Attached is one of the best Job Printing Offices in Canada; rapid, stylish, and cheap work; nine improved presses.

THE BRITISH WHIG PUBLISHING COMPANY LIMITED

J. G. Elliott, President, Lenora A. Gault, Sec.-Treas.

TORONTO OFFICE.—Suite 19 and 20 Queen City Chambers, 23 Church Street, Toronto. H. E. Smallpiece, J.P., representative.

WIRES IN THE CONDUITS.

The Whig recalls the fact that the legislature anticipated the wants or desires of the municipalities and provided by law for the placing of the telegraph, telephone, and electric light wires under ground. The Whig cannot at the moment quote from the law—a copy of the bill which was laid before the house has been for the time being mislaid—but the remembrance of it is that when the town or city has provided the conduits the companies can be compelled to move the poles and the wires.

Now here is the situation. Several of the streets are about to be paved. The surface of Clarence and Brock streets is now being disturbed. On both the poles and the wires they carry are very conspicuous and unsightly. It could hardly be expected that the streets would be torn up in order to force the wires underground, but when the streets are torn up, as a preliminary to the paving of them, it seems remarkable that the council has not taken advantage of the new law in order to force a necessary reform.

HUNTING THE UNDESIRABLE.

William A. Ferguson, formerly a citizen of Canada; or employed for a time in this country, shot and killed at Detroit, a Canadian immigration officer. Ferguson was refused a landing in Windsor. His offence—he was an undesirable. An American paper makes much of a remark by Ferguson, that he was treated as a dog, and the excuse must have had some weight with the presiding judge at Detroit since the sentence he imposed was life imprisonment.

The tragedy was one for which there was no justification. It had led to a warm discussion upon the merits or demerits of the immigration laws. There is some ground for excluding from any country—the United States as well as Canada—the criminal classes, the thugs, thieves, and toughs whose presence suggests evil. But there is no ground for the exactions of the government officials, and for the annoyance and irritation to which they sometimes submit travellers on trains and boats.

THE MOVEMENT IS GROWING.

The greatest interest attaches to the study of City Government by Commission, which a Canadian deputation is making under the authority of the government of British Columbia. It is composed of three men—W. H. Keary, for some years mayor of New Westminster; H. A. MacLean, K.C., and A. G. Ball, of Vancouver; with J. C. Martin, as secretary.

It was appointed on appeals from Vancouver and Victoria for government by commission. They cannot have it without special legislation and the British Columbia government took the precaution to send out men for enquiry before committing itself to legislation of a radical character. The committee or delegation has visited many places in the United States and Canada, where there is government by commission, and government by council with or without the aids of boards of control. The committee is in the east, with St. John, N.B., as the Mecca, and for the purpose of securing the information which its new commission can afford.

EDITORIAL NOTES.

A Toronto clergyman—the chaplain of a regiment—wants drill made compulsory in the schools and colleges. He had better read about what is going on in Australia in this respect and go slow.

Making a municipality liable for the errors of its aldermen—making it pay for the losses by typhoid—is not a punishment that fits the offence. If aldermen were liable for neglect, or duty there would be something doing.

The single tax is attracting attention in England and is advocated by leading liberals as a change from the present system of taxation. In time Sir James Whitney may be moved to change his mind with regard to this subject.

It is no defence that the sleeping cars cannot be improved because the Pullman company is against it. The railway companies can build their own cars so that there will be something like seclusion and comfort in the use of the berths.

A magistrate's court has decided that it is the duty of a wife to darn her husband's socks and mend his shirts, but he must see that she is provided with good food and clothes. A sound proposition, and made emphatic by the declaration of the court.

and for the annoyance and irritation to which they sometimes submit travellers on trains and boats. The Whig has seen, on both sides of the line dividing Canada and the United States, officers of the government question people in a very pertinent way. The law under which they act is not known to some people, and when they are questioned in a seemingly offensive way they resent it. Decent, well-behaved and well-meaning people can usually be detected, and they should be spared some of the humiliation which is put upon them.

The Whig is inclined to agree with the Toronto Star when it says that the governments of Canada and the United States should have officers to protect travellers and to protect them occasionally from insect, not officers who can make a nuisance of themselves and bring odium on the governments they represent.

Two distinct reforms have been effected—the liquor licenses have been reduced from twenty-three to eighteen, and the sanitary conditions of the city have been so much improved that the mortality from typhoid fever has dropped from 31 per 1,000 to 2.

The report of the British Columbia commission will be awaited with profound interest. This is the first provincial movement to study a great issue at close range and to make a statement upon which legislation may be founded. The importance of it cannot be too highly estimated.

At a church rally in St. Thomas the mayor talked against the present styles of the women and the tendency of some of them to dress so that they look like interrogation marks. What awful rot some men will talk on special occasions!

Zelig's death in New York is said to be another murder, and in the interest of the system. The man held for the crime may some of these days—when he reviews the third degree—tell what he knows, and make another sensation.

The Brantford Expositor thinks Kingston would grow if our people were only "weaned from government pap." What pap is being distributed in Kingston more than in Brantford? Perhaps our contemporary can, with his searchlight, reveal something that has not been apparent before.

A writer in the London Daily News and Leader says: "In seven years which ended in 1911, Canadian issues in London, public and private, amounted to \$860,000,000. Last year the aggregate was about \$225,000,000 and for the first six months of the current year nearly \$110,000,000," which suggests that Canada is going too rapidly into debt and incurring liabilities it may not be able to pay. It is certainly going some financially.

SPIRIT OF THE PRESS

So it Seems.

Another wreck on New Haven rail road, "Eternity all change," is a station call often made on some roads.

How All the While.

Mr. Asquith announces that he will not bow to Sir Edward Carson. He means, of course, the knee. These gentlemen bow their heads to each other right along, no matter how hard the words they use.

Their Real Mission.

The Industrial Workers of the World are travelling over the world persuading people not to work. It's up to the Amalgamated Troups of the World to meet this with a campaign for greater industry.

Dynamite in Any Case.

With trade unionists on trial in Indiana on a charge of dynamiting employers and capitalists in Massachusetts on trial charged with dynamiting unionists, the only inference is that this method of settling disputes is in equal favor with employers and employed across the border.

Why the Change.

A few months ago the shooting of big Jack Zelig would have demanded only a paragraph in the New York papers, and no outside mention what ever. Now the whole world is invited to lament the sudden taking off of one of the most gifted thugs in the United States.

Reynoldston Reports.

Reynoldston, Oct. 8.—Potato digging is the order of the day and good crops are reported. W. Freeman did some work here with his comb-horn last week. Mrs. A. Reynolds' wedding bee, on Saturday, was well attended. School is progressing under the management of Miss A. Sigsworth, Hartington. Rev. Mr. and Mrs. Zubrig took dinner at P. Reynolds' on Sunday. Miss M. Snyder is visiting in Kingston. D. Leslie and Miss M. Leslie, also W. Wagar, at J. Jeffrey's. Mrs. S. Sigsworth and Mrs. V. and L. Sigsworth, Pleasant Valley, and B. Genge, at R. Botting's. Miss B. Babcock and A. McLeod, Echo Lake, at J. Babcock's. Mr. and Mrs. F. Moore, at W. Shepherd's. Mr. and Mrs. A. Reynolds and Miss Godfrey, at Echo Lake. Mr. and Mrs. G. Bush, Frerphase, at A. Bush's. Mrs. P. Botting intends leaving to-day for Calabogie to visit relatives.

Rich Red Blood.

The blood is the source of all mental, muscular and nervous power. If the blood is weak—you are weak. Have rich red blood and you will not only have greater strength, but you will be able to resist disease. The best remedy to tone up health and enrich the blood is Wade's Iron Tonic Pills (Laxative). They are a great nerve strengthener and blood maker. In boxes, 25c, at McLeod's Drug Store, 53 Brock street, one door above King street. Money back if not satisfactory.

Are Doing Well.

At Viscount, Sask., are Messrs. Frank Goyette, Joseph Goyette, and Thomas Tallon, all former Kingstonians and conducting a general store there in which they are doing well. Mr. and Mrs. Samuel Potter are other former Kingstonians who are doing well at Plunkett, Saskatchewan.

Corns Will Go.

You have no corns that cannot be thoroughly removed in a few days with Peck's Corn Salve. The remedy does not fail. In boxes, 15c, at McLeod's Drug Store, 53 Brock street, one door above King street.

Mr. and Mrs. E. R. Williams, Selby, on Sept. 17th, celebrated their fiftieth wedding anniversary. They entertained at dinner, sixty guests being present. Mr. and Mrs. Williams received many useful and beautiful gifts.

There may be just as good fish in the sea as ever came out of it, but every girl expects to yank a goldfish from the sea of matrimony. In some parts of Africa men buy their wives by the pound. In this country it is the husbands who are usually sold.

Anyway, the theory that marriages are made in heaven can't be much consolation to spinsters. We haven't much use for men who try to impress upon us that they don't have to work.

Our good intentions must be hot stuff—considering the pavements made of them. A married man has to growl occasionally just to keep from forgetting how.

The first time a girl is disappointed in love she begins to map out a career. After his fiftieth birthday a man doesn't have to pay the fiddler so often. A porous plaster will stick to a man who won't stick to his word.
