CHAPTER XV.

A Message from "Croesus"

The same two men were again on duty in the instrument Room at Ribeira Grande who had been on duty on the night when the cable message "Danger-Circus" came through, Scarberough again was sitting in front of the siphon recorder, and again Scott was lying in a cane chair, listlessly turning over the leaves of a novel. Specialization of function commonly ook this form between these two. your countryman. I'm not going." No messages were passing over the ables, and for the last half Scarborough had been deep in thought. The task which he had taken upon his shoulders, when he undertook to solve the mystery which surrounded Rich-

nond Carrington's death, absorbed the thoughts of most of his waking hours That there had been no actual mur jer had been proved by the evidence of the Portuguese doctor, who had cen Elsa to be his wife, and he had not tifled that death was due to the sud suggested that there was any doubt. den bursting of an aortic ancurism of long standing. But the doctor said also that it was impossible that Carrington should not have known of the city house was still open to him. He had stated his reasons frankly, saying existence of this ansurism, and that It was very unlikely that he would be that he had no newly-developed desire to spend his days on a stool in a City office, but that he had a very present uncle had offered as a commencing salary if he agreed to sit on that stool

ignorant of the fact that any unusual exertion would almost of a certainty be fatal. So much Scarborough could understand; but what he could not understand was why Elsa's father had by making this exertion, doomed him self to an almost inevitable death. He had little doubt that the risk had been known, and dared with full knowledge. But why? What was the motive which had been strong enough to make Rich mond Carrington brave death as the price of a country walk?

Presently Scott, the man in the cane chair, vawned, and threw his book

"What awful rot manages to get int print nowadays," he remarked. "Sickening! I'll change places with you for a bit, Horace, A siphon-recorder that doesn't record anything is dull company, but the average modern novel is duller. Bet you half a crown you can't read through four chapters of this one. Have a look at it, and pitch it into the stove when you've done." He came to the table and took Scarborough's place in front of the instrument. Scarborough went to the window from which he could see the white walls of the Chinelas in the distance. Scott. she knows!" he muttered.

she knows!" hem uttered. Since the morning when she had declared passionately that she no longer desired his help Elsa had told him nothing. They had met frequently and he had made a point of telling her everything. She knew, for instance, about the hooded woman, and she had in her possession the stone which had been found in the dead man's fingers, with the half obliterated scratches of his last message pencilled on it. But she had not met confidence with confidence. Scarborough knew nothing of the letter which her father had written to her, nothing of her reasons for going alone to the Ring-Rock. He would probably not have known even of the fact, had not the rescue of Mona de la Mar and the others from the

stranded Sea-Horse made it impossible He had told Mona that there had been no quarrel between him and Elsa. and in their literal sense the words were true. They met as friends. B

Scarborough turned away from the window with a sigh. The jarring note in his love-idyll rang to-day as a very palpable discord, and he longed for th time to come when the harmony would reassert itself.

An Increased Yield Chicago, April 1.-The winter wheat crop in the United States now has a promise of more than 600,-000,000 bushels, which compares with a record yield of 524,000,000 bushels last year. It is agured that the wheat now standing for harvest will exceed 36,000,000 acres, while last year the acreage harvested totaled 31,699,000.

SAVED MY ARM So says Mr. John Evans, of 87 Lawrence St., Halifax, N.S. He had blood poison in his finger. A doctor attended him for three months, but the finger got worse; and a second doctor was called in. Finally the finger was cut off! But the mischief didn' ead there. Another operation was performed, and mental and physical satisfaction as the bones in the palm of his hand scraped. Still no relief, and the hand would not heal! The poison had

got into the blood vessels of the arm, and the doctor said the arm must come off, too! Then, after undergoing all this agony, Mr. Evans was advised to to Zam-Buk-a course he should have taken right at the start. He says: "The Zam-Buk quickly reduced the lumps which had formed on my arm and eased the pain. It was doing so much good that I told the doctor I would use nothing else. Day by day I applied it freely, both to the terrible sore in my hand and to my arm; and it drew the poison out marvellously To cut a long story short, by the time I had used seven boxes of Zam-Buk my hand was healed, my arm was free from inflammation or pain, and every trace of blood-poisoning had been hanished. Zam-Buk sayed my arm."

THE LESSON IS THIS!-Use Zam-Buk right at the start for cuts, blood-poisoning diseases. Don't wait until these lead to a grave condition ! Gut out this article, send it with ic. stamp (to pay return postage) to Zam-Buk Co., Toronto, with name of this paper, and we will send you sample box.
