Read the following opinion of a scientist, an authority who

> has experimented and therefore knows that "light cay even in pure beer.

Don't Drink Beer from ight. Glass Bottles

"We have tested beers repeatedly, placing the bottles in the direct sunlight, and testing the same after one, two, three and five minutes exposure, found that

the beer with three and five minutes exposure became undrinkable on account of the peculiar odor developed. The detrimental effect of light upon beer can be successfully counteracted by the employment of brown or dark colored glass bottles, and such bottles are, therefore, recommendable."

-Wahl-Henius Institute of Fermentology.

The Schlitz Brown Bottle is only another step for absolute purity in Schlitz beer.

We have adopted every invention, every innovation, every idea that could make for purity.

Schlitz was first brewed in a hut. Today our agencies dot the earth. Our output exceeds a million barrels a year.

See that crown or cork is branded "Schlitz."
