### AT THE GRAND

To-night "Nobody's Daughter," Will be Stirring Play

Of the many English actors, who will visit this season, none is more worthy of consideration than E. A. Anson, who is well-remembered here for his splendid work with the New Theatre company some four years ago. Mr. Anson returns to Canada this time with his own distinguished company and is presenting a comedy play entitled "Nobody's Daughter," which has to its credit a run of eight months at Sir Charles Wyndham's theatre, London.

"Nobody's Daughter" is a woman's play from start to finish, except where the exigencies of Mr. Anson's well deserved stellar position demand that the more logical, but less interesting sex shall have an innings. It is a play which has for its basis the exigency of mother love.

The play is told in four acts and presented in a massive scenic production, under the personal supervision of William H. Gilmore, at the Grand to-night.

### St. Patrick's Day

For St. Patrick's Day, matinee and night, at the Grand, the United Irish societies have arranged with Capt. Prideaux, manager of the Kingston Dramatic club, to present the three-act comedy, "The Magistrate," by Sir Arthur Wing Pinero. This play is one continuous laugh from start to finish and is sure to please all who attend it.

### McFadden's Flats

Laughter is a tonic that beats all the best patent medicines. It drives away dull care, chases away the blues, and makes despondency look like "thirty cents." Laughter in large chunks will be on tap at the Grand, on Thursday, March 19th, as "McFadden's Flats" will be the caper. The piece is successful by its rapid continuity of amusing scenes and laughable situations, to say nothing of the splendid list of specialties with its pretty music and catchy songs, big chorus of vivacious maidens, comedians, dancers and singers who know how to entertain.

### DIFFICULTY ANTICIPATED

In Getting Railway Connection at Foot of William Street

It is stated that some difficulty is anticipated in getting railway connection from the foot of William street for the shipbuilding and cereal companies. Plans are being prepared by the G.T.R. engineers in order to show the Board of Works what can be done. The difficulty is in constructing a curve that will take a locomotive. Cars could make the curve, but it would be another proposition to run a locomotive over it. It has been suggested that the G.T.R. locomotives might push the cars up the incline on to Ontario street and that a donkey engine be used to haul them to Gore street.
