Lake, hardware merchant, of Edmonton, is visiting relatives here.

**Titchborne Resident's Death.**  
 Titchborne, Oct. 7.—A respected resident of this place in the person of William Sverdrick passed away at the family residence early Friday morning, September 20th. He had been ailing for a number of years of a complication of diseases, but it was not until the last two weeks that he was confined to his bed. He was born in Portland township sixty six years ago. In his boyhood, when the little hamlets along the Rideau were in the prime of their lumbering days, he was one of the "boys" on a sailing vessel. In 1877 he married Victoria Hamilton and had since resided on his farm in Bedford. His widow, with five children, two brothers and two sisters, survive. The children are Mrs. W. T. Whyte Brooke, Thomas, Bedford; Mrs. George Thompson, Burridge; William Bedford, and George, of Weyburn, Sask. For twenty years he was councillor and reeve of the township, where his love of improvement judiciously tempered with economy did much for the country. The good roads and solid bridges to which his special interest was directed, will long remain a monument to his memory. He was a staunch conservative and a member of the Order of Chosen Friends. His last days were much cheered, and, if possible, made more peaceful by a visit to the Sunday before his death, of his old friend, Rev. John Boyd, of Kingston and most of the members of the Presbyterian congregation in his body. Deceased was an elder of the church and a very regular attendant until ill health deprived him of that pleasure. After the funeral service held in the Presbyterian church here, a lengthy cortege of sympathizing friends accompanied the body to Parham where the remains were placed in the vault to await burial in the cemetery at that place.

**PREVENTS CONSUMPTION.**  
**German Recommends Corsets in Certain Circumstances.**  
 Berlin, Oct. 9.—Doctors here so bitterly assailed corsets that it is somewhat of a surprise to find two German medical men recommending them—though only, it is true, in certain circumstances.  
 Professors Felix Hirschfeld and Adolf Loewy declare they are satisfied that in the case of a person with "paralytic thorax" corsets may act as a preventive of consumption. The specific characteristics of "paralytic thorax" appear to be length and flatness of the chest. The two doctors carried out exhaustive experiments on the respiration of persons of this class, simultaneously following the movements of the diaphragm by means of Rontgen rays.  
 The result they arrived at was that, whereas the corset diminished the depth, it increased the frequency of their patient's breathing, so that the total amount of air taken into the lungs within a given time remained the same. Simultaneously, the expansion of the upper and the contraction of the lower portions of the lungs were observed.  
 For this reason the professors recommended the use of corsets to "paralytic-thorax" women who are threatened with consumption through the imperfect action of the upper pulmonary tracts. At the same time they are careful to point out that in cases where the disease has already attacked the lower portions of the lungs the corset must be repudiated as directly harmful.

**Psoriasis All Over Body**  
**Doctors Said Incurable, But Now There is No Sign of Disease, Thanks to Dr. Chase's Ointment.**

**Mde. N. Massey.**  
 Psoriasis is one of the most dreaded of itching skin diseases. It is a sort of chronic eczema. The itching it causes is almost beyond human endurance, and doctors are accustomed to give it up as incurable.  
 But there is a case that was given up and pronounced incurable. The result proves that Dr. Chase's Ointment almost works miracles in curing the worst form of itching skin disease imaginable.  
 Mrs. Nettie Massey, Concession, Ont., writes:—For five years I suffered with what three doctors called psoriasis. They could not help me, and one of them told me if anyone offered to guarantee a cure for \$50.00 to keep my money, as I could not be cured. The disease spread all over my face, eyes, on my face and head, and the itching and burning was hard to bear. I used eight boxes of Dr. Chase's Ointment, and I am glad to say I am entirely cured, not a sign of a sore to be seen. I can hardly praise this ointment enough.  
 The soothing, healing influence of Dr. Chase's Ointment is truly wonderful. Eczema, salt rheum, barber's itch, ringworm and scores of such torturing ailments are relieved at once and are certainly cured if the Ointment is used persistently. Mothers find Dr. Chase's Ointment invaluable in preventing and curing the skin troubles of babies, such as eczema, irritations of the skin and baby eczema.

then jumped, piled up on the tender and caught fire. Five passengers were burned to death and the engineer and fireman killed.  
 If the train did not take the cross-over at too high a speed, some say it did—the track is bad. In any case steel cars would have saved five people from being subjected to an agonizing death.  
 To equip the New Haven with steel passenger cars and to put at least its express tracks in good condition would cost much money. But it would not cost anything like so much as it does to buy our steamboat lines at exorbitant prices, to monopolize trolley routes in the New Haven "territory" and to fight the State of Massachusetts for an illegal and costly extinction of all railway competition in the New England field.  
 Less "eccentricity" in the safe operation of their trains and less profligacy in stifling healthy competition might make American railway management less dangerous to human life.

All things worth while come to those who wait on themselves.
