

YEAR 81—NO. 73

## THE SPORT REVIEW

### OTTAWA WILL HAVE SUNDAY BASEBALL THIS SEASON

No Third Game for Pellatt Hockey Cup—Hamilton Tigers to Take a Rugby Trip to England

The Ottawa club's arrangements in connection with Sunday ball may prove the solution of the difficulty which the Canadian league has experienced in securing Class B rating. Ottawa will play their Sunday games on the Hull side of the Ottawa river. The population of Ottawa was given to President Fitzgerald as 100,000. With Hull added to the territory the population has been boosted to 109,000. This will give the Canadian league over 400,000 people, exclusive of Toronto, and may result in the National association reversing its decision not to grant the higher classification.

The Chatham council has promised to repair the field there, so Ottawa will return to the Maple City to train. Manager Shughnessy has decided to retain Pitchers Kane, Kubat and Donovan until such time as he succeeds in buying others. New grand stands will be erected on the Hull park, and there will be fifteen Sunday games.

### No Third Game

There will be no third game for the Pellatt cup, owing to the fact that a couple of the Monarchs received word that they had to be back in Winnipeg by Monday. Then they sustained a bruised ankle Wednesday night, while Alexander Irvin hurt his arm.

When the Pellatt cup games were first broached between the two teams, T.R. and A.A. suggested goals in the two games, the same as in the O.H.A. but Monarchs wanted games to count. Therefore Monarchs' decision to return home before the final game leaves things in a muddle, with no decision arrived at. The Hull Monarchs stated that while they would have liked to have lifted the cup, yet they were satisfied with their showing. "We have played four games against each other," said one of the officers, "and each have won two."

### Hamilton Tigers for England

The Hamilton Tigers, who made a successful trip through western Canada last fall, now have a more ambitious programme for late next fall, when they plan to make a trip to England. They count upon playing about eight games in ten weeks. The secretary Bobbie Kerr, has been instructed to make arrangements for the trip.

### Maritime Province Baseball

That the prospects for a Maritime province baseball league this summer composed of at least four teams, and possibly six, now look very bright, and a season even more successful than that of the New Brunswick and Maine league season last year is anticipated, is the declaration of Joe Page, Canadian editor of Spalding's Guide, and well known all over Canada as a promoter.

### Shamrock IV. a Centre-boarder

All rumors as to the challenger for the America's cup were set at rest, following a statement given out by Charles E. Nicholson, New York. The Shamrock IV is a centre-board craft. Nicholson announces that the hull is of composite construction—steel frame and wood planking—and she has hollow masts of wood. The challenger will be launched in April. The dimension of the vessel, her displacement, and sail area, Nicholson refused to divulge.

### To be Captain and Coach

Ottawa Free Press

So great is the confidence of the Ottawa hockey club in the ability of Eddie Gerard, the recently converted amateur may be placed at the helm of the red, white and black next winter in the capacity of captain and coach. Young Mr. Gerard, though just graduated from the amateur ranks, has a knock screwed on him the proper way and his experience and knowledge of hockey and players, probably exceeds that of ninety per cent. of

the players in the N.H.A. Eddie directed the New Edinburgh team through four victorious seasons. He represented the whole of the brains of the Ottawa Big Four fourteen for three years on the field. He is an adept leader for the reason he can show the best of them. The Ottawa club has already discussed the matter in a favourable light.

### School Lacrosse in West

"The success of the school lacrosse movement on the coast has been far beyond anything I had ever dreamed of," writes Joe Lally, from Vancouver. "It looks to me as if lacrosse will be placed on a firm basis in every town in that province."

"My only fear is that, according to present indications, we may be short of sticks because it looks as if we will be able to place at least 3,000 dozen of these boys' sticks between Victoria and Winnipeg, and Ontario is certainly going to take more. I have written our factory to get all the men possible and to work overtime in order to get out our orders. The prairie and B. C. sticks will be shipped first, as their season is ahead of ours in Ontario and this may help out."

Calgary is expected to form thirty good school teams.

### COMING TO THE GRAND

"Uncle Tom's Cabin" Will be Here on Saturday

At the Grand on Saturday, March 28th, matinee and night, the beautiful and realistic picture, which has made Kibble and Martin's production of "Uncle Tom's Cabin" world-famous, are the little cabin of Uncle Tom, an old Southern road, Skinner's tavern, the ice-jorged Ohio river by moonlight, the grand old home of Phineas Friend, the wild rocky pass in southern Ohio, St. Claire's home, showing a tropical garden with its fragrant magnolia and orange trees, among which nestles the typical southern plantation residence, the home of Eva; corridor at St. Claire's, the great New Orleans levee and slave mart, a moss-circled road near Legree's, a street in New Orleans, Legree's plantation on the Red river with the cotton in full bloom, and the transformation entitled "The Celestial City." Kibble and Martin's version involves thirty important characters and is told in four acts and twenty-eight scenes. Twenty negroes are carried to fill out the pictures and introduce their plantation pastime. The production is transported by special train. Watch for the grand street parade at noon.

### "Stop Thief"

When an absent wealthy person takes things that don't belong to him and forgets to put them back, he is called a kleptomaniac. A shorter and uglier term is used to describe a poor man who develops the same tendencies.

In "Stop Thief," the new farce to be seen at the Grand on Thursday, April 2nd, there are two kleptomaniacs and one plain, ordinary crook who get their personalities so mixed as to excite much laughter and create many funny situations.

One year in New York, six months in Chicago and three months in Boston is the record of this clever farce. The original company and production will be seen when the play is presented in this city.

### Tamworth Notes

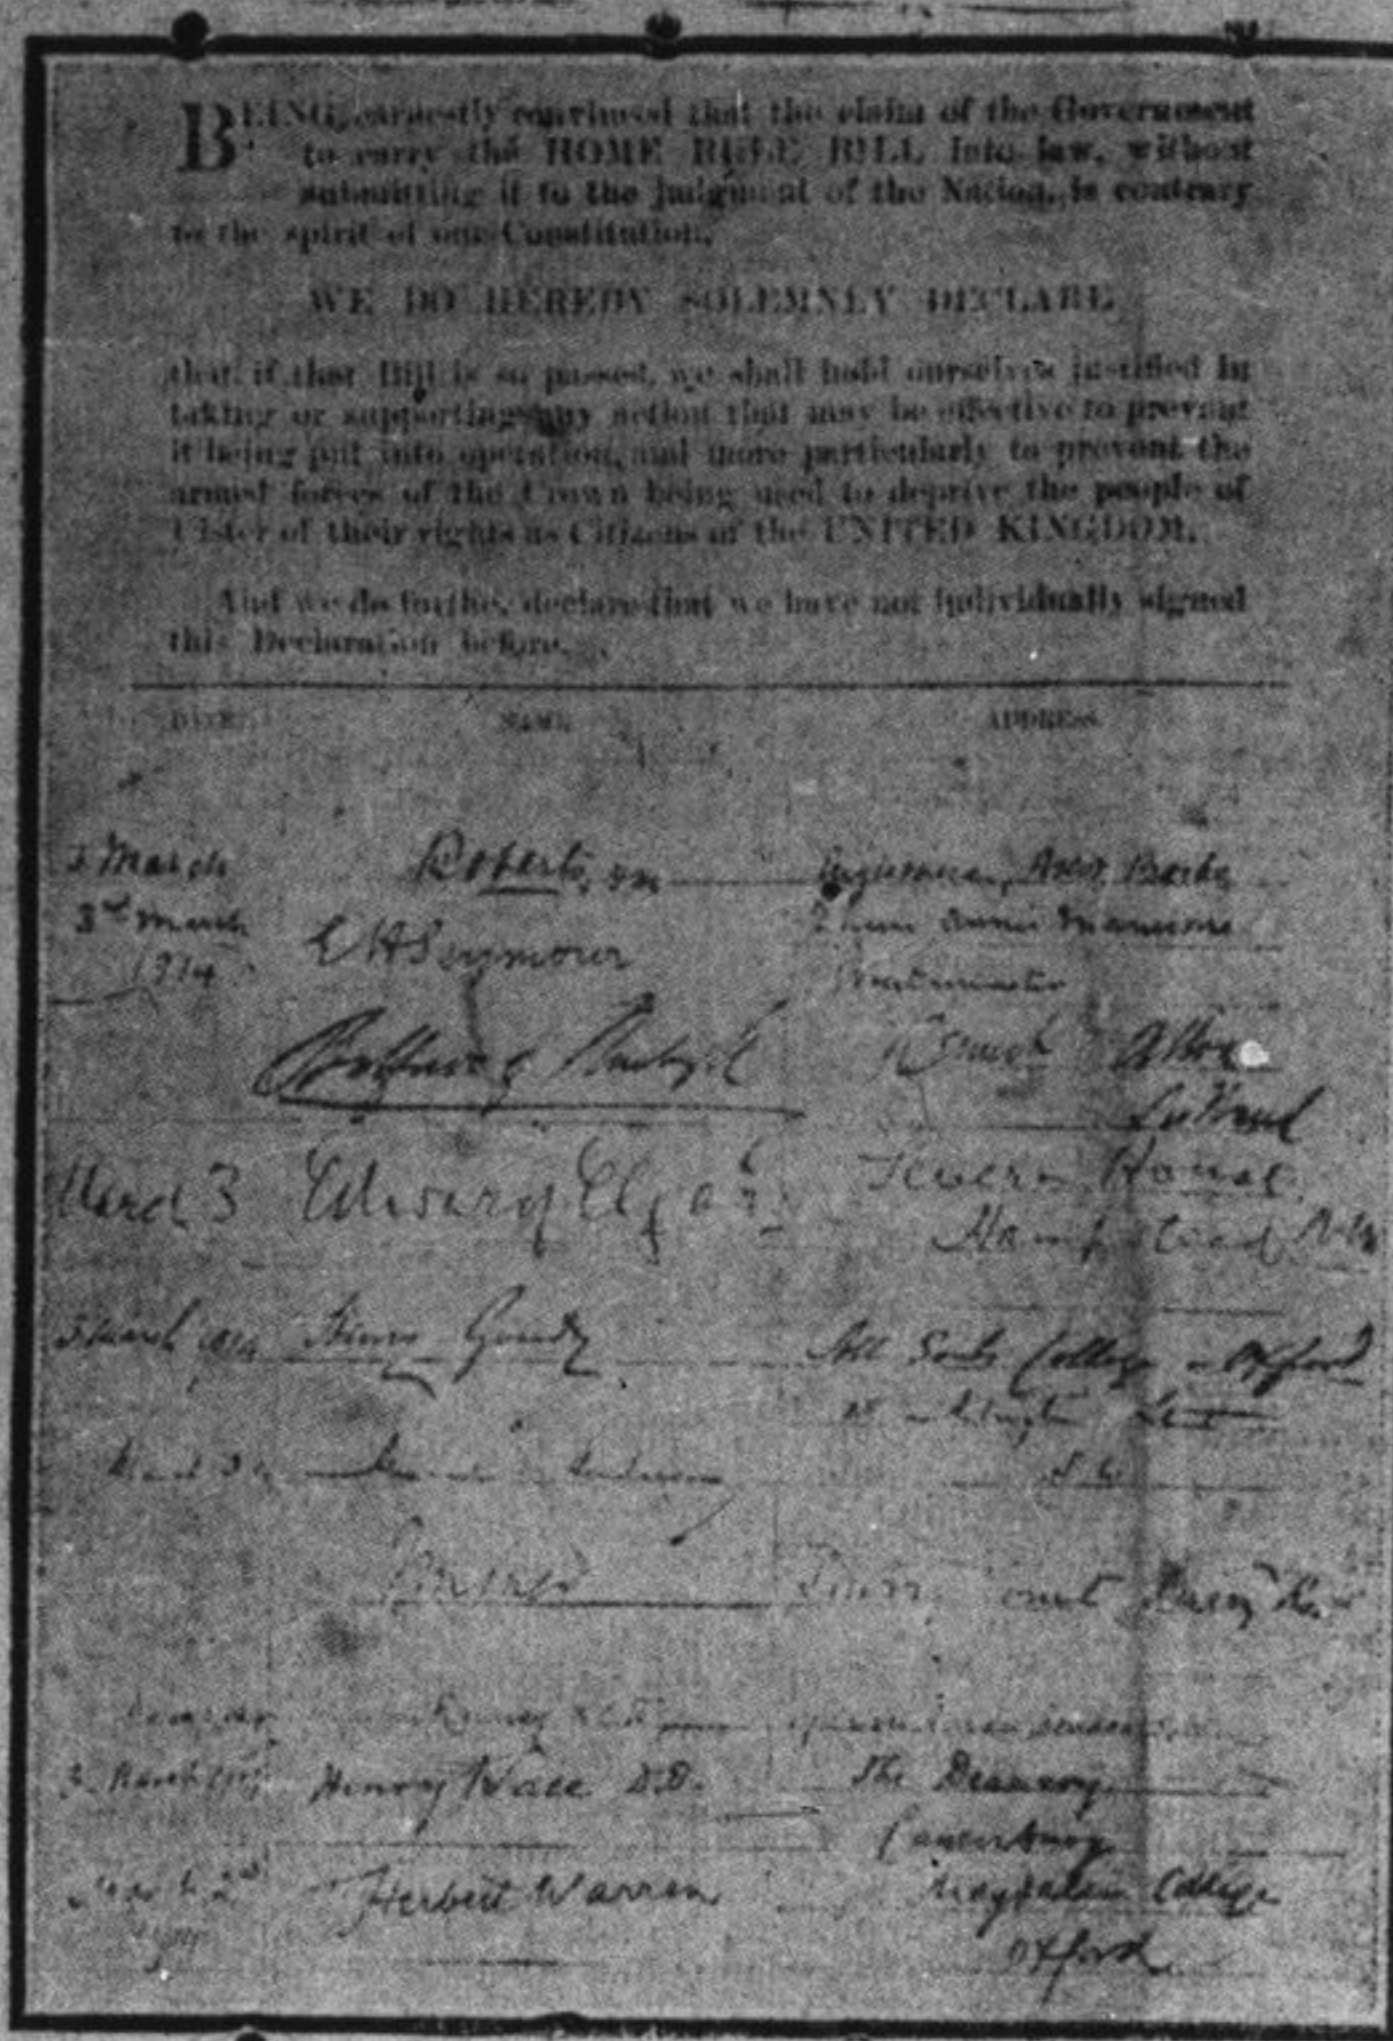

Tamworth, March 25.—Mr. and Mrs. Sexsmith and daughter, and Amos Robson, Mr. and Mrs. Dalce and children left on Monday last for Saskatoon, Sask. Amos Prizzell's team ran away on Saturday last but little damage was done.

### CASTORIA

For Infants and Children.

The Kind You Have Always Bought

Bears the Signature of J. C. Watson

"WE DO HEREBY SOLEMNLY DECLARE." The first sheet of the new British Covenant to help Ulster which is being signed by thousands all over England. Lord Roberts was the first signature.

### SALT RHEUM FOR 6 YEARS

Zam-Buk Has Cured Him

For over six years Mr. William H. Birt, of Pisquid, P.E.I., suffered from salt rheum. He says: "The disease attacked my arms and hands, and the forefinger of my right hand was the worst. I was engaged as a blacksmith by the Bruce Stewart Co., of Charlottetown, and sometimes every stroke of the hammer would cause the finger to bleed freely. I tried various ointments and salves, and then went to several doctors in and around Charlottetown."

"One medical man, after treating me for some time, said he did not think I could ever be cured. Another put his finger into some fluid, which seemed to burn it terribly, and then put a straight jacket—as I called it—on the finger for two days. Trying one thing and another I spent over \$50, and all in vain."

"I saw an account of some of the great cures which Zam-Buk has worked and decided to try it. The first box did me a lot of good, and the finger showed traces of healing, so I kept up the Zam-Buk treatment and a few boxes worked a cure. There has been no return of any trace of the disease, so I know the cure is permanent, and I am so thankful for my cure that you are at liberty to use these facts if you like."

Reader, if you have any skin disease, cut, burn, cold sore or skin injury, try Zam-Buk. It is absolutely unique as a healer. Druggists and stores everywhere at 50c. box, or post free from Zam-Buk Co., Toronto, for price.

Mrs. Grace Havenor, sued for divorce in a New York court, was accused of parading her flat stark naked. Asked if she did, Mrs. Havenor, who is mighty pretty, said, "not knowingly."

Conducting an English party, including Lord and Lady Wimborne, through the Alcazar at Seville, King Alfonso amused himself by pressing a button which released a shower of water on his guests.

A man may now and then give the wringer a dozen or more turns and then brag about helping his wife with the washing.

### INTERESTED IN GERMANY

The Action of the Army Officers is the Feature

Berlin, March 26.—The liveliest interest in the Ulster situation is taken in Germany, the action of the army officers being, of course, the feature which attracts the most attention in this military fatherland. Refusal by officers to carry out the government's command is inconceivable in this land of relentless discipline.

Die Post, the conservative and war party organ, remarks: "The soldiers' trade is hard, and the man who is engaged in it dare not shrink from shooting down his own brother if he finds him in the enemy's camp."

The Post also rejoices over what it considers a fiasco of parliamentary government, for which the German liberals and radicals are clamoring.

"In the twentieth century we may compare the spectacle of the inability of another parliament either to prevent civil war or even to enforce its expressed wishes."

The Berliner Tageblatt (radical), says: "The English liberals are defeated. Home rule will not be enforced until the people of Great Britain have voted on it at a general election. The aristocracy has overcome the democracy."

"Despite all the formidable efforts, in recent times to guarantee the paramountcy of the people's will, the democratic government has forgotten that in the last analysis it had to reckon with an aristocratic army."

"The result of the new election is doubtful. It may come to pass that unrighteousness will triumph, because, as we now see, circumstances may arise even in liberalized England, where 70 lieutenants count for more than 400 members of parliament."

Maggie Mitchell, 82 years old, who in 1862 was famous as Fanchon, in "Fanchon the Crickett," returned to her home on Long Island, after visiting New York city to see a production of "Gump." Miss Mitchell is wealthy as a result of her old-time popularity.

### TAX REFORM GROWS

Steadily in Favor—Liberals Urge Progress

Toronto, March 26.—On the resumption of the debate in the legislature yesterday on the second reading of Mr. McCormick's bill to assess improvements at a lower rate than land, Thomas Marshall (Monck) expressed surprise that the government had declared that there was no agitation in the province for a change in the present law. On all sides there were signs of dissatisfaction. Resolutions, petitions and deputations had been sent to the government asking for a bare measure of local option, which was now being denied. He supported his argument for tax reform with the statement that the public services of a municipality never added a dollar to the value of the improvements on property, but had a material effect on the value of the land.

Danase Rafine (Russell) showed by illustrations from conditions obtaining in his own county that the conditions were highly inequitable and a change should be made. He gave instances of large tracts of land that were being held by speculative concerns, while the farms on either side were carrying the cost of maintaining the highways. In one case the timber on a piece of land was worth more than the land itself at the existing low rate of taxation. In another the Canada company was holding land against an increase in value from surrounding improvements.

"No member on the government side appears to be willing to rise in his place and defend the position which the government has taken on this question," said George Anderson (South Bruce). "The only reason because they think the government does not move is because they think that party loyalty is sufficient to support them no matter whether they move in the right direction or not. The province has waited seven years for workmen's compensation, must it wait seven years longer for tax reform?"

A resolution introduced by Thomas Marshall (Monck) approving of the action of the Hydro-electric Power commission taking up the question of providing radial lines for the rural districts, and memorializing the dominion government to grant financial aid to such railways in all respects equal to the subsidies given to steam railways, was adopted after a modifying amendment had been brought in by J. A. Ellis (West Ottawa).

### Arrested With \$100,000

Portland, Ore., March 26.—Walter Greer Campbell, who three years ago had more than \$1,000,000, was arrested here on a charge of obtaining money under false pretenses in San Francisco. It is alleged he fled from creditors to whom he owed more than \$100,000.

"There has been a mistake, that is all," he said.

Campbell had \$100,000 in gold certificates in his pockets.

### AFTER COUGHING TWO YEARS

Waycross, Ga., Women Found Relief in Vinol

Did you ever cough for a week? Then just think how distressing it must be to have a cough hang on for two years.

Mrs. D. A. McGee, Waycross, Ga., says: "I had a very heavy cold which settled into a chronic cough which kept me awake nights for fully two years and felt tired all the time. The effect of taking your cod liver and iron remedy, Vinol, is that my cough is gone. I can now get a good night's rest and I feel much stronger in every way. I am 74 years old."

It is the combined action of the medicinal elements of the cod liver oil added by the blood-making and strength-giving properties of tonic iron which makes Vinol so efficient for chronic coughs, colds and bronchitis—at the same time building up the weakened, run-down system.

Try a bottle of Vinol with the understanding that your money will be returned if it does not help you.

Geo. W. Mahood, druggist, Kingston, Ont.

### CROSS OCEAN TALKS

MARCONI SETS TIME FOR FILIPMENT OF PREDICTION

Rate May be \$10 a Minute—With Bigger Machines He Hopes Soon to be Able to Talk from London to Ireland.

London, March 26.—William Marconi reached London yesterday and reiterated his prediction that he would be able to telephone across the Atlantic in the near future—possibly within six months.

The inventor spoke of his recent visit to Italy, where he conducted what he termed "a series of gratifying and successful experiments" in wireless telephony. He told the New York Times correspondent just what he had accomplished so far in that field and what he expected to achieve and at the same time he took occasion once for all to deny the canard which has frequently cropped up in the last few months, that he had succeeded in talking across the Atlantic.

"Some newspaper accounts of my recent experiments in Italy," he said, "were very funny. Here is one that says I succeeded in talking over a distance of more than 4,000 miles. As a matter of fact we talked by wireless over a distance of slightly more than forty-five miles, which was all we expected and knew we could do with the apparatus we were using."

"We were experimenting with brand-new apparatus on which I began work only three months ago, and which seems very simple and very practical. We did not intend it to work over big distances. It was not tried over long distances in fact. I knew it would not work much over forty-five miles. The same type of apparatus would have worked over longer distances, but what we were after was not long-stance records, but reliability—reliability first. We were very much gratified by the results."

"The first and severest test" was twelve hours' continuous talking—not all by one man, of course. The twelve hours' talk was provided by several men and a gramophone working in relay.

"The new apparatus is more practical, simpler, and less likely to get out of order than anything we have had heretofore."

"I think transatlantic telephony will be done soon. I think there is no foundation for the rumors, so far as this company is concerned. However, I expect to try the experiment of talking across the Atlantic some of these days, as soon as I think the science is sufficiently advanced."

Mr. Marconi did not wish to be pinned down to any definite period within which he would engage to achieve the feat; but when six months was suggested he said he thought something like that would be about right.

"We are building some larger and more powerful machines," he said "and now expect soon to be able to carry on experiments in long-distance wireless telephony over 200 or 300 miles. The station at Clifden will, I hope, be doing it soon. We hope soon to talk between Ireland and London if everything doesn't get smashed up over Ulster and prevent the experiment. The station at Carnarvon, Wales will also be experimenting with long-distance wireless telephony over a minimum of 300 miles. I am also working on a still bigger machine, the object of which is to send transatlantic wireless telegraph and telephone messages both on the same machine."

"The commercial possibilities of transatlantic telephony, I think, will not be nearly so great as those of transatlantic wireless telegraphy—at least not at present. You see, at most we cannot talk more than 100 words a minute over the telephone, whereas we can send 200 words a minute by wireless telegraph."

"I suppose we could charge \$10 a minute for talking across the Atlantic—no doubt many a man would gladly pay it to speak to his best girl or his partner—but for most

practical purposes wireless telegraphy would be chosen in preference to wireless telephony, since the maximum speed of the telephone would be 100 words a minute, as against 200 by telegraph. You people of the press would want to get over a lot of 'stuff' to the other side in a hurry. You wouldn't telephone it; you telegraph it, wouldn't you?"

Reputation and character are about as synonymous as the north and south poles. Many a man never does anything worth while because he thinks it isn't worth while.
