The Riordon Pulp & Paper Company, Limited, was formed of the Riordon Paper Mills, Limited (established 1859), and G. H. Perley & Co. (established 1899). The Company has 1,184 square miles of timber limits (valued at \$2,055,800) in the Province of Quebec on the Rouge River (a branch of the Ottawa River). The plants are located at Hawkesbury and Merritton, Ontario (pulp and paper), and Calumet, L'Annonciation and St. Faustine, Quebec (lumber). The total annual capacity is 37,500 tons

ST. CATBARINES

sulphite pulp, 6,000 tons ground wood pulp, 6,000 tons paper and 15,000,000 feet lumber (B.M.) Net earnings of the Company for the past three years average \$226,410, over two and one-half times interest on the present issue of bonds, despite the fact that the Calumet mill was not in operation during the greater part of 1911, as it was being rebuilt in steel and concrete. With the additions under way and the benefits to be derived from the new capital, the earnings for 1912, according to the estimate of the Managing Director, will amount to \$300,000, three and one-third times bond interest requirements.

The management of the Company has been practically continuous for the past 50 years. All the directors are either practical pulp and paper merchants or experienced lumbermen, ensuring the competent supervision of all affairs of the Company.

Of the \$2,500,000 Bonds authorized, \$1,000,000 are held in the treasury and can be issued only to the extent of two-thirds of the actual cost of extensions and additions to the fixed assets of the Company. The repayment of the entire issue, either before or at maturity, at 105, is an important feature. an appreciation of five points to purchasers at par.
