

TO END THE AFFRONTS

WHICH MEXICO HAS BEEN MAKING ON U. S.

Opinion of a Boston Newspaper - Chicago Paper Says War Would Result in Solving Mexican Problems.

Boston, Mass., April 23.—The Advertiser, discussing the Mexican situation, says:—

"It is not war that President Wilson wants, it is peace; and, because he wants peace, he has resolved to end a series of growing affronts, which, if unchecked, might have exasperated the American people eventually into insisting upon a declaration of war."

"He wants a powerful, cogent, impressive demonstration of warning, that will teach, not merely Huerta, not merely the people of Mexico in those sections where Huerta does not control, but all countries where a contemptuous opinion of the power of the United States may be held, that Americans must be treated with fairness, courtesy and justice."

"He is working for peace by striving to avert any future happenings that might lead to war. And he is doing this in a fashion which presents the least danger of any long continued war."

Solution of Mexican Problems

Chicago, April 23.—The Chicago Evening American says:—

"The war will mean not merely conquering Mexico to turn the country over to some new collection of bandits; it will mean conquering, annexing, civilizing Mexico and solving the Mexican problems, to the happiness of Mexico and to the benefit of the whole world. Mexico will be conquered, and made to understand

that resistance is foolish and useless, in a short time.

"There may be after that a long period of police work in the mountains, such as we had with our Indians here in the United States; but while the army police look after the Indians and the half-breed cutthroats, the civilization, the development of Mexico, the rescue of the unhappy population from hunger, hopelessness and oppression will go on."

"The fighting in the mountains will not check civilization in the new Mexico part of the United States, any more than our Indian lights checked civilization in the western part of our country."

SNERS AT CANADIANS

Being Anxious Over Their Investments in Mexico.

London, April 20.—The Pall Mall Gazette sners 'at a Toronto Reuter message telling of the anxiety of Canadian investors over the Mexican enterprise. "This appeal of sentiment is really touching. We were under the impression that Canadian groups had placed their script rather widely among British investors. We will be bound to say that if there is any sympathy to be wasted it should be directed towards the British Isles, not towards Toronto."

RICH WOMAN WEDS ACTOR

Married Robert Hilliard as Soon as She Got Divorce.

New York, April 23.—As soon as the news of the issuance of a decree of divorce in Brooklyn had been flashed to her in Denver, Colorado, to-day, Mrs. Olga Everard Williams, daughter of the late James Everard, the New York brewer from whom she inherited a \$2,000,000 estate, was married to Robert Hilliard, the actor, who is now appearing in "The Argyle Case." William Williams, from whom she obtained the decree, was once a chauffeur for Mr. Everard. Later he became the brewer's private secretary. On November 30th, 1909, Miss Everard and Williams eloped. Mr. Everard telegraphed his forgiveness to Atlantic City four days later when the news came out.

Mrs. Williams is 22. Mr. Hilliard is 57. They met in Philadelphia several months ago. Since that time she has been in nearly every city where "The Argyle Case" was playing.

This is Mr. Hilliard's third marriage. In 1881 he married Cora Barr and she secured a divorce in 1894. His second wife, Mrs. Nellie B. Whitehouse died last June at her summer home, Stancosset, Mass.

NO DANGER OF JAPAN

NO DANGER OF JAPAN

NO DANGER OF JAPAN

The Japanese Are Very Anxious to Preserve the Good Will of the United States

London, April 23.—There is no danger and no possibility of Japan trying to take advantage of the situation in the case of the United States and Mexico," said Arthur Dicosy, who pointed out that the likelihood of a Japanese move against the States was one of the suggestions most frequently heard here in private discussions of the Mexican situation. Various references, more or less veiled, also appeared in the press on the same subject.

The views of Dicosy, who is not only an authority as regards Japan, but also knows Mexico well, are consequently of interest. "The dispute between the United States and Mexico is watched with the closest interest by the Japanese people," said Dicosy, "but you may rest assured that no effort to take advantage of it will be taken by the Japanese government, and it will not act in any way likely to disturb the good relations existing between them and the government of the United States."

"At the same time, it must be borne in mind that the sympathies of the Japanese people are with the Mexican people, not particularly with this or that president or aspirant to the presidency with whom the country is over-run, but with the Mexicans as a nation that has shown itself friendly to Japan on every possible occasion. In Mexico the Japanese are welcome whether as traders or settlers. This is especially the case in the state of Chiapas, where a number of Japanese families have been encouraged to take up land and pursue agriculture. The Japanese cannot help contrasting their readiness to welcome them as a desirable element with the attitude of the white inhabitants of the Pacific slope. Whether Mexico's affection for Japan is not to a certain extent the result of Mexican ill-will toward the citizens of the United States is a question difficult to determine."
