

GANANOQUE TO VOTE

ON THREE MONEY BY-LAWS ON JULY 7TH.

To Have a Flying Machine at the Town's Celebration On July 1st—Talk To High School Pupils On Poultry and Eggs.

Gananoque, June 10.—W. H. Smith, district superintendent of this section, in the interests of Leeds' Farmers' Institute, accompanied by Freeman Britton, secretary-treasurer of that organization, paid a visit to the Gananoque high school on Monday afternoon and gave an instructive talk on "Poultry and the Production of Eggs for the Market."

Prof. Gill, of Kingston, filled the pulpit of Christ church at both services on Sunday and was greeted by good congregations on both occasions.

The Dominion Day sports committee, of which W. J. Wilson is chairman, is in communication with W. S. Luekey, of the Curtis Co., endeavoring to secure his services for a flight here at the celebration on July 1st.

In the case of John Boyle, Leeds township, vs. the G.T.R. company of Canada, an action for damages for the killing of a horse belonging to plaintiff, has been settled by the company for \$150. The plaintiff's claim was for \$250.

Miss Hazel Wilson, daughter of Mrs. B. A. Wilson, Brock street, was in Toronto last week attending the convention at Varsity, where she was awarded her degree of B.A. Miss Wilson is an ex-pupil of Gananoque public and high schools.

Robert Taylor, King street, spending some time in Brooklyn, N.Y., guest of his daughter, Mrs. Graham. On Monday, July 7th, three by-laws will be voted on in this municipality to authorize the bonus of \$20,000 to the Gananoque and Arnprior railway to guarantee the bonds of the Cowan & Britton company, limited, for \$50,000, to confirm the agreement entered into between the corporation and the Gananoque Electric Light and Water Supply Co.

Gananoque Battery, No. 8, C.P.A., in charge of Major Russell H. Britton, and Lieut. Taylor and Rat-tray, entrained their battery of

eighteen pounders and equipments and in full force left for their annual sixteen days under canvas at the military instruction camp at Petawawa on Monday evening.

Mrs. Joseph Dempster, King street east, was "At Home" to a large number of her friends on Monday afternoon.

A. W. Taylor left on Monday for a business trip west. Frank H. Hurd, who has been spending the past few days with his wife and family, Gordon street, left for Kingston on Monday to resume his duties.

Invitations have been issued by Mr. and Mrs. S. H. De Wolfe, of Lansdowne, for the marriage of their daughter, Miss Vera Pearl, to Harry G. Summers, of Elgin, on Wednesday evening, June 12th. Mrs. Keeler, of Boston, accompanied by J. H. Goodspeed, arrived here recently to spend the summer at their cottage on Tremont Park.

Zam-Buk and Outdoor Life. Every tennis or ball player, every swimmer, every canoeist, every man or woman, who loves outdoor life and exercise, should keep a box of Zam-Buk handy.

Zam-Buk is a purely herbal preparation, which, as soon as applied to cuts, bruises, burns, sprains, blisters, etc., sets up highly beneficial operations. First, its antiseptic properties render the wound free from all danger from blood poisoning. Next, its soothing properties relieve and ease the pain. Then its rich, herbal balsams penetrate the tissue, and set up the wonderful process of healing. Barbed wire scratches, insect stings, skin diseases, such as eczema, heat rashes, ring-worm, babies' heat sores, chafed places, sore feet—are all quickly cured by Zam-Buk. It also cures and cures piles. All druggists and stores. Use Zam-Buk Soap also; 25c. per tablet.

The electric light company, of Pembroke, has offered to supply current for cluster lights on Pembroke's main street at the same price as is now being paid for the arc lights in use.

The best bread and pastry flour—King's Quality flour. Manufactured by Maple Leaf Milling Co. The new Hungarian cabinet was formed by Count Tisza, speaker of the lower house of the Hungarian parliament.

Ladies' up-to-date dressmaking. Terms moderate. Miss A. Keyes, 221 Princess street. Arnprior is likely to have a new flour mill and grain elevator.

VILLAGE OF CATARAQUI.

Rev. D. M. Perley and Wife Leave For Fernie, B.C.

Cataraqui, June 9.—The temperature was too near the freezing point last night to please the gardeners. Miss McLaren, Brockville, has been visiting Mrs. (Rev.) Elliott. Miss Stella Boyd is home from a visit on Wolfe Island. James Gordon had a raising-bee last Friday to erect the frame of his new barn. Rev. D. M. Perley and wife have left for their new work at Fernie, B.C. Miss Lilian Sharpe has been the guest of Miss E. Birmingham. P. T. Ward has been in Toronto as a delegate of the Chosen Friends. Mr. and Mrs. J. Ward are staying with their daughter, Mrs. S. Knight.

Rev. W. F. Perley preached in Onessa on Sunday last. Mrs. J. Aylesworth is improving after undergoing an operation for appendicitis. Mrs. J. Gibson and Miss E. Edwards attended the branch meeting of the W. M. S. at Brockville. Mr. Perley is improving the appearance of his house by an application of paint. J. Cordukes, Ottawa, was the guest of his mother for a few days. Mr. and Mrs. H. Rees and family are in the family home prior to their departure for Victoria, B.C. Mr. and Mrs. C. V. Crosby and son, Trenton, have returned home after visiting at E. Riley's.

Wanted British Subjects.

Victoria, B.C., June 10.—The Canadian Arctic expedition, under to sail for the Arctic, about Stefansson, has had some slight difficulty in securing a full crew owing to the fact that Captain Robert Bartlett wanted only British subjects who had had Arctic experience. Captain "Bob" Bartlett is himself a pioneer of the Arctic, and an excellent example of the old line of skippers. He commanded every ship used by Peary in his North Pole expeditions, and was in command of the Roosevelt on the voyage that ended in success.

Counted Billions of Dollars.

Washington, June 10.—Rounding out her fifty years of service in the treasury department, Mrs. Emma R. Graves, aged eighty-four years, is the sunshine of the place. For this last century Miss Graves has been steadily counting the nation's wealth. Billions of dollars have passed under her nimble fingers and she has the record of never making a mistake in the count. She still occupies the position of an expert counter, now counting notes which have been turned in to be destroyed.

PRESENT MARVELS

ROASTED INVENTIONS KNOWN FOR THOUSANDS OF YEARS.

Electrifying a Myrtle Several Hundred Years Ago—Wireless Telegraphy Foreseen As Long Ago As 1633.

The idea of growing plants by electricity, which has aroused so much interest of late, has been referred to as the "last cry" in gardening and agriculture, but, as a matter of fact, the idea is nearly a couple of centuries old. As long ago as 1747 electricity, as an aid to plant cultivation, was advocated by a writer in the old "Gentleman's Magazine," who mentioned the astounding results he had achieved from electrifying a myrtle the seventeen times.

This is but one of the many interesting cases of the antiquity of modern inventions, related by Mr. H. E. Dudeney in the April number of The Strand Magazine. It is astonishing, but nevertheless true, that in 2,000 years ago Egyptian priests were using a pump-in-the-slot machine, the mechanism of which was practically identical with that of the machines to be found on every railway station to-day. The ancient machine, the inventor of which was Hero, was used for supplying sacred water to the temples. A coin was dropped from the top into one end of a balanced horizontal lever, which, being depressed, opened a valve suspended from a chain on the other end, and the water thus began to flow. When the lever had been depressed to a certain angle the coin fell off, and the valve, being weighted, returned to its seat, and thus cut off the supply.

The taximeter was in use about a hundred years ago, and was sold in various qualities in Leadenhall street, London, at 2s. to 3s. 6s., while the wireless telegraph was also used long ago as 1633, when Henry Van Etten suggested, in a little book called "Mathematical Recreations," that a person in London might communicate with one in Prague, Germany, by the means of a magnet (presumably magnetism). Van Etten suggested that if each of the persons had a needle with a magnet, and secret notes or alphabets, they would be able to move the needle and indicate letters, and thus convey messages.

In 1644 the possibilities of the submarine were first propounded, and were not the very earliest times men have conceived the idea of flying with wings like birds. "There is no reason whatever to doubt the fact that Archytas of Tarentum, about 394 years before the Christian era, constructed an automaton pigeon that would fly."

Turning to other latter-day inventions, as they are generally regarded, it might be mentioned that switch-back railways were constructed over a hundred years ago, and looping the loop was a sensation in Paris in 1833, which most people will learn with surprise that roller-skating, which came up as a new invention about forty years ago, was being indulged in by our forefathers as far back as 1629.

Royal Academy Roasted. The London critics in dealing with the Royal Academy seem to suffer from the same evils which they find in the Academy's exhibition itself. The London Times observes:

"It is hard for a critic to recognize merit in the mass of mediocrity, and promising painters are probably aware of the fact. They know that even if their work is hung it may very likely be overlooked by both critics and the public, and therefore they tend more and more to show it elsewhere."

The Daily Telegraph says: "One must inevitably approach the serious examination with a feeling closely akin to dismay. And this will not necessarily be the fault of the works exhibited, but a consequence of the pictorial noise and confusion of the close packing, of the screaming of one work against another in that struggle for domination which not always results in the survival of the fittest. Of pure aesthetic enjoyment there could in any case be no question."

While The Daily Mail declares: "The Royal Academy of 1913 belongs to the last, and not to the present mind. The reactionary academic mind has triumphed, the walls of Burlington House have been padded anew to exclude the faint echo of joyous life which had begun to enter from the outside world."

Motor-Boat as Coffin. A motor-boat was used as a coffin at the funeral of East Cowes of Miss Ethel Kate Saunders, the only daughter of Samuel E. Saunders, a well known motor-boat builder, says an English paper. Miss Saunders, who was only thirty-three, assisted her father in the secretarial part of the business.

The body had been placed in a leaden shell, and then was deposited in a specially-constructed hull of a motor-boat, with bow and stern rounded off. The boat was made of two skins of plain mahogany sewn together.

The motor-boat containing the remains was buried in a brick grave lined with primroses and evergreens.

A Political Bull. Among purely political "bulls" it would be difficult to beat that attributed to Mr. Thwaites, one of the candidates for Blackburn during the general election of 1890. In one of his speeches he said, "Unfortunately the Government is on the wrong side of the book. But, however, we have a prudent Chancellor of the Exchequer, and he has done his best. He has done what I would like you all to do, namely, when you lay an egg, put it away for a rainy day."

Flower Show at Race Course. Permission has been granted to the Essex (Eng.) Horticultural Society to hold their annual flower show at Sandown Park race course on Wednesday, July 2. The exhibits are to be staged in pavilions and luncheon rooms at the rear of the grand stands, overlooking the course, while the paddock is to be utilized for dancing.

TWO CARDINALS.

Newman and Manning Figure In New Book of "Memoirs."

The late Lord Coleridge's house was one of the two at which Cardinal Newman used to stay on his rare visits to London after he had taken up his abode at Birmingham—the other being the Duke of Norfolk's. Mr. Coleridge, in his recently issued "Memoirs," writes: "He (the Cardinal) came on one of his periodical visits when my boy Johnnie was about three years old, and about the middle of breakfast, according to custom, he was brought down and sat, as usual, on my wife's knee, who was just opposite the Cardinal at table. I do not think the old man saw my little children very often in an intimate way. . . . After gazing at them silently for a little while he became visibly moved, and rising from the table he murmured in a low voice, half introspectively, as it were, 'I think I must bless him.' He came round the table, and laid his hand on the little child's head, and said a few inaudible words of benediction. I think everyone present was touched, and glad to have been present at so beautiful a moment."

Later the Cardinal asked if he might take Mr. Coleridge's little boy to the Zoo—a request at once complied with—and it must have been a picture to see the old man allowing the boy to draw him on from cage to cage, prattling the measurable about their occupations. Matthew Arnold and Cardinal Newman, by the way, met for the first time at Lord Coleridge's house, and "they talked together as a pair of ripe scholars," no one supposing that they were not old and familiar friends.

With Cardinal Manning Coleridge's association was also intimate and constant: "He dined occasionally at my father's house, or, rather, responded to an invitation to do so, and duly sat at my father's table, but he never ate anything whatever; he sometimes crumbled a little bread in his fingers, but nothing passed his lips. No attention was drawn to it, and no one pressed him to eat or drink anything."

Nothing, Mr. Coleridge adds, could be more striking than the contrast between the two great English Cardinals. "Manning was everything that his great colleague was not."

Pill of Live Spider.

The Gresham lectures on "Drugs Old and New," delivered at the City of London School by Dr. F. M. Sandwith, Gresham professor of physics, were no less entertaining than instructive. After pointing out that herbs supplied the first drugs, the lecturer described how animal products were accepted as medicines, some even remaining in the first English pharmacopoeia published in London in 1618. Tiger's flesh and new-born puppies were among the old remedies. One book recommended a pill of a live spider. In the 17th and 18th centuries powdered mummies were prescribed, and so great was the demand that fraud led to more mummies being supplied than ever came out of Egypt. John Gerrard, who was chief gardener of Lord Burleigh's garden in the Strand, and had a garden of his own in Holborn (then called a "suburb" of London), published a book in 1597 as his own, although it was, in fact, a translation of a Belgian herbal. Gerrard recommended "Solomon's seal" for the taking away in one night of the blackness of bruises caused by falls "or women's wilfulness in tumbling upon their hasty husbands' fists, or such like!"

Killed by Elm Tree.

Ellum she hateth mankind, and waiteth Till all the world be still To drop a limb on the head of him Who doubteth her sovereign will. Kipling's lines are recalled by an observation of the Lambeth coroner, who at an inquest recently on Henry Ward Beach, who was killed by fall of an elm branch, said to a witness: "You know the unpleasant habit of elm trees of shedding their branches without any warning in still weather?"

The weather was described by William Kentish, a Peckham coachman, who said he was driving along Half Moon lane, Herne Hill, one Sunday morning before 11 a.m. There were trees in the gardens and their boughs overhanging the pavement and the roadway.

Beach was walking on the pavement towards Kentish's coach, when a large bough fell on Beach and on the horse, knocking both down. The thick part of the bough fell on the man, who never moved or spoke. The horse was slightly injured.

Many martyrs are self-made.

NEWS OF NEIGHBORS

WHAT WHIG CORRESPONDENTS TELL US.

The Tidings From Various Points in Eastern Ontario—What People Are Doing and What They Are Saying.

Fair View Reports. Fair View, June 9.—The hay and grain crops are looking well owing to the nice rains. Robert Hodgson sold his hogs to Hugh Milling. The roadwork commences Monday with Stizley File as pathmaster. Earl Van-alsting is working Mrs. Charles Lowery's farm on shares. E. Vanalstine and F. McTaggart spent Tuesday in Kingston. Mrs. John Bennett had the misfortune to fall and break her left arm.

Doings At Maberly. Maberly, June 9.—Miss Hudson has gone to Montreal. Mr. Kehoe is ill. Mumps are quite prevalent in the village. Rev. G. Brunet attended the synod meeting at Ottawa. William Clarke was lay delegate. Mr. and Mrs. George Garrett, Zealand, spent Sunday at Charles Gordon's. Miss Maggie Perkins spent Sunday at Mrs. R. Hughes'. Ernest Walroth will remain one week longer in Perth as he is among the number writing on the departmental examinations in the Perth Collegiate Institute. John Morrow is visiting in Smith's Falls. Mrs. Ritchie Havelock is visiting in Maberly. Mr. Ishim visited the cheese factory last week.

News From Westport. Westport, June 9.—Walter Wolfe is quite ill. E. N. Larose has accepted a position in Ottawa. Miss Rose M. Murphy left last week for South Porcupine. Mrs. John Kelly and children, of Chicago, are guests of Mr. and Mrs. W. J. Colbourne. Mrs. J. Bissett, of Edmonton, Alta., is the guest of her mother, Mrs. John McInure. Miss Anna McCann, New York city, is the guest of Mr. and Mrs. A. Egan. T. W. Topping intends moving to Brockville this week. Mrs. E. W. Molton and children, who are visiting friends in London, Eng., the past six months, returned last week. They were accompanied by Mr. Moulton's brother on the return trip. John B. McCoy fell down stairs and seriously injured himself last week. He is recovering as well as can be expected. Mrs. J. P. Ryan and son have returned to Detroit, Mich. They were accompanied by Ford McCann.

TALK OF REVOLUTION. Is Gradually Dying Out in Belfast. Belfast, June 10.—Talk of revolution is dying out somewhat. The water business men are pretty shrewd politicians, and the belief is growing that, should Home Rule be imposed on them they would very readily get control of the Irish legislature, and, in fact, rule the country from Belfast. The workmen of Belfast, however, are easily aroused, and with foment leaders urging them to fight, might make it uncomfortable for any government that attempted to force them into an acceptance of home rule.

Stoned To Death. Sattle, Wash., June 10.—A special to the Post-Intelligencer from Wilson Creek, Wash., says: An unidentified organizer of the Industrial Workers of the World was stoned to death on Saturday during a pitched battle between several members of the I.W.W. and Italian laborers employed by the Great Northern railroad, whom they had tried to persuade to quit work.

When the Italians refused the I.W.W. party began a stone fight. The leader was struck in the head, and left with his skull fractured. No arrests have been made.

RHEUMATISM, LUMBAGO and LAME BACK can be cured by the great fruit kidney and liver remedy, FIG PILLS

Brantford, Ont., Aug. 13, 1911. My medicine, Fig Pills, has worked wonders for me. The rheumatic pains have entirely left me and I owe everything to your remedy. You are at liberty to publish this.

R. H. GAILMAN. At all dealers 25 and 50 cents or mailed by The Fig-Pill Co., 54, Thomas, Ont. Sold at Mahood's drug store.

DYSPEPTICS WARNED

BY GERMAN PHYSICIAN

Prof. Riegel, World-Famous Authority on Stomach Diseases, Points Out Lurking Danger.

Prof. Riegel, Professor of Clinics in Medicine in the University of Giessen, pronounced the world's greatest authority on diseases of the stomach, makes the positive statement that dyspepsia must not be used in treating acidity of the stomach. Millions of people are taking all sorts of dyspepsia tablets because they contain pepsin, which affords slight temporary relief, but every dose contributes to serious harm in time. What is needed is something to neutralize the excess acid. The best thing for that purpose is artichoke extract. Authorities agree that you can get it at any drug store for a quarter glass of water after each meal. You will get immediate and complete relief with no danger of ordinary druggists' Bismarck Magnesia, acidity is the cause of nearly every form of stomach disorder, and if not checked it is likely to lead to stomach ulcers and cancer.

Richelieu & Ontario Lines

EFFECTIVE JUNE 1ST.

S.S. TORONTO daily except Monday at 5 a.m. for Clayton, Alex. S.S. KINGSTON daily except Monday at 5 p.m. for Rochester, N.Y. and Toronto.

Launching of the Alauina.

London, June 9.—The launching of the Alauina, the second of the new steamers to be placed in the Cunard line's Canadian service this year, is evidence of the remarkable development and wide popularity of the extension of the company's operations to the dominion. The Alauina, like her sister ship, the Andania, launched in March, is a fine twin-screw vessel of 13,300 tons, and is being constructed by Messrs. Scott's Shipbuilding and Engineering company at Greenock. With the Andania, Alauina and Albatross in commission, all new ships of considerable size and equipped with the latest and most approved arrangements for the comfort and convenience of passengers.

The Cunard Canadian service will afford exceptional facilities and advantages to those travelling to or from the golden west.

Lord Strathcona has given \$1,000 to the New Glasgow, N.S., Y.M.C.A. War between the Balkan allies seems to be inevitable.
