TORONTO REPRESENTATIVE

TOUCH WITH THE PEOPLE

Hon. Mr. Foster, as minister Trade and Commerce, is willing - to get into the closest touch with business men of the country. Ad dressing the members of the Associated Boards of Trade, and the ganization which represented ten thousand others, he said he had three things he desired to emphasize.

First, he wanted the largest possible made of the bulletins which his department issued weekly, dealing with the information it felt the people should have. This lication should be found useful, and it could be made more useful by the co-operation of the people. Next be designed to have the trade commissioners come home occasionally to address boards of trade and other publie bodies, and to exchange views relative to the commerce of Canada abroad. These men could be very useful to the business community and could very materially increase their usefulness.

One further feature was this-the appointment of a council of business men, representing the business interest of the provinces, to consult with him on matters pertaining to his depart. ment and their mind on the trade of Canada. These advisory councils are not, sometimes, of much account. The Advisory Council of this province, the creation of the Education Department, is a farce and failure. It advises. On what? With what result? No one knows. The fault lies with the department.

The government party has exposed him, and the government itself, in the protection of its bonour, should see that he leaves Be life at once. The men who sullied their reputations in Quebec disappeared quickly from the presence of those they had disgraced.

Once more it has been demonstrated that the man without means has no business in politics, and the people who elected him are guilty of a grave indiscretion. OCEAN FREIGHT RATES There is no doubt that the -government will be forced, even reluctantly, to do something in order to remove the grievances of the people with regard to ocean freight rates. When the matter was before it did seem that the min ister of Trade and Commerce avoided responsibilities of the governor at least avoided a dis

cussion of their responsibility.

The matter had invited the attention of the Railway Commission and for rhe reason that this commission had realized that land and freights were closely related. Drayton, the chairman, had gone the old land and enquired into and : had concluded though the ground for protest surely existed, and though the increase in rates was hurtful to trade, the way was not clear for the application of

At the recent meeting of the Associated Boards of Trade the mercantile community demanded, by resolution, that relief should be at once, or without delay, provided. Pigures were supplied which showed that the rates had gone up arbitrarily during the last five or six years, and that S. A storm is surely brewing in Canada over these ocean freights, and one man, la large importer, struck the key note when he said: "I have brought goods from the centre China to Canada at half the expense of ocean charges that I have paid for Atlantic service, and this after the gauntlet has, been run of two attacks by bandits. But I would rather pay these Chinese bandits under the circumstances than pay the men who, enjoying great privileges from the Canadian people, proceed to hold them up and tax them as they lik

EDITORIAL NOTE:

The premier proposes to go west this year. He will be meeting some of the guests of pre-election days. They walk in the west, and they are nasty things to encounter at odd times.

The plea of the Associated Boards of Trade, for a modification of the Compensation Bill, may have influence the legislature, but the people gener ally will not brook any delay in this nost necessary legislation.

The resolutions proceeding from the Kingston Board of Trade, were unanimously adopted by the Associated Boards of Trade. One had to do with the conservation of power in small streams and the other with the utility accounts.

SOCIAL EVILS. The most important question is, What force can now be put in play against the formidable

evils which gravely threaten the very life of the race? No one force or agency can be completely relied on. Attack must be made against the three principal causes of present evil conditions -first, lust in men; second, complete lack of moral principle in certain classes of women; third, depravity of those who make commerce of these two. Commercialized vice should be attacked in all its forms by all the powers of the law. The ancient policies of toleration and licensed segregation must be uprooted. Segregation has nowhere been successful. Regulation is a confessed failure. The laws against undesirable marriages need to be revised. Public progress in regard to sex bygiene and eugenics is to be procured chiefly through educational methods. The work must be done delicately and without interference with parental rights or religious convic-
