

To Smokers.

You know that unpleasant, dry "throaty" feel after a hard smoke? Peps will remove it. Some smokers try gum, but gum has no effect whatever upon the membranes of the throat. Not only so, but that chewing habit is so disagreeable.

When next you have a sore mouth, "smoker's throat," or a heavy breath, try Peps! One little Peps allowed to dissolve on your tongue will liberate pleasing pine essences which will bathe the inflamed throat membranes in a medicinal vapour bath. This will give you instant ease, and at the same time will sweeten the breath.

For a bad cold, sore throat, bronchitis, asthma, or any allied trouble, Peps is the latest and best treatment. They are "the breaking treatment." When throat and lungs are ailing, don't you see how useless it is to swallow medicine into your stomach—an entirely different and unconnected organ. Get to the lungs and throat direct, and Peps alone do that.

SEE IF THE CHILD'S TONGUE IS COATED Mother! Don't Hesitate! If Cross, Feverish, Constipated, Give "California Syrup of Figs." Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once. When peevish, cross, listless, pale doesn't sleep, doesn't eat or act naturally, or is feverish, stomach sore, breath bad, has stomach ache, sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs" and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well-played child again. You needn't coax sick children to take this harmless "fruit laxative"; they love its delicious taste, and it always makes them feel splendid. Ask your druggist for a 50-cent bottle of "California Syrup of Figs" which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Beware of counterfeiters sold here. How to Prevent Acid Stomach and Food Fermentation

As a specialist who has spent many years in the study and treatment of stomach troubles, I have been forced to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The great trouble which causes acid, flatulence, food fermentation, acid irritates the delicate lining of the stomach and food fermentation causes wind which distends the stomach abnormally, causing that full bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach is usually healthy and normal, but irritation interferes with and retards the process of digestion. This is usually healthy and normal, but irritation interferes with and retards the process of digestion.
