

TO REPORT CITY COUNCIL TO PROVINCIAL BOARD

For Not Acting Regarding a Water Filter.

THE BOARD OF HEALTH

FINALLY DECIDES TO TAKE THIS STEP.

The Provincial Board Will Now Send an Inspector to Investigate Kingston's Water Supply—Utilities Committee Not Agreed on a Filter.

The Board of Health, on Thursday afternoon, decided to report the City Council to the Provincial Board of Health for not furthering the scheme of the installation of a filter to ensure the purity of the drinking water of the city. Six weeks ago the local Board of Health, realizing the almost unsafe system by which the water used by the citizens was being purified (by the treatment of chlorine) recommended the installation of a filter. It instructed the City Council that if steps were not taken to promote some method to ensure pure water, in thirty days it would report to the Provincial Board of Health. The board at the time recommended a filter.

After other business had been disposed of at the meeting of the board on Thursday afternoon the chairman, Archibald Strachan, asked Ald. Bailey what the Utilities committee had done regarding the installation of the filter. Ald. Bailey was unable to report anything definite, and as far as the chairman and other members of the board could hear, Ald. Rigney and his committee had not, as a body, seriously considered the matter. Ald. Bailey intimated, however, that the Utilities committee was not a unit regarding filtration being the best plan of purifying the water, and stated that he now, personally, from advice received, was "contrary-minded". Dr. A. B. B. Williamson, medical health officer, stated that the present system of chlorine treatment was only temporary at best. It removed solid material and organic matter, with the exception of about two per cent., but that small amount would carry thousands of germs, disastrous to the health of the community. Several members of the board went into the advantages and disadvantages of two filters that had been under consideration.

The chairman and J. B. McLeod declared that they believed citizens in general realized the situation, and were in favor of a filter. One of the members explained the position of Prof. W. T. Connell, the Queen's bacteriologist, on the question. It was that the city should have a system for the disposal of its sewage, as he believed the contamination of the water came from this source. As a filter will only eliminate contamination up to a certain degree he suggested a sewage disposal plant, which would, of course, be a very expensive undertaking. Mayor Hoag, who was in attendance, advised a few days further delay before the city council was reported to Toronto. But the chairman, with H. H. Taylor and other members of the board, was in no mood to let the matter rest any longer. The Utilities committee had had two weeks grace now, and in the report the responsibility would be lifted from the local Board of Health. The provincial board will likely send an inspector to the city to investigate.

The result has been a fine of \$250 for illegal cutting and the confiscation of the ties. Sold by public auction, these were bought in by the contractor at \$2.50 a thousand. This will bring the province in about \$15,000.

As to the direct cause of death the investigation will no doubt determine it. THE DESPERATE TACTICS OF THE ROBLIN FORCES

In Placing Richardson Workers Under Arrest.

JUSTICE IS OUTRAGED

BY POLITICAL MENIALS OF MANTOBA PREMIER.

Donald Walkinshaw, a Prominent Insurance Man, Taken Into Custody—His Friends are Refused Permission to Confer With Him.

Winnipeg, Oct. 11.—Justice has again been outraged by the political menials of Sir Rodmond Roblin, in the arrest of Donald Walkinshaw. This is the second arrest that has been made this week, and the liberal and independent workers supporting R. L. Richardson in the Macdonald bye-election campaign fear that Sir Rodmond will turn his servants loose with orders to control as many of Mr. Richardson's supporters as possible, so that they may be put out of the way until after election day, Saturday. The story of Mr. Walkinshaw's arrest was briefly related by E. J. McMurray, who has been retained to defend him. Mr. Walkinshaw is western manager of the Western Empire and Accident Insurance company, with head offices in this city and recently came to the west from Toronto, having lived for a time at Cobalt. He is accredited here with the highest character.

A progressive in politics, Mr. Walkinshaw volunteered his services for two weeks in the campaign for wider markets and freer trade with Great Britain. He was sent to Rathwell to canvass about ten days ago, and was arrested on a charge of intimidating electors.

Mr. Walkinshaw was brought to Winnipeg on the Souris train. His friends met him at the station; but Detective Charles A. C. Ross peremptorily refused to allow him to speak to his friends. They managed, however, to arrange with him to try to secure bail and to go to counsel.

Mr. McMurray, his counsel, made an application at the jail for permission to see his client, which was refused, and it was discovered that Mr. Walkinshaw had been rushed off to Portage la Prairie, the evident design being to make it impossible for habeas corpus proceedings to be taken in this city.

Mr. McMurray, who, with a host of other citizens of this city, is extreme indignant at the abuses of power which have been exercised this week, concluded his remarks with the following words: "It is a disgrace, a crying shame, and we, as citizens of a free and British country, should resent it. If the law, in the hands of political minions, fails to protect us, then we must become a law unto ourselves and be willing to die. It is our duty, that we may hand on to our children the traditions of Britain unsoiled by tactics of political buccaners."

The Telegram says that J. J. Sullivan, arrested at Carman a few days ago on a charge of infractions of the election act, was released yesterday from custody on condition that he return to Saskatchewan and not take further part in the election in Macdonald.

The constituency of Macdonald has always been regarded as a conservative stronghold, but since responsibility became an issue in the west, party lines, especially in the rural districts, have been altered very materially, with the general result that the conservatives have lost and the liberals have gained.
