PAVEMENT IS CHOSEN FOR CONSTRUCTING PRINCESS AND KING STREETS

Sandstone blocks to be laid in the Track Allowance, and sheet asphalt on the Rest of the Roadway. Sandstone block for the track allowance and sheet asphalt for the rest of the roadway will be the types of pavement to be used on Princess and King streets. The City Council on Monday evening adopted a recommendation of the Board of Works awarding the contract for the paving to Foley & Gleason, of Ottawa, who will start work as early in the spring as possible and complete it within sixty days. Seven companies tendered for the work, some of them quoting figures for different types of pavements. The tenders closed last Tuesday and six days later the contract is awarded. The Board of Works' recommendation to the City Council was as follows: That the tender of Foley & Gleason to construct a permanent pavement on Princess and King streets, between Clergy and Brock streets, with the best quality of Nepean sandstone block in the track allowance, and asphalt for the balance of the road, four inches of concrete under the railway view, for the sum of \$41,319, be accepted, the quality of the block and the specifications to be approved by the city engineer and Board of Works before the contract is signed. In reply to Ald. Nickle, as to whether four inches of concrete under the street railway fits the recommendations of the city's expert, T. H. Mather, Syracuse, N.Y., Ald. Litton said it was not. Ald. Nickle remarked that Mr. Mather had been paid \$250 for advice in connection with the paving question. The Board's Quick Change Ald. Fair declared he was surprised when the report was presented to him to sign, and he read that "Nepean sandstone block" had been substituted for "vitrified brick" since the committee adjourned at six o'clock, after two hours' consideration, and after all had agreed upon vitrified brick. He could not understand the change since that time, for all the information the board members could have had since then was from the contractor, Mr. Foley. The sandstone will cost \$5,190 more than vitrified brick. Ald. Fair wanted the matter referred back to the board for further consideration of the relative merits of the two kinds of pavement. Ald. Sutherland explained that some of the members were undecided at the meeting as to whether sandstone was worth \$5,190 more than vitrified brick. All the tenders gave a guarantee of ten years, but after further consideration and securing more information the board came to the conclusion that sandstone would last longer than vitrified brick and it would also give a better grip to horses' feet. Ald. Fair left the meeting before this additional information was secured, and it was then that the board decided to make the change in its decision. Ald. Graham said he was glad the Board of Works had come to its senses and decided upon street asphalt for the roadway outside the track allowance. Asphalt was the proper pavement. As to sandstone he did not know anything about it, but if a ten-year guarantee was given he thought it would be all right. Ald. Couper explained that the board in going over the tenders had decided upon either sandstone block or vitrified brick for the track allowance. He himself had asked the contractor what he thought about the two pavements and the contractor, although it did not matter to him what type of pavement was used, recommended that sandstone be used, as his long experience qualified him to speak with authority. Ald. Hughes stated that when he learned the difference in the wearing qualities between vitrified brick and sandstone block he had no hesitation in voting for the latter. Ald. Nickle wanted to know if Mr. Mather had stated that vitrified brick was the best pavement. Ald. Fair in reply stated that as far as he could say Mr. Mather had intimated that vitrified brick was the best pavement. Ald. Nickle declared that nowhere could such a statement be found in the correspondence of Mr. Mather with the Board of Works. Sandstone Superior Ald. O'Connor explained why he had agreed to substitute sandstone for vitrified brick. When Contractor Foley afterwards told the board members that he would guarantee vitrified brick for only ten years and sandstone for a longer period he felt that it was worth the additional \$5,000 for sandstone. Mr. Foley also stated that granite was the best block that could be used, but the price was too high for Kingston. Ald. O'Connor further explained that the chief work done by Mr. Mather, of Syracuse, was in preparing plans and specifications for the street railway track allowance.

RUPTURE EXPERT HERE

Seecley, Who Fitted Czar of Russia, Called to Kingston. F. H. Seecley, of Chicago and Philadelphia, the noted truss expert, will be at the British-American Hotel and will remain in Kingston Thursday and Friday only, March 5th and 6th. Mr. Seecley says: "The Spematie shield as now used and approved by the United States government will not only cure any case of rupture perfectly, affording immediate and complete relief, but closes the opening in ten days on the average case. This instrument received the only award in England and in Spain, preventing results without surgery, harmful injections, medical treatments or prescriptions. Mr. Seecley has documents from the United States government, Washington, D.C., for inspection. All charges without charge, or if any interested call he will be glad to show the same without charge or fit them if desired. Any one ruptured should remember the date and take advantage of this opportunity."

Grand Trunk Pacific Railway

Track laying on the main line of the Grand Trunk Pacific railway west of Prince George, B.C., is proceeding at a rapid rate. Prince George is at Mile 1279 west of Winnipeg and the track laying outfit has been pushing forward from that point at the rate of over a mile a day since February 1st, and no interruption is expected until the end of the work. The track laying outfit now working from the end of steel 337 miles east of Prince Rupert. At Prince Rupert, the excavating of the new government building and post office at Third avenue is going ahead at a rapid pace, and the work of excavation for the Grand Trunk Pacific new hotel. A large shipment of steel arrived for the dry dock during January and work on this structure is making rapid progress.

Mayoral Election Customs.

The election of mayors in England, in November is in some places accompanied by quaint ceremonies. The Mayor of Lincoln, for instance, is inducted by placing on his finger an ancient ring. At Cheltenham the mayor is presented with a gold-headed mace, cane, and at Grantham the new chief citizen is gravely tapped on the head with the town clerk's hammer. From time immemorial the Mayor of Brightlingsea has been elected in the belfry of the parish church, whilst at Bournemouth the new mayor receives a solemn kiss from his predecessor.

A Compromise.

The vicar of Leeds, Eng., Dr. Bickelthorpe, tells of a clergyman who rang him up on the telephone to ask if he would consent to his taking a marriage service in which the word "obey" was left out. He replied that he was not the bishop, but was tolerably certain that the bishop would not allow him to omit the word. "But who is the lady going to marry?" he inquired. The answer was, "She is going to marry a doctor." He then asked, "Would she mind if you put in the word 'consult' instead?" Prescott liberals will probably demand the resignation of Eanturel and his exclusion from public life. "Tom" Mann will probably go to South Africa with the labor leaders and start a fight for recognition.

CASCARETS TONIGHT! IF BILIOUS, HEADACHY, CONSTIPATED--10 CENTS

Cascarets make you feel bully; from the bowels. A Cascaret to-day immediately cleanses and sweetens the stomach, removes the sour, undigested and fermenting food and gas, takes the excess bile from the liver and carries off the toxic stipulated waste matter and poison from the bowels. A Cascaret to-night straightens you out by morning—a 10-cent box with any drug-store and your stomach regulated, head clear, and liver and bowels in tip-top condition for months. Don't forget the children.

ONE FALSE PROPHECY

THE GREAT RECORD OF SIR JOHN TENNIEL Who Was Cartoonist For Punch For Fifty Years—Correctly Predicted Many Political Events. Sir John Tenniel who died last week was the famous English cartoonist who so mercilessly caricatured Abraham Lincoln during the Civil War. He was the dean of the world's great political cartoonists. Tenniel held the record for continuous service. Fifty years were spent, with scarcely a holiday, as cartoonist for London Punch. His pencil pleased millions. He set the principal of the political cartoon so firmly that it has been adopted the world over. His keen political foresight was worked out in more than 2,000 sketches, touching upon, and perhaps deciding, the great world events during the last half of the 19th century. Queen Victoria received the famous cartoonist and in 1893 knighted him for his service to his country. His first great achievement as an illustrator was in his youth when he figuratively stepped into the hearts of children of all nations as illustrator of Aesop's Fables and won even more fame as the original illustrator of Lewis Carroll's Alice in Wonderland. "Do you suppose there is anything funny about me?" was his answer to the offer to join Punch in 1851. He had just submitted his design for frescoes in the Palace of Westminster. It was with reluctance that he gave up his ambition to be a great painter and accepted the offer. Riskin once said that the cartoonist might have won renown as a painter, and added: "Tenniel has much of the symbolic mystery of imagination which belonged to the great leaders of classic art."

A Professional Wrestler

Daily Needed as Referee at Intercollegiate Contests. Queen's Journal makes the following comment upon the intercollegiate assault-at-arms which took place in Montreal on Friday and Saturday last: "McGill university won its first intercollegiate assault-at-arms championship in Montreal, Saturday night, by the decisive score of seven wins to three each for Toronto and Queen's. It was the wrestlers who secured the honor for McGill as no less than five of the six events in wrestling went to the Montreal students. Queen's were the runners-up in most of these but lost the decision. Mackmor, who looked good to win from Audette in the 125-lb. class, strained his side badly in the first two minutes and was forced to give in. He was unable to go on with the bout. McQuay and McPhail wrestling the full fifteen minutes with no fall and the referee refused to give a decision. Possibly the Queen's men were biased, but it looked as if McQuay had a shade the best of it. However, in the extra three minutes he was thrown by McPhail. Doda put up a very good argument against Davies, but was thrown in the six-minute period. No one wants to kick after a contest, but why the decision was given against Roberts, who was the aggressor for at least twelve of the fifteen minutes is a mystery that was not explained. A fall was called on Wilson when his shoulder was at least two inches from the mat. The sponsor the intercollegiate executive gets a competent professional wrestler and pays him to act as referee the better. At any rate there is one official who is permanently on Queen's blacklist. Dawson Mathieson won his bout by getting on top of his man, staying there every minute of the time. "The Queen's boxers did very well considering their inexperience. Inman and Appleby fought splendid battles for novices and Laycock gave Montgomery as much as he got. There was an extra round required for the decision. Hagey lacked confidence. The latter was a good boxer style. The latter surprised the crowd and perhaps himself by knocking out Cameron, of Toronto. Cole was conceded by everyone the honor of being the prettiest boxer at the tournament, with McClinton, of Toronto, a close second."

A Socialist State.

New Zealand has the reputation of being one of the most progressive countries in the world. There is practically no poverty which is not the result of laziness or drink. There are no millionaires and no slums. New Zealand is two-thirds the area of California. It has a European population of 1,000,000, almost wholly of British descent, and a Maori population of about 40,000. The issue of these islands have become known throughout the world because of the advanced reforms they are supposed to promote. Primary education is free, secular and compulsory up to a prescribed standard, with free books, free travel on the railways for the children attending school, and where there are no railways an allowance for conveyance by vehicle or ferry or for board of pupils in the vicinity of the school. Lives of infants are protected by taking them from hard and unnatural conditions and placing them with approved private families. There is a national endowment of 9,000,000 acres for education and old age pensions, besides 2,000,000 for special purposes of various educational institutions. Public utilities are either nationalized or municipalized, including railways, harbors, postal and telegraph service, parcel post, postal savings banks, street cars, telephones, gas, electricity, water and other things. There are nearly 3,000 miles of railway and only 29 miles are owned privately.

Married to Kangaroo.

At the recent Church Congress in the Old Country, a speaker complained of the lack of information respecting the Empire at home. He said he had read of a poor woman who, when shown a kangaroo at the Zoo and told that it was a native of Australia, replied, "Good gracious, and my daughter is married to one of them." This reminds us of the story of the Irish emigrants who went to the West Indies. They got on so well that a year or two later they sent and induced more Irish folk to emigrate. When the second batch arrived they were greeted by a crowd of blacks who greeted them with such homely words as "Begorra!" and so on. "What black already?" was the amazed comment of the newcomers.

Child Almost Strangled

You never know what minute a child will develop a bad cold or be seized by croup. For this reason it takes a great burden off every mother's mind to have at hand Dr. Chase's Syrup of Linseed and Turpentine. Mrs. E. W. Silver, South Milford, Annapolis county, N.S., writes: "I have used Dr. Chase's Syrup of Linseed and Turpentine for my little boy with most satisfactory results. His throat would fill up with phlegm so bad that he could scarcely make a sound, and I thought he would surely strangle. He grew worse, and had frequent bad attacks, so I began using Dr. Chase's Syrup of Linseed and Turpentine. Scarcely half a bottle was used when the strangling ceased. This medicine had a wonderfully soothing effect and when he had taken two bottles I could not tell that he had any throat trouble. We have also used Dr. Chase's Ointment with equally good results. It is a grand medicine for salt rheum. There are imitations, but the genuine Dr. Chase's Syrup of Linseed and Turpentine bears the portrait and signature of A. W. Chase, M.D., the famous receipt book author."

THE GREAT RECORD OF SIR JOHN TENNIEL

Who Was Cartoonist For Punch For Fifty Years—Correctly Predicted Many Political Events. Sir John Tenniel who died last week was the famous English cartoonist who so mercilessly caricatured Abraham Lincoln during the Civil War. He was the dean of the world's great political cartoonists.
