### Acid Stomachs Are ONTAR Dangerous

Common Sense Advice by a Distinguished Specialist

"Acid" stomachs are dangerous be-use acid irritates and inflames the licate liming of the stomach, thus indering and preventing the proper tion of the stomach and leading to obably nine tenths of the cases of omach trouble from which people ffer. Ordinary medicines and medibut also prevents the fermentation from which acidity is developed. Foods which ordinarily cause greatest distress may be eaten with impunity if the meal is followed with a little bisurated magnesia, which can be obtained from any druggist, and should always be kept handy.
