# The Daily Newspaper--

A successful merchant who uses daily newspapers, and who attributes his success largely to his liberal use of that form of advertising, gives the following reasons why he believes in newspaper advertising:-

"I advertise in the newspapers because I am not ashamed of my goods, and to let people know about myself, my store, and

"Because I cater to the intelligent class, and I know they read the newspapers, and I believe in increasing my business. "Because I can talk to more people through the newspapers

in a less time and at a more reasonable price than in any other

Because my newspaper advertising has brought me greater returns for the least expenditure of any advertising I have ever

Because when I write an advertisement I am willing to pay for placing it in the best possible medium;

"Because I know my advertisement is seen and read by everyone in the house where the paper goes."

The three great mercantile successes of the present generation-Marshall Field's, John Wanamaker's and Timothy Eaton's have been very largely achieved through intelligent and extensive use of daily newspaper space.
