R. WALDRON

CROSSING THE LAKE

HYDRO AEROPLANE MAY TOUCH AT KINGSTON.

Arrangements Being Made for Walter E. Johnson to Make Trip—Buffalo Will be Starting Point—Direct Route Has Not Yet Been Decided Upon.

Information has been received in the city to the effect that Thomas Bros., mechanical engineers and designers, and builders of hydro-aeroplanes, of Bath, N.Y., are at present making arrangements for a trip to be made across Lake Ontario, by Walter E. Johnson, one of the most skilled bird men, and arrangements may be made for Johnson to make a stop at Kingston. The details for the trip are now being arranged. Buffalo will be the starting place for the trip and the aeroplane will pass over Grand Island, and over the Falls, then covering Lake Ontario. From the mouth of the river there are two routes which can be taken, one following the southern shore of Lake Ontario, and the other along the northern shore.

Arrangements may be made for the aeroplane to stop at Kingston, and should it be so arranged should prove quite an attraction.

FLY-KILLING MIXTURE

Was Found to be Cause of Copulant.

Waterbury, N.Y., Aug. 6.—A fly-killing preparation, which a farmer, supplying milk to this city, has been using, has been found by Dr. Frank J. Loomis, city meat and milk inspector, to have been the cause of a disagreeable odor which made the milk unfit for use. The cows were sprayed with the mixture. It was at first thought that something had found its way into the milk and the state and cans were subjected to a rigid inspection, but without success. It was thought that possibly the spraying had caused the trouble. The spraying was stopped and the milk was found to be all right.

The prisoners are Frank Schwab, Thomas Gleason and John Gleason, white, and Howard Herring, colored. The arrests were made at Brooklyn, a suburb of Baltimore.

INCLINED TO SELL OFF

In Prominent Stocks on Toronto and Montreal Markets.

Toronto, Aug. 6.—Both New York and London stock markets were inclined to sell off in many prominent stocks on small declines, to-day, and Toronto and Montreal rather followed suit. This was notably shown in Winnipeg Electric, which sold off in 22 1/2 this morning, following the depression in Montreal yesterday. Brazilian stocks were rather inactive. Mining markets are firm, Hollinger, McKinley & Temiskaming showing slight gains.

THE FIRST SESSION

OF THE BULL MOOSE PARTY AT CHICAGO.

The Convention Like a Love Feast—It Opened With Speeches and the Waving of Red-Bandanas.

Chicago, Aug. 6.—The first session of the first convention of the new National Progressive party, of which Theodore Roosevelt is sponsor, was held in the Coliseum, yesterday, and while the setting was attended by all of the usual ceremonial and paraphernalia of a national political gathering, the actual proceedings were suggestive of a love feast.

Not a dissenting voice was raised during the session. The question of negro representation from the south had caused friction earlier in the day in the national committee, but there was no echo of this fight on the floor of the convention. The delegates were at times explosive in their enthusiasm.

Many of the state delegations came into the hall singing and shouting in their delight at the birth of the new party and three hours later left the building in the same happy frame of mind.

Although green-hands were supposed to be at the helm, the machinery of the convention worked smoothly and efficiently. There was no roll call of delegates, but the delegate section of the floor, arranged in the same manner as at the republican national convention a few weeks ago, and accommodating nearly 1,000 people, was entirely filled. The alternate section also had its full quota.

Although the negro delegate question loomed up now and again like a huge black spectre, threatening to disorganize things, the great event of to-day at the progressive third party convention was the speech of Theodore Roosevelt, founder and leader of the party.

The convention hall was packed when Col Roosevelt rose to speak. For a long time he was unable to proceed as cheer after cheer greeted him. Roosevelt strongly denounced the republican and democratic parties as being boss-ridden and privilege-controlled. He declared against all blanket reductions in the tariff, and reciprocity agreements with other countries, and said that changes should be made only schedule by schedule. He favored building up the navy till agreements among the nations made disarmament possible. "I believe," said Roosevelt, "that if we can wake the people up to what this light really means, we shall surely win."

Enough of Machinery Now.

OLIVER CHILLEN.

The intimation that a federal department of medicine is necessary to secure legislation to protect rivers and streams from sewage contamination is an absurd one. The government could pass such legislation as advocated by Senator Belmont without any further delay if it is desired, and thus co-operate with the Ontario government in this matter. A federal department of medicine, with a medical practitioner at its head and a corps of medical men in charge, would not be necessary to secure such legislation nor to enforce it when enacted. And anyway why not inoculate the rivers with sewage serum and thus protect them from further contamination!

Old Leeds Resident Dead.

Mrs. Berney and a grown-up family survive. The deceased was a cousin of James Berney, Kingston.
