Do You Know What Corns Are
Rube, in his "Diseases of the Skin," says that "a corn is a circumscribed hyperplasia of epithelial tissue, which projects downward, by a conical prolongation, into the deeper epidermal layers of the skin." It may be more interesting to you, however, to know how to get rid of them.
Apply our Eureka Corn Cure for a few nights consecutively on your corns, and you can take them out without the slightest pain or trouble. Eureka Corn Cure never causes soreness. Price, 25 cents.

CITY COUNCIL DELAYS

AWARDING CONTRACT FOR T.P. PER PRINCESS STREET

Till Board of Works Further Considers the Merits of the Various Types of Paving Offered in the Tenders.

After an hour's discussion of the Board of Works' recommendation that the tender of Foley & Gleason, of Ottawa, for \$34,519, for paving Princess street, between Clergy and Alfred streets, with asphaltic concrete, be accepted, the City Council late Monday night decided to allow the recommendation to be withdrawn by the board for further consideration of the merits of several other methods of paving material, chiefly tarvia and concrete, and to hold a special meeting to receive the board's later decision.

The question at issue, was as to whether a permanent type of pavement should be experimented with against a light rail. The city engineer is of the opinion that the durability of a permanent type of pavement would be decidedly uncertain. Contracting firms give a five-year guarantee on asphaltic concrete and tarvia.

When the Board of Works' paving recommendation was presented, Ald. Graham presented a petition for an asphaltic macadam roadway from the curbs to eighteen inches outside the rails, signed by more than two-thirds of the property owners between Barrie and Alfred streets.

Ald. Litton responded that more than the immediate residents of the blocks in question had to be considered. The whole city was interested in that portion of the city's main street along which a double track of the street railway was to pass.

Figures and Opinions.
Ald. Litton stated that the city engineer made these additional estimates: For paving with asphaltic macadam, without concrete base, \$11,279; asphaltic macadam, with concrete base, \$21,500. This latter figure was about \$12,000 lower than the figure for tarvia.

With regard to the laying of asphaltic concrete, Ald. Litton told the council that W. F. Graves, the Montreal expert, when here, was asked about the matter, and he said that while it was not customary to lay a pavement against a light rail, he was satisfied that asphaltic concrete was about the best material that could be used in this case, and he thought it would be all right.

Ald. Graham wanted to know why Foley & Gleason would give only a five-year guarantee.

Ald. Litton replied that he had asked Foley in question if they would give a ten-year guarantee. They said that while they believed the pavement would last more than ten years, yet it would be bad practice to give a ten-year guarantee.

Ald. Litton declared that if Kingston was to be an up-to-date city, it must have its main streets paved, and get rid of the mud. He remarked that tenants would not mind paying fifty cents a month more rent to get a clean pavement.

"Do you not think the rents are high enough?" asked Ald. Graham, who stated that he was a landlord, but he had not raised his rents this year as others had.

Ald. Litton stated further that a tender had been received for tarvia, but he and other members of the Board of Works did not consider it a good pavement for a street railway track allowance.

Ald. Stroud asked what consideration the board had given the Kingston Construction company.

Ald. Litton replied that he always favored giving home industry the preference, but in this case he considered that asphaltic concrete was a much better material than the local company offered, and the difference in price was only \$1,000.

Ald. Graham moved in amendment that the Board of Works' recommendation be referred back to allow of the consideration of the ratepayers' petition.

A letter was received from the manager of the civic utilities stating that the proposed extension of the paving on Princess street would entail an additional expenditure of \$5,000 on the gas department for renewals. The present condition of the mains is not such as to demand renewal, however, the letter added.

PARADE OF THE 14TH

TO THE CRICKET FIELD ON MONDAY EVENING.

Regiment Was About 350 Strong—Annual Church Parade on May 24th—May be Bivouac on May 30th.

For its second battalion parade of the season, held on Monday evening, the 14th Regiment numbered but a few heads short of the 320 mark. Numerically, as well as from the point of the appearance of the riflemen, and the steadiness of the marching, the turnout was an improvement on last week's parade.

The battalion marched to the cricket field, where upwards of an hour was spent in drill, terminating with the ceremonial. The regiment will parade again on Monday evening next.

The annual church parade has been set for May 24th. The dark uniform will be issued to the N.C.O.'s and men of the church and other ceremonial parades of the season. The new Wesley helmets will be worn plain this year.

A parade with the dark uniform will be held on the Friday evening preceding the 24th.

If satisfactory arrangements can be made for rations, Major H. J. Dawson and the officers of the regiment have decided to take the corps to Harrieheld for a night in camp or bivouac, likely on Saturday, May 30th. The plan is to march over to the heights late in the afternoon, carry out some battalion field work, and return to camp on Sunday morning. Games are included in the evening's programme.

"G" company, which he commands, and the regiment are losing the services of Capt. P. G. C. Campbell for the remainder of this season. He shortly leaves for a period in England.

Company N. C. O.'s
"A" company—Col. Sergt. W. T. Sherburne; sergeants, G. Williamson, A. Woodrowe and W. Sherburne; corporals, H. Stratford, C. Burke and W. Marshall; fourth corporal to be appointed.

"B" company—Col. Sergt. R. B. Sage; sergeants, F. Clench, A. Potter and W. Davidson; corporals, S. Maxum, F. Stradling, W. Walker and T. Taylor.

"C" company—Col. Sergt. J. A. Scott; sergeants, Baker, R. Parrish and P. Richards; corporals, J. Edwards and J. Rutherford; other corporals to be appointed.

"D" company—Col. Sergt. H. B. Trotter; sergeants, W. Long, E. Wood and W. Clarke; corporals, R. Hamilton, M. Compton, M. Marshall and C. Godfrey.

"E" company—Col. Sergt. S. Fraser; sergeants, P. Barrow, W. Anderson and W. Payne; corporals, G. Merritt, P. Allen, W. Dolan and J. Merchant.

"F" company—Col. Sergt. W. McCallagh; sergeants, W. Hamilton, J. Crawford and J. Holland; corporals, I. Brockhurst, D. Timms, T. Morris and V. A. Simmons.

"G" company—Col. Sergt. W. Hall; sergeants, F. S. Debra and J. H. Springs; fourth sergeant to be appointed; corporals, C. Bolton, J. E. Clarke, W. J. Salsbury and G. Murray.

"H" company—Col. Sergt. W. T. Lister; sergeants, F. B. Pense, W. Roberts and H. Jenkins; corporals, E. Francis, J. Mills, R. Langdon and E. H. Roberts.

Signalers' section—Sergt. C. A. Reid and Corp. S. Stephenson. Bearers' section—Sergt. A. Brundage and Corp. G. Staley.

Brass band—Sergt. A. E. Hunt. Bugle band—Sergt. B. Simpson and Corp. S. Simpson.

MAY MAKE OWN REPAIRS

Work That Can be Done in Stormy Weather

Many farmers object to trying repair work on the grounds that it is difficult to do; but a little practice will enable anyone to meet many emergencies.

New single trees and double trees may be made out of tough, dry hickory and several should be kept on hand to replace old ones which break. The clips and hooks for single trees and double trees may be bought at slight cost. Also bolts, nuts and washers should always be kept on hand in different sizes.

A few rods of round iron, about 1/2, 3/4 and 1 inch in diameter, should also be kept, from which to make links for chains, and a supply of open rings and clevises. These articles often break in the busy season, and many expensive delays may be saved by having them handy. It is not a difficult job to put in a new buggy shaft or wagon tongue, and if a supply of lumber is kept on hand the farmers may take advantage of stormy weather in winter, when no work can be done outdoors, and make gates, doors, ladders and other equipment which may be needed about the farm.

The shop should be furnished with a good forge and blower for doing blacksmith work, and a stove will be found necessary to make the place comfortable in winter. In addition to the forge and blower, the following tools will be needed for doing iron work: a blacksmith's hammer, a light hammer, a set of twist drill bits, a set of taps and dies for cutting threads, two or three cold chisels, and several sizes of punches.

For woodwork, put up a substantial work bench about ten feet long. A carpenter's vice should be placed on one side of the bench, near the end, and a bench stop at one end of the bench to hold boards for planing. Most farmers will not need a complete set of carpenter's tools, but at least the following should be purchased to take the start from time to time as they are needed: a hatchet, a rip saw, a cross cut hand saw, a set of chisels, a wooden mallet, a brace and set of wood boring bits, a draw knife, two planes and a steel square.

It is a good plan to overhaul the farm machinery at least once a year, and the repair shop will be found a convenient place in which to do this work. Clean up the woodwork and metal parts of mowers, binders and cultivators, etc., and give them a coat of paint when it is needed. Tighten all loose bolts and sharpen the teeth of harrows and cultivators so they will be in shape for immediate use when needed. If the old knives and guard plates on the mower are worn so they will no longer do first class work, they should be replaced with new ones. It will also pay to clean up the buggies, carriages and wagons, and protect them by a coat of good paint. This will add years to their usefulness, and greatly improve their appearance, and will save their owner many dollars annually on the cost of new equipment. The amount of money squandered by the farmers of our country by exposing wagons and implements to the weather and allowing them to deteriorate through rust and decay, would in many cases represent the difference between profit and loss in the operation of the farm. If in some way we could be compelled to take better care of our farm machinery, and would invest the amount saved in this manner in pure bred live stock, our success would not be a matter of doubt.

Pierced Money for France
Kansas City Journal.
What is particularly new about these coins is that they are made with a hole in the centre, to prevent mistakes in the dark.

About the only pierced money we know of is the Chinese cash sometimes seen in curio shops. The French money, however, will have a round hole instead of a square one, like the Chinese.

A Cheerful Giver.
The father of a Germantown lad had given him a ten-cent piece and a quarter of a dollar, telling him that he might put one or the other on the church's contribution plate.

At dinner the father asked the boy which coin he had given.
"Well, father," exclaimed the youngster, "at first it seemed to me that I ought to put the quarter on the plate, but just in time I remembered the saying, 'The Lord loveth a cheerful giver,' and I knew I could give the ten-cent piece a great deal more cheerfully. So I put that in."

In the Public Eye
"Somehow," said the genial station official as he seated himself beside the traveler, "there are some things which lead people to appreciate our wonderful improvements for their convenience and comfort."

"Oh, don't worry," laughed the jolly traveler, "there are some things about you and me that are always in the public eye."
"I am glad to hear that, sir. And would you mind naming them?"
"Cinders, sir—cinders."

The "Salada" Tea Co. have commenced using bright aluminum sheets for packaging their well-known tea. So light is this wonderful metal that a single sheet of it weighs no more than a similar sized sheet of writing paper.

A report to the London Daily Chronicle states that Tampico has been captured by the rebels.
At St. John, N.B., the wife of Hon. William Pugsley has passed away.
Sir Edward Carson is to marry a home ruler's daughter.

LIVER PILLS
Are Cured by
HOOD'S PILLS

Dr. Chase's Nerve Food is mild and gentle in action and wonderfully potent as a means of building up the run-down nervous system. Fifty cents a box, 6 for \$2.50, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Nerve Food supplies the ingredients which go to the production of new, rich blood and nerve force. For this reason it cures in Nature's way by rebuilding the wasted nerve cells and putting new vigor and energy into the whole human system.

Such diseases as nervous prostration, partial paralysis and locomotor ataxia are prevented and cured by this treatment. Be warned by headaches, sleeplessness, aching eyes and irritability, and revitalize the starving nervous system before such serious developments have set in.

GREAT BEND, N. Y., CHURCH

Gift of Frank W. Woolworth—Structure Will Cost \$15,000.

Waterloo, N.Y., May 12.—The contract for erecting the Woolworth Memorial Methodist Episcopal church at Great Bend was awarded Friday, to F. E. Wright, an Adams contractor, and work will begin at once. The plans for the church were drawn by Architect A. M. Skinner, of this city. The contract includes the building of a parsonage, barn and church sheds. The entire cost, including the site, is borne by Frank W. Woolworth, the five and ten cent store merchant, who is a native of Great Bend.

The church property will be on a lot facing Champion street in Great Bend. The church itself will cost about \$15,000. It is of colonial design, modeled after some of the churches down in New England. There will also be a parsonage costing \$2,500.

Turpin's Old Hamlet.
Houslow Heath, of whose connection with Dick Turpin we are reminded by Tony Sarg's new poster, is not the only spot around London with associations with that somewhat sordid hero or romance. At High Beeche in Epping Forest one can still see Dick Turpin's Cave, where tradition has it he was wont to hide, and Finchley still boasts an oak behind which he would take his stand and await the traveller. And was it not at Gerrard's Cross that he robbed the second Duke of Portland in his own park?—London Chronicle.

Handicapped
A young society woman was having a chat one evening with a young man whom she had just met. They were in the conservatory.
"Which do you admire the greatest," enquired the young belle, "black eyes or blue?"
"Well, really," replied the young fellow, slowly, "the light is so dim here, I can't say just now."

To-Night "Within the Law."
"Within the Law" is within life—every line of it. 'Tis a story of absorbing interest cut out of human experience," wrote Harriet Stanton Blatch, the great suffrage leader, after witnessing a performance of Bayard Veiller's smashing drama of modern conditions in New York life, which will be seen at the Grand tonight. This is the play which ran over 600 nights at the Eltinge theatre in New York. It has been called "the play the presidents go to see," because both Woodrow Wilson and Theodore Roosevelt have not only enjoyed the performance, but have written of it in highest praise to the author.

"Within the Law" is the timeliness of the topics with which it deals. It tells the story of a shop girl, underpaid and underfed, who is unjustly accused of theft. The evidence against her is so slight that her employers' intervention might save her. "Mary Turner," after three years of prison life, determines to find her revenge. She becomes associated with a band of criminals, and proceeds to prey upon society in an ingenious and successful fashion. All her schemes for getting money are carried on "within the law," and though, to quote the play, "she makes a shonkey of the police department," she manages to evade arrest, and even to laugh at the authorities.

PROBS. Fresh to strong winds, cool with showers. Wednesday, fresh winds, fair and cool.

The Mayor and Council
Have Proclaimed
Thursday, Friday and Saturday
Clean-Up Days

So to fall in line we beg to announce for the three days the greatest
