

NEWS OF THE WORLD

THE LATEST THINGS GIVEN IN BRIEF FORM.

The Whig's Condensation of the News of the Day from Telegraph Service and Newspaper Exchanges.

Sunshine Park, the \$20,000 site for the new Roman Catholic Seminary at London, Eng., was donated to Bishop Fallon by Phillips Pockock.

John White, Norwood, fifty-eight years old, was instantly killed by a Canadian Pacific westbound through express while crossing the track.

High Taylor, elevator man, Toronto, held for manslaughter, in connection with the death of a man who fell out of his elevator and was killed.

In honor of the celebration next year of the twenty-fifth anniversary of the Kaiser's accession to the throne, new coins, both in gold and silver, will be struck.

Forage poisoning, and not cerebral meningitis, is the disease that has caused the death of thousands of horses in Kansas recently. This is indicated by results obtained by the research laboratory of the Kansas University.

Libelous circulars issued against Colonel Roosevelt at the time of his visit at Portland, Oregon, are in the hands of the grand jury which is investigating the facts. The circular is said to come under the statute against printing of indecent and obscene articles.

Death at Cannifton. Cannifton, Sept. 17.—The monthly meeting of the W.M.S. was held at the home of Mrs. Thomas Smith, on Thursday. Mrs. Harry Roblin passed away at her home last week after a short illness.

To Get White Swan Yeast Cakes. If you can't get White Swan Yeast Cakes from your grocer, send your name and address and we'll send you a sample of White Swan Yeast Cakes and tell what grocer in your town carries it.

Perished in Rapids. Edmonton, Alta., Sept. 18.—E. I. Hague, mining engineer, states that fifty lives have been lost this year in the rapids on the Fraser river between mile fifty-two on the U.T.P. grade and Fort George. About twenty-five bodies were recovered.

To Be Rushed to Completion. St. Catharines, Ont., Sept. 18.—Superintendent J. L. Weller has issued a statement to the effect that construction work on the new Welland ship canal will commence early next summer and will occupy five years in building. The cost will be about \$50,000,000.

Christy's Buckle's. Scott's Health's world-famed hair oil had in Kingston only at Campbell Bros., the big hat dealers.

Mrs. John Maugher, Smith's Falls, announces the engagement of her youngest daughter, Elizabeth Laura, to Garnet John Cheley, manager of the Bank of Ottawa, Ottawa. The marriage will take place on September 26th.

All bicycle sundries are reduced in price. Bicycle covers, Dunlop, and saddle bags, from \$1.50 to \$3 each, at H. Milne's, Bagot street.

A pretty wedding was solemnized in Toledo on Sept. 17th, when Miss Catherine Ann Dempsey, the youngest daughter of Mr. and Mrs. James Dempsey, of that place, was united in marriage to John J. Salmon, Smith's Falls.

See Best's special bargain list for Friday and Saturday. After being engaged twenty years, Robert Paine and Emily Greco, of Northamptonshire, Eng., were married. They wedded because the bride had no nurse her invalid father, now dead.

Mrs. L. G. G. It is not necessary that your face reflect your age. You could easily have a much finer, clearer, smoother and more youthful complexion if you quit using powder and tried a good lotion. Eucalyptus, four ounces spermax in a half-pint hot water or witch hazel and add two teaspoonfuls glycerine. Apply this to your face, neck and arms, and it will impart a soft, rosy glow. It will remove that shiny, greasy look. This inexpensive lotion will not rub off like powder, and is very beneficial in preventing and removing freckles and skin eruptions. It is a wonderful beautifier. You can get anything I recommend at almost any drug store.

Weak Eyes? Wearing glasses is not likely to help your weak, dull, inflamed eyes. What you need is a good strengthening eye tonic. The next time you go to a drug store get an ounce of erythrol and dissolve it in a pint of water. Drop a few drops of this in each eye several times a day. You will be surprised how soon it will give you relief. It will not hurt or burn your eyes, and it is a really reliable tonic for any one to use who has eye troubles. It is splendid for treating watery, expressionless eyes or granulated lids. It makes the eyes bright and sparkling.

H. K. I would advise you to seek bright light before bedtime. You may not be sick, but that you feel tired, nervous, and irritable. Try this home-made blood purifier and system-tonic. Dissolve in one-half pint of alcohol rock whiskey, and add one-half cup of water. Take a tablespoonful before each meal. This remedy should tone up your system and build up your strength. It also gives

MORLEY AND JOURNALISM.

He Has Critics in Make Regarding the M. J. Press. What Lord Morley called "a remarkable gathering" met at the Hotel Cecil recently, when Sir Edward Cook w...

Journalists of all schools of thought gathered under the chairmanship of Lord Morley on whose right hand sat the guest of the evening and on whose left was Viscount Liner.

In the course of his speech proposing the health of Sir Edward Cook, Lord Morley said: "I met Ruskin once, and then my idol was Mill. I need hardly say that I never met Ruskin again."

"In these days," said Lord Morley, "the narrator, as apart from the leader-writer or publicist, has grown into enormous prominence. That is a very delicate subject for me to touch upon."

"It is a question whether the news editor is or is not making an advance on the writer of leading articles. And I would suggest that what we call the 'am-' of the age—whether some of it does not arise from the flaming and garish colors, from the emphasis, from the Brobdignagian type of kinds in which our news is displayed."

May it not be that the tremendous mechanical improvement in news production are in themselves responsible for some of this? Some of us, however, in these days of gramophones and megaphones, still reserve our admiration for Beethoven and Mozart.

"Fletcher of Saltoun," once talked about making the ballads of the people. I am sometimes tempted to say I don't mind who writes the leading article if you will give me full control of the black type and the big headlines.

We are all living in times of enormous difficulty. I do not care what party you belong to but everybody knows that if every Chancellor of Europe there are misgivings as to the future. One cause of this difficulty I may say the main cause—arises from the press.

The prime duty of the press all over Europe is to abate, assuage, and minimize, and so far as we can, remove international susceptibilities, instead of warming these hateful things into a hateful life.

A Quaint Epitaph. The following quaint epitaph is to be found in Nawahaven Churchyard: To the Memory of Thomas Tipper who departed this life May 14 1786 Aged 54 years

Reader with kind regards this grave survey Nor heedless pass where Tipper's ashes lay Honest he was ingenious blunt and kind And dared do what few dare do speak his mind

Philosophy & history well he knew Was versed in physics & in surgery too The best old Stingo he both brewed and sold Nor did one knavish act to get his gold

He played through life a varied comic part And knew immortal Hudibras by heart Reader in real truth such was the man Be better wiser laugh more if you can.

Nestor of the Commons. The home rule debates have brought to the front a remarkable personality in Mr. Samuel Young, the member for Glasgow. Not that the Nestor of Parliament needs any introduction to the House of Commons, but he so seldom obtrudes on public notice that he is apt to be eclipsed by more loquacious members.

Mr. Young was born near Belfast in 1822, and he has enjoyed the unusual distinction of having lived through the reigns of five monarchs. He did not embark on a Parliamentary career until he had attained his three-score years and ten, and he was successful at his first election, defeating the United Liberal party by no less a majority than 3,000.

Though he has attained the ripe old age of ninety, Mr. Young has the buoyancy of youth. He is neither a teetotaler nor a non-smoker, and he laughs at the maxims which are supposed to conduce to old age.

Pinero's Art. Sir Arthur Wing Pinero, whose clever comedy "The Mind the Painter" is still drawing large London audiences, is recognized both in this country and on the continent as one of our greatest playwrights. In his early days he was an actor—a fact that explains his wonderful mastery of stage-craft.

Sir Arthur Pinero has made a fortune by his pen, and his plays have been produced in all parts of the globe. Such masterpieces as "Sweet Lavender," "The Gay Lord Quex," "The Second Mrs. Tanqueray," and "His House in Order," are familiar to millions of playgoers, and as Sir Arthur Pinero is still in the fifties, other masterpieces may be expected from his pen.

Simplified Spelling in Australia. Simplified spelling is progressing in Australia. The education department of Victoria has issued a circular to teachers embodying a list of words that should be taught in future as "nu spell" principles. The "a" is to be dropped out of all such words as "honour" and "favour." Plough is to become "plow" and centre is to be changed into "center."

Passenger Balloons. Accents of passenger carrying balloons were first made in England in 1784.

Mr. and Mrs. W. H. Kelly, Ottawa, announce the engagement of their only daughter, Olive Grace, to M. Harold Foster, Ottawa, son of Mrs. James Foster, Brockville. The event takes place on October 24th.

A LITTLE GUNNER.

Brown Spide: Causes Consternation in a Cape Town Castle. The smallest creature ever known to become a gunner in the world came into prominence in Cape Town, South Africa, not so long ago.

All the military and civilians in Cape Town were astonished to hear the gun on one fine morning at 10.30, an hour and a half before the proper time, 12 being the usual hour for firing.

Search was made, but nothing resulted to throw any light on the extraordinary affair, although the greatest possible pains were taken to solve the mystery.

They had practically given the search up, when suddenly the news came from the officials stating that the culprit had been caught and arrested. It seems the electric current for firing the gun at the castle, by the Royal Observatory of Cape Town, and goes there by means of an instrument known as a relay that is in the central telegraph office of the station.

The distance being about 500 yards. The action of the current going through the instrument's main wires is a sort of light tongue, which is very finely set—so fine that the least little thing would affect it. This forces the current directly into what they term the time fuses, which have the power of firing the gun at the castle.

On examining the instrument one of the officials found a big brown spider inside. It appears that while having an exploring trip around the instrument the unfortunate spider must have touched this tongue sufficiently to move it and consequently it fired off the gun. The general commanding the station sent the spider to the Cape Town Museum, where he is now to be seen with a card underneath him entitling him the "Little Gunner," and giving a full account of his adventure with the Cape Town midday time gun, which proved his last adventure, however.

Guests at the Commons. The invasion of the House of Commons by women, writes "T.P." in T.P.s Weekly, has gone on increasing with almost every year. I remember the smile of incredulity which I heard from the daughter of a member, in the year 1880, that there was a room in which you could venture to ask a lady to take a sandwich and a cup of tea.

Which she insisted, I went in search of this room, of the existence of which I had up to that conversation been ignorant, and, sure enough, there was such a room, but what a room! It was one of those dark, almost subterranean, chambers of which the House was then full; the furniture was scanty and squalid; and it reveals the attitude of the House at that time to the cause of women that this room was given up to them and, at the same time, to the messengers and attendants of the House. The ladies, like the musician of an older epoch, were put into the servants' hall.

An Invisible Airship Invented. Baron Adam Roenne, a well-known airship and naval engineer, has taken out a patent in England for an invisible airship. Invisibility is to be achieved by making the outer case or envelope any translucent, together with the interior, and the airship will be able to receive a high polish, which will be permanently maintained by means of a covering of transparent varnish. The outer cover will thus, to all intents, be converted into a mirror, and the invisibility that invisibility can be achieved by reflection.

The baron claims that there will be no recurring shade shown at the bottom of the keel, as it is proposed that the latter shall taper to a point. The airship will then always take the color of the surrounding elements, and though larger than the biggest liner, will be invisible at any height above twenty-five hundred feet. Special silencing devices are proposed for the engines.

Record Apple Shipments. Complete Canadian statistics of the season's export of apples and their points of destination, together with comparisons for each season running back to 1880-81, have been compiled. A striking feature is the record made by Halifax, N.S. That port, in the season of 1911-12, exported almost as much as did New York, Boston and Portland combined. Never before in its history had it come anywhere near exporting such a quantity of apples, the nearest approach being made in 1909-10, when the Nova Scotia shipments reached 622,243 barrels.

An Imprisoned Tailor Strikes. The latest Australian strike is one of the Gilbertian order. A prisoner in Fremantle prison, a tailor by trade, refused to work on the ground that it would be contrary to his principles as a trade unionist. He sent a letter to the Tailors' Union officially notifying it of his action, but that body expressed neither sympathy nor disapproval, preferring silence.

Population of England. The census of England and Wales for 1911, the first volume of a detailed report of which is just completed, shows a total population of 36,770,402, with 1,379,278 more females than males. The density of population is 618 to the square mile. It is, of course, the most dense in London, where the population is 35,000 to the square mile.

On Wednesday, Miss Pearl Astline, Belleville, was united in marriage to Charles Edward Patterson, Toronto. Her bridesmaids were Misses Edna and Hannah Winsor, Brockville, and Misses Edna and Sarah Dutton, were married in Brockville on Thursday.

When your hair brushes out your hair is as sensitive as your skin— even more so. It stands up under heavy hats, cutting frays, and diseases of the scalp, etc.—But there is a limit.

For Your Horses. If you want your horse and rig well looked after, but up at Kingston Repository. Board reasonable by day, week or month.

Health and Beauty Hints

By Mrs. Mae Martyn. It is right that the patrons of your beauty parlors should object to shampooing made from soap on account of the great danger to the scalp arising from the lather of their hair.

Grace: No, I know it doesn't do your peace of mind when you are conscious that you are getting so fat that your dress is continually gaping in the back and you fear the constant strain of it pressing too much for the buttons.

Jeannie P. H.: Some sage dressings are beneficial to the scalp, but never recommend them on account of the danger of staining or discoloring the hair. If you want a good, dependable remedy for dandruff, itching scalp and falling hair, try an ounce of quinine dissolved in one-half pint of alcohol (not whiskey) and add one-half pint water. This will put your hair and scalp in a healthy condition.

Madge: For your hollow cheeks and wrinkled face I recommend frequent use of a good granulated complexion cream. It also brings brightening by stirring together one ounce of cream, one-half ounce of glycerine and one-half pint cold water, allowing to stand over night, you will have an extra fine complexion cream. This is also good for massaging and it will clear up your skin, removing all dirt from the pores and soon you will find your complexion smooth, fresh-looking and uncrinkled.

Mary B.: Applying a Saltonne paste to the hairy surface for two or three minutes will remove every trace of hair from your arms. To prepare, mix enough powdered saltonne and water to cover the hairy part with it. After it is removed the skin should be washed carefully. This method is unailing and is not injurious to the most sensitive skin.
