**THE FIRST GRAY**  
**HAIR SIGN OF AGE**

Easy Way to Preserve Natural Color of the Hair and Make it Grow.

A harmless remedy, made from common garden sage, quickly restores gray hair to natural color. The care of the hair, to prevent it from losing its color and lustre, is just as important as to care for teeth to keep them from discoloring. Why spend money for cosmetics and creams to improve the complexion and yet neglect your hair, when gray hair is even more conspicuous and suggestive of age than wrinkles or a poor complexion? Of the two, it is easier to preserve the natural color and beauty of the hair than it is to have a good complexion.

All that is necessary is the occasional use of Wych's Sage and Sulphur Hair Remedy, a preparation of common garden Sage and Sulphur, combined with other valuable remedies for dry, harsh, faded hair, dandruff, itching scalp and falling hair. After a few applications of this simple, harmless remedy, your hair will gradually be restored to its natural color, in a short time the dandruff will be removed, and your hair will no longer come out but will start to grow as Nature intended it should.

Don't neglect your hair for it goes further than anything else to make or mar your good looks. You can buy this remedy at any drug store for fifty cents a bottle, and your druggist will give you money back if you are not satisfied after using. Purchase a bottle today. You will never regret it when you realize the difference it will make in your appearance.

Agent, G. W. Mahood.

**Wych's Phospholine**  
 The Great English Remedy for Weak Eyes, Nasal Discharge, Headache, Stomach Troubles, Nervousness, General Debility, and all the ailments of a weak system. It is the best of all remedies for these ailments. It is sold by all druggists and is the only one of its kind. It is the only one that is guaranteed to cure. It is the only one that is sold in a bottle of 100 pills. It is the only one that is sold in a bottle of 100 pills. It is the only one that is sold in a bottle of 100 pills.

**THE MAN FOR MAYOR.**

The city solicitor did a kindly act when, on referring to the by-laws that are to go to the people, he said the council should thoroughly discuss them in order that in that way the people may get the enlightenment to which they are entitled. A plebiscite or referendum does not relieve the civic legislator from doing his whole duty to the city and its people.

The referendum may be overdone. Fancy the dose of by-laws which it is proposed to inflict upon the electors in the next election. The motorizing of the fire department leads the procession. Then comes the question of paving certain streets, and the re-laying of the street railway track, standard construction. It, in addition to the paving and track laying, at a cost of \$83,000, there is to be the conduit for the wires, at a cost of \$50,000

more, the sum total is likely to create a panicky feeling.

It is on this account that the council should be specific in its schemes. Its members should collect and summarize all the facts. They should point out the advantages of the improvements, and give reasons why they should be undertaken. The mayoralty candidate should lead in the debate, and to our mind the success of any one will depend upon how far he convinces the people of the merits of his platform, and the reasonableness of his arguments in support of it.

The mayoralty candidate should be a man of pronounced views. This city has entered upon a boom period. There are evidences on every side of municipal progress. The man who leads in public affairs next year must have plans of his own, and if the people like them they will give him their support.

**THE SAVING TO CANADA.**

The Whig commended, very properly, the desertion of Mr. Nickle on prison life, and its tendency, under present conditions, to become brutalized. The prison system is not corrective. It may restrain bad men, but it does not make them better, and incidentally it hurts immeasurably those who needed lifting up.

Now let us commend another word of caution from Mr. Nickle, and as a result of his examination of the immigration returns. Mr. Nickle feared that Canada, or some men in it, were more concerned about the size of the stream than about the quality. In the period between 1902 and 1912, ten years, over two millions of persons had entered this country. At ocean ports 8,500 had been detained, for special examination, and 5,600 had been deported for criminality, vagrancy, insanity, senility, mental weakness, general debility and other causes.

Many, or most of them, would have become a charge upon the country had they been allowed to remain. The question is: How did they escape detection at the port of shipment, and why should the scrutiny not be more exacting there?

On a former occasion the Whig called attention to the greater efforts which the Americans were making to protect their people from a baneful inoculation. It observes that the situation has become more intense by recent experience. The New York Bureau of Deportation reports that last year 1,383 persons were sent out of the country, and representing an element which could not be assimilated by the people. The saving by this weeding out process is said to be \$3,500,000 a year. Canada's saving by its deportation of the heterogeneous mass of whom it could make nothing must be three or four times this amount.

**KNOW WHAT'S THE MATTER.**

The Whig knows now why so many bad eggs are marketed, why both retailer and buyer are imposed upon, why an essential article of food is handled so carelessly that its condition can be no longer assured. Thriftily housewife hands out her 30c, or 40c, or 50c per dozen for eggs declared to be fresh, and finds, in the using of them, so many that must be abandoned that she feels she has a grievance, and one which should be remedied.

But that grievance begins with the producer. He does not have the best breed of fowl; he does not fit up a poultry house, which is clean, well-ventilated, and sanitary; he does not keep the nests sweet; does not remove the fertile eggs; does not keep his collection in a cool place; does not pack the eggs carefully, and get them as quickly and as directly to market as possible.

The merchant or the buyer is to blame when he does not make prompt

deliveries necessary by taking eggs in a loss-off basis, by insisting that they are the best quality, and not sold, that they are fresh and carefully packed in fillers. If, in addition, the transportation companies handled the eggs carefully, delivered them with despatch, and guarded them from heat and cold, and if the retailers handled them with a knowledge of what should be done in order to guarantee the quality, the egg market would at once improve.

The bulletin which the Department of Agriculture has issued, No. 16, entitled "The Care of the Market Egg," by W. A. Brown, B.S.A., should be in the hands of every poultry man, every merchant, every shipper, every buyer and consumer of eggs. It is a complete treatise, and an education in itself. The men who are engaged in the egg business in every district should combine and see that the bulletin is given the very widest circulation.

**MORE ABOUT THE WATER.**

The water question has entered a new phase at Ottawa. There, it will be remembered, the water was so bad last year that there were hundreds of cases of typhoid fever and preceding the enquiry into the cause, or during the enquiry, many suits for damages were instituted against the city. The claimants were inspired in this course by an observation of the city solicitor, and to the effect that in his opinion the city was liable for these damages.

In its extremity the city appealed to the provincial Board of Health, or, speaking more correctly, the provincial board, after some correspondence, assumed the responsibility of directing that the water be filtered, and at once. There was some difficulty among authorities with regard to the kind of filter, which the situation demanded. The chemical or mechanical filter was preferred. Then the greatest expert in America, or the one carrying this reputation, Allen Hazen, of New York, visited the capital and recommended the system in use in Watertown, and steps were being taken to put his views into effect.

The Free Press, with an enterprise which is to be commended, sent a staff writer to Watertown, and he has written columns which have certainly a tendency to confuse the people. The facts are these: That the Black River, properly named, runs through the city, and its water, untreated, is not good for domestic purposes. Into it the factories dump

their refuse, and some of this, from the paper mills, contains acids that cannot make the water good for the health of any one that drinks it.

The mechanical filter does its work well. The water is cleared of all impurities, and with the aid of washing soda, (to remove the reddish colour), and alum, the water, when put into the reservoir for distribution, is clear, and supposedly wholesome. Two things were learned by the newspaper man, incidentally. One is that half the people of the city are consumers of water drawn from a spring and bottled in bottles. They will not say that the water drawn from the river and treated is not good, but they take no chances and will not drink it. The other fact is that the alum or alum and soda combined, affect the water pipes, causing corrosion, so that the plumbers are kept busy making repairs. For steam purposes the city water cannot be used at all.

Here one has an expert recommending a certain kind of filter for Ottawa, like that in operation in Watertown, and a newspaper presents such an experience as startles the people and staggers them. May it not be that the conditions at Ottawa are not the same as in Watertown, and that Mr. Hazen is correct in his advice, as he ought to be, as an expert and professional man? It would be extraordinary that he would recommend something which, though costing many thousands of dollars, would not answer the purpose for which it was provided.

**EDITORIAL NOTES**

Now it is too bad that the liberals are disposed to challenge the statements of the government, even when handed out through the governor-general. But some of them ought to be challenged.

The boast of the day is that there is not a soup-house in sight. Very good. But there are a good many men still who are too lazy to work, and they make their wives toil so that they may have the soup-plate filled by others than themselves.

The solicitor-general for the United States holds that the people pay \$70,000,000 a year in postage, in order that the 30,000 publishers shall get a benefit in second-class mail. Uncle Sam is exceedingly kind to our newspaper friends.

Education in Quebec is not compulsory, but the attendance at the schools is better than in Ontario. In Quebec seventy-seven and a half per cent. of the children are in the classes. In this province the percentage is sixty-one. How is that, gentlemen?

The St. Thomas Journal knows of one man who is "a good Tory." He is Mr. Gibson, of Ingersoll, who is against the Ontario government on the bar question. Is a politician good only when he differs from his party? Is he virtuous only when he kicks against the good?

Hon. Bob Rogers has duly qualified as a member of the Ottawa government by declaring that he does not care of a thing being done in the Macdonald election of a disgraced or disreputable character. And lest he would hear anything he left the house when the opposition proceeded to uncover the case.

The members of the imperial parliament are interested in the statement which the government proposes to make on the naval question. The English mind is quite exercised over the alleged "disclosures" which were made to the Canadian ministers, and the statement asked for by the Canadian government goes before the imperial parliament.

**SPIRIT OF THE PRESS**

**Long Time to Wait.**  
 Quebec Mercury.  
 The fact that it is only four weeks till Christmas may seem short enough to the grown-up, but it is an eternity to the small boy.

**Only a Hearsay.**  
 Ottawa Journal.  
 A Kingston clergyman says the increase in drunkenness is due in part to bad liquor. But this must be hearsay. To the pure all things are pure.

**Canada's Naval Policy.**  
 Toronto Star.  
 The naval policy will mean three ships built by England and paid for by Canada. They will be at the service of Britain, but will come back to Canada when not needed there for any emergency.

**Is This the Cure?**  
 Syracuse Post-Standard.  
 A good many of the evils of our "feeble and foolish" common schools, thinks Prof. Meeker, of Princeton, can be abated by weeding out incompetent teachers and doubling the teaching force. Which reminds us that there is but one institution more frequently criticised than the schools, and that is the church.

**Enough of Her Own.**  
 Hamilton Spectator.  
 With a view to minimizing the excess of nearly 1,500,000 women, over men in the British Isles, the imperial government was ineffectually asked to lend a hand in their emigration. And quite right, too, Canada, for one, has plenty of fair dames of her own, without "bearing" the matrimonial market through extraneous efforts.

**Tabard Inn \$1.00.—"Gibson's."**  
 A. J. Fitzgerald has opened a timber limit near Marlbank and will install a saw mill. He manufactures hubs, bent goods and broom handles at Tweed.

**Red Cross cold tablets, "Gibson's."**  
 Wilson W. Bramley, Brockville, met a sad death at Morrisburg on Friday, by being crushed between a locomotive and a car. The accident happened in a fog.

**Buy Red Cross Cough Syrup.—"Gibson's."**  
 George Mason, father of the editor of the Freeport Journal, died on Tuesday last, aged eighty-two years.

**Buy Red Cross Cough Syrup.—"Gibson's."**  
 Albert Sills, near Tweed, has leased his farm to J. Thompson and will remove to Belleville.

**CHEERFUL NEWS**

**For Feeble Old People.**

As one grows old the waste of the system becomes more rapid than repair, the organs get more slowly and less effectively than in youth, the circulation is poor, the blood thin and digestion weak.

Vinol, our delicious cod liver and iron tonic without oil, is the ideal strengthener and body-builder for old folks, for it contains the very elements needed to rebuild wasting tissues and replace weakness with strength. Vinol also fortifies the system against colds and thus prevents pneumonia.

A grand niece of Alexander Hamilton over eighty years of age once remarked: "Vinol is a God-send to old people. Thanks to Vinol I have a hearty appetite, sleep soundly, feel active and well. It is the finest tonic and strength creator I have ever used."

If Vinol fails to build up the feeble, old people, and create strength, we will return your money.
