CLEVER PRESENTATION JEWELRY THIEF BUSY

OF A COMEDY BY THE QUEEN'S DRAMATIC CLUB.

At the Grand on Tuesday Evening—The Queen's Orchestra Supplied the Music.

The Queen's Dramatic Club's presentation of Bernard Shaw's four act comedy, "You Never Can Tell," last night in the Grand Opera House was well up to the standard of excellent performances given by the club in past seasons. Everything went off as was intended, and not a flaw was apparent to the large audience, which applauded the dramatic efforts of the students.

The scene of the play was laid in England in 1896, and the first act opened in a dentist's operating room in an English seaside resort on a fine August morning.

H. L. Spankie, who took the part of Valentine, the young dentist, demonstrated in an excellent way how modern methods of love-making, when brought to bear upon a lady trained along old-fashioned lines, are sure to result in success. The part of Gloria, the object of Valentine's affections, was admirably taken by Miss C. Watt. Gloria's mother, Mrs. Clandon, a respected suffragette, who despised all sentiment as weakness and who sought to train her daughter, Gloria, along the same lines, was faithfully presented by Miss "Dolly". The twins, Dolly and Philip Clandon, who take after their mother in their having no regard for anybody, and refusing to be bound by conventions, were given a life-like portrayal by Miss Gibboly and G. B. McCallum, who provided the humor of the evening. The part of Mr. Crampton, Mrs. Clandon's husband, who is reconciled to her at last after eighteen years of separation was portrayed by George Clark, in a very commendable manner.

The parts of the lawyers, Fergus Crampton and Bohim, Q.C., who seek to straighten up the family quarrels and embarrassments, were taken by P. Baldwin and R. M. Spankie, and to them nothing but praise is due for their really excellent acting. The interpreter of the play, was the watter, and the task of presenting this character fell to Chas. Girdler, who acquitted himself nobly, and in a manner which would do credit to many a professional actor.

The part of the parlor maid was filled by Miss F. Wright, that of Jo, the assistant waiter by T. D. L. Vinton and the cook by T. G. Lovell, and all three deserve credit for their work in completing what was an excellently chosen cast.

Too much praise cannot be given to Prof. Falls, of the department of public speaking, for his work in training the club, and the success of the play is in large part due to his efforts.

Between the acts lantern views depicted the activities of the Alma Mater candidates, and the cartoons were unique in their originality and humor. Mr. Shields sang a song in praise of Wats, the Science candidate for president. The candidates occupied the boxes and presented the actors with flowers at the end of the third act.

The Queen's orchestra, under the leadership of Mr. Webb, provided excellent music throughout the evening.

LAST MEETING OF THE W.C.T.U.

For the Year Was Held on Tuesday Afternoon.

A well-attended and decidedly interesting meeting was the pleasing experience of those present at the closing W.C.T.U. meeting of the year, held Tuesday afternoon, in the Y.W.C.A. parlors. A retrospect was taken of the work done in the year. The union has a much increased membership of active workers. The finances are in good condition. When the few remaining debts are met there will still be something in the treasury.

The main features of the parlor social held during November were echoes from the annual convention, and given by Mrs. William King, were an inspiration to still greater efforts for the future. This was followed by a visit from the missionary, Miss Sproule, who has given such consecrated service to evangelizing and temperance work in the lumber camps of Muskoka for nearly fourteen years.

Plans were made to hold another parlor social some time in January. The mothers' meetings have been a success so far, and it is proposed that they close with a supper, an interesting programme, including stereopticon views, etc., on Friday evening of this week. On the approaching Christmas, efforts will be put forth to give cheer to many who may be likely to appreciate it.—COM.

THE HALLS OF QUEEN'S.

Inter-Year and Inter-Faculty Athletic Contests.

The political science club will be addressed on Monday, Dec. 9th, on "Mines and Mine Promotion," by J. C. Murray B.A., B.Sc., Toronto.

A meeting of Year '16 Arts was held on Monday. The general sentiment of the year was against the adoption of the "Q" pin for use by all the students. After the business an excellent programme was provided. Miss F. Halliday rendered a very acceptable vocal solo. Miss Johnston delighted the audience by an excellent violin selection, in which she was accompanied by Miss F. Pais, and Miss Caldwell gave a piano solo.

In connection with the Boxing, Fencing and Wrestling Club's features, there will be inter-year contests, and inter-faculty contests. In this way it is hoped to bring out much new material, as well as increasing the interest of the students in this worthy branch of college activity.

Foreign Fete.

Come to the Foreign Fete and see the "Coke" church, Thursday night, and leave your orders for Christmas goods, with the Scotch and Irish lassies and Japanese maidens. Afternoon free. Concert in evening. Admission 15c.

Wonderful Skin and Wrinkle Remover

(From American Home Monthly.)

The method of removing bad complexion by absorption seems to have come into general use in this country. Ordinary mercurized wax, applied nightly like cold cream and erased mornings with warm water, gradually softens the faded or discolored outer film skin in almost invisible particles. Soon there's a brand new complexion, formed by the younger, healthier under-skin. No cosmetic or artificial treatment can possibly produce a complexion of such radiant, youthful loveliness. Druggists all have mercurized wax; it is seldom that more than one ounce is necessary.

Thousands have also reported great success with the famous saxolite wrinkle-removing formula. One-ounce of pure powdered saxolite is dissolved in a half-pint witch hazel and the solution used as a face wash. The effect is almost magical. The deep wrinkles and crow's feet, as well as the finest lines—whether due to age, illness or worry—completely and quickly vanish. No one need hesitate to try this simple lotion as it won't harm any skin.

IN TWO YEARS' TIME

THERE WILL BE NO BOARD SIDEWALKS IN CITY.

This Season the City Has Used Up 2,050 Barrels of Cement in the Construction of Sidewalks—Over \$3,000 Has Been Expended For This Necessary Commodity.

How many barrels of cement do you suppose have been used this season by the city, in the construction of cement sidewalk work?

Perhaps you would not believe it, but the records go to show that exactly 2,050 barrels have been used in sidewalk work.

Kingston may be rather slow with paving, but it cannot be said that the city is slow on cement walks. It is expected that in two years' time the entire city will have been equipped with cement walks. No more board walks are laid nowadays, and it is good-bye to all of them now, as quickly as possible.

When the new pavements are also taken into consideration, a very large amount of cement must have been used in city work. The company doing the work had to supply their own cement. In addition to the work of the city, many contractors have been using cement.

The city has been called upon to pay \$1.57 per barrel for necessary commodity. According to Watertown papers, that city has been getting it at the rate of \$1.30 per barrel. Kingston has spent over \$3,000 for cement during the season.

BIG OUTPUT OF ARSENIC.

Poisonous Metal Has Many Industrial Uses.

More than 16,000,000 pounds of arsenic enough to kill off the population of the nation, was imported into the United States last year. The production of white arsenic in the United States in 1911 was 3,122 tons, more than double the amount of the preceding year, according to a report just issued by the United States geological survey. The arsenic was obtained as a by-product of smelting operations, and the output is by far the largest ever recorded in the United States.

White arsenic, metallic arsenic, arsenic sulphides, Paris green and London purple were imported by the ton. The principal uses of arsenic are in glass making, in pigments and in insecticides. The use of Paris green (acetarsenite of copper) in paint is somewhat limited on account of its poisonous quality. As an insecticide it is used largely by gardeners, orchardists and farmers.

If pure, it is comparatively harmless to plant life, owing to its insolubility, but the trioxide is often present in some quantity, and if Paris green is then used it is fatal to plants, especially in dry climates, where it is not soon washed off by rains.

Experiments conducted by a number of the state agricultural experimental stations have demonstrated the value of arsenic when combined with lime as an effective spray against insect pests.

Disulphide of arsenic, both natural and artificial, is used as a paint pigment, in calico printing and dyeing, in tanning, and as it has with an intense white light, in fireworks. Orpiment, the trisulphide called also king's yellow, is used as a paint pigment and as a reducing agent in chemical work.

The trioxide is used in paints, for preserving hides, both for taxidermists and in the leather industry, as an antiseptic and in killing animal pests.

Sodium arsenate is used in dyeing with turkey-red oil and in printing fabrics; the arsenite is making snags for use on skins or hides. Potassium arsenite is used as a reducer for silver in the manufacturing of mirrors.

A man never has to be driven to drink but once after that he stands here without lifting.

REPORT HAS BEEN MADE

Regarding Asylum Supplying Water to Portsmouth Church.

Hon. W. J. Hanna, provincial secretary, recently received a complaint about free water being supplied from Rockwood asylum to the Church of the Good Thief, Portsmouth. It seems that the supply has been given for fifteen years. The provincial secretary sent a member of the legislature to Kingston to make a report on the matter, as he said that no sanction had been given by the department. It is likely that a charge will be made hereafter.
