, was crushed to death in the elevator of the cement works. His remains were brought here for interment, which took place on Tuesday afternoon. He leaves a son, five years of age. The A.O.U.W. took charge of the funeral. The infant child of P. Finn died on Tuesday and remains buried in Centerville cemetery.

Miss Stella Kennedy, of Rochester, N.Y., and Miss Cecile Kennedy, of Bloomfield, are spending their vacation with their sister here. M. G. Storus spent last week in Belleville. Mrs. (Dr.) Paul and children and Miss A. Beeman, of Fort William, are visiting their parents, Dr. and Mrs. Beeman. Mrs. Jane Wood left for Smith's Falls to visit her daughter, Mrs. Childs. Misses Georgia and Helen Bell are visiting their grandparents at Merrickville. Mrs. S. Shorey and daughter, Clara, left for Cananilton to visit Mrs. Shorey's son. They will also visit Waterdown.

**Forced Girl to Drink Whiskey.**  
Butler, Pa., July 19.—Douglas guards surrounded the Butler county jail to protect Carl Snyder, while the police are looking for Nero Kiester. It is alleged they decoyed seventeen-year-old Stella Heckenberry to a barn, forced her to drink whiskey and kept her from Saturday night until Sunday night. The girl died of alcoholic poisoning after telling her story.

**Ice on Northern Course.**  
New York, July 19.—The steamer Oceanic, from Southampton, and Cherbourg, came by way of the northern sea lane followed by the Titanic when she met disaster, and supposed until recently to be clear of ice for the season. The Oceanic reported having passed several small icebergs.

Ledgers discovered in Spain show that Columbus expended \$7,200 in discovering America.

## AWAIT CHURCH UNION

THE METHODISTS ARE ALL READY FOR IT.

The Move Should be Made as Soon as Possible—Provisional Arrangements Should Not Delay Consummation.

Toronto, July 19.—A two days' sitting of the Methodist General Conference Special Committee on Church Union resulted, yesterday, in a report expressing the view that this union in the interests of the church should be brought about as expeditiously as possible. It also says that no provisional arrangements for co-operation among the churches in question should be permitted to delay the early consummation of the project. The committee's report says:

"That the vote taken indicates so decided a preponderance of opinion in favor of union on the part of the officials, members, and adherents of the Methodist church that this general conference special committee is of the opinion that if the union of the negotiating churches is to be brought about, it is in the interest of the church and of the extension of the kingdom of Christ that the said union should be consummated as soon as practicable."

"That this committee has received with deep interest the communications from the Presbyterian and Congregational churches setting forth the action of the chief courts of these churches regarding union, and would gratefully acknowledge the fraternal spirit which characterized the proceedings and deliverances of these churches, and earnestly pray that the spirit of unity which has so marked the deliberations of the union committees of the negotiating churches may soon find full expression in the organic union of these churches."

**Temporary Co-operation.**  
"That the recent action of the General Assembly of the Presbyterian church, suggesting co-operation between the three negotiating churches in several departments of work, pending the accomplishment of organic union, has created a situation unforeseen by the General Conference at its last session, and not provided for by any legislation of that body. In this emergency this General Conference Special Committee, recognizing the power of co-operation with other churches, given by the General Conference to the Board of Missions and the department of Temperance and Moral Reform, and in no way interfering therewith, refers to the general boards and committees of our church the consideration of such temporary arrangements for co-operation as may be found to be feasible; and, further, this General Conference special committee recommends our boards and committees to have such conference as may be deemed necessary with corresponding boards and committees of the Presbyterian and Congregational churches, the results of such consideration and conference to be reported by our boards and committees to this General Conference special committee, or its executive, together with such recommendations

or suggestions as they may deem it well to make. At the same time, this General Conference special committee expresses its conviction that such co-operation is more difficult and much less desirable than organic union, which, no provisional arrangements ought to be permitted to delay.

### Ready for Overtures.

"That we direct the executive of this General Conference special committee to receive any information or overtures that may be presented by the negotiating churches respecting further steps looking in the direction of union, and to take such action as may be deemed desirable under the provision of discipline and the authority of the General Conference."

"That the executive of this General Conference special committee be authorized, in conjunction with the union committees of the other negotiating churches, to provide for the oversight of union, or negotiations already existing, or that may be formed, but not organically connected with any of the three churches."

In reply to the action in this matter of the Canada Conference of the Evangelical Association, the committee expressed gratitude for the furtherance of the proceedings and stated that the Methodists were ready to resume them at any time when that body should indicate a desire to do so.

### SPLIT OVER TYPHOID VACCINE.

Apt to Give Typhoid to Those Treated.

Prof. Metchnikoff has started another rumour in the medical world. The famous advocate of sour milk as a preventive of old age recently lent the high authority of his name to a method of vaccination against typhoid fever, in which the living microbes of the disease are injected into human beings.

This was discussed at a recent meeting of the Paris Academy of Medicine, to which an extraordinarily large crowd of physicians was attracted by the title of the principal paper: "Note Upon 5,000 Cases of Anti-Typhoid Vaccination," by Capt. Vincent, of the Val-de-Grace Military Medical School. Capt. Vincent is the inventor of the common anti-typhoid vaccine, now used in almost all the armies of the civilized world. His vaccine is made from the dead bacilli of typhoid, sterilized, and possessing all the virtues of a living vaccine without its dangers. He pointed out that Prof. Metchnikoff's vaccine possesses the grave danger of giving real typhoid to him who is seeking immunity therefrom, and in addition is very likely to create disease, bear contagion about and communicate it to others.

After Capt. Vincent has described the universal success of his method, Prof. Chantemesse, whose authority ranks with that of Prof. Metchnikoff, says:

"Never, under any circumstances would I inject the living bacilli of typhoid under the pretext of vaccination. I shall never consent to follow a method that may be murderous."

Capt. Vincent's method of anti-typhoid vaccination received its most thorough test in Algeria and Morocco, where it virtually rendered the French army immune from that disease. It is used by the American Army and the National Guard of many states, and there is not much likelihood of Metchnikoff's system replacing it.

W. P. Frith, of Newmarket, ran his auto into a freight train on Thursday. He saved his life, but will have to buy a new auto.

Mary Weidenfeller was born, on Wednesday, in a moving van in New York.

**SKIRT RUFFLES AT THE HEIGHT OF FASHION NOW.**  
One of the lovely little gray frocks of the season is pictured here, the material being gray and white striped marquisette over white silk. The ruffles on the skirt are made of black net over white net, which produces a soft gray tone, and the draped fichu and cuffs are of the white net with narrow frills of lace. The smart velvet sash is embroidered in gray and very pale salmon pink—the only touch of color in the costume, for the lace has a gray leather and the boots are of gray satin with glass buttons.

or suggestions as they may deem it well to make. At the same time, this General Conference special committee expresses its conviction that such co-operation is more difficult and much less desirable than organic union, which, no provisional arrangements ought to be permitted to delay.

**FOUR YOUTHS JAILED.**  
Charged With Thefts of Boots From G.T.R. Car.  
Belleville, July 19.—Four young men are in the county jail awaiting trial here charged with robbery of G.T.R. cars at Trenton. It is alleged they stole thirty pairs of boots consigned to a Trenton firm. The accused are J. Collins, aged twenty-seven; Patrick Riley, twenty-seven; Joseph Douglas, fifteen, and Robert Sparks, nineteen. Charles Miles is being held by the authorities as a material witness.

**Prince Albert Growing.**  
Saskatoon, Sask., July 19.—Crops around Prince Albert are in fine condition. The straw is short, but that is preferred on a heavy soil no more is required. Warm weather will bring harvesting in four weeks. Nights are cool owing to heavy rains and frost is not feared at present.  
Prince Albert has 8,000 people and is growing steadily. It has the C.N.R. and is waiting for the G.T.P. and C.P.R. Damming the North Saskatchewan will give cheap power. The town is compactly built on the river bank; but the total area exceeds six square miles. Real estate speculators are better left to themselves. Twenty districts are being granted daily in homesteads, mostly to foreigners. Little interest is shown in provincial politics.

**Kill Flies by Millions.**  
Norfolk, Va., July 19.—The Norfolk fly-killing contest to date shows a total of 6,627,000 dead flies turned in for those competing for the prize. The rat killing contest is still on, with the health department paying five cents for each dead rat.

Sometimes we strenuously object to the way that others see us.
