

THE SPORT REVIEW

CENTRAL AGAIN WINS PUBLIC SCHOOL LEAGUE GAME.

A Senior Sunday School Baseball Series to be Formed—Motor Boat Races on Wednesday Evening.

The baseball team representing Central school, in the Public School Baseball League, secured another victory, on Monday afternoon, at the cricket field. The Central aggregation crossed the plate sixteen times, while their opponents, Louise school, were doing the deed twice. At no time during seven innings was the victory for Central in doubt, and for the first four innings Louise never scored. It is too bad that there is no convenient way of handicapping the boys from Central school, and as long as they are in the league with their present team, the other schools lose heart. So far no good way has been found, so that the bigger boys would have to work for their games. The line-up was: Central—Rea, c.; McGall, 2b.; Fenning, 3b.; H. Abramsky, 1b.; Baker, p.; Navan, c.f.; Linton, 1b.; S. Abramsky, c.f.; Pritchard, s.s. Louise—Harlett, c.f.; McCartney, p.; McKee, c.f.; Merahan, 2b.; Robertson, s.s.; Van Alstyne, 3b.; McKelvey, 1b.; Searle, 1b.; Gow, r.f.

The score by innings was: Central 3 0 0 5 3 1-16 Louise 0 0 0 0 1 0-2

Motor Boat Races Wednesday.

There are to be some good motor boat races on the morning of June 3rd and judging from the interest taken in them by the various owners of this craft it looks as though competition was going to be quite keen. A few days ago entry forms were distributed among these enthusiasts upon which four races were enumerated. Whoever it was that drew up this compilation of races knew "what was what" and has favored all classes of local craft where-by there is a good chance for all motorboat owners to make good. These races are the following: (1) Two mile race, for all boats powered with single engines. For local boats only. (2) Two mile race, for all boats powered with two cylinder engines. For local boats only. (3) Four mile race, handicap, for any boat that runs better than fifteen miles. For local boats only. (4) Ten mile race, open.

The last two races are sure to be hummers and already some few entries have been forwarded to the chairman, I. C. Lockett.

Athletics vs. Victorias

Athletics and Victorias meet for the second time next Saturday afternoon at the cricket field in the fourth game of the city baseball league. Victorias must defeat the Athletics if they intend holding the second position in the league. The two wins the Ponies have attained so far this season has placed them at the head of the league. Victorias lost to the Ponies in the second game of the series.

"Tom" McCammon will likely hurl for the Victorias while Little will be on the mound for Athletics. During the last two games which have been played, all three teams have made numerous errors.

Ponies vs. Belleville

The Ponies baseball team will play in Belleville on Wednesday afternoon, June 3rd. "Punch" Derry will pitch for the local team.

Notes on Sport

Five home runs were made in the London-Ottawa games Sunday at Hull, Que., the Ottawa club's Sunday field. There is a very short left field fence there which accounted for some of the homers.

The Canadian cadets easily won the match at Portsmouth, England. The scores were: Canada, 576;

SURVIVORS—MOST SALVATION ARMY FOLKS FROM THE EMPRESS. Heading from left to right: Captain Spooner, Major McIntyre, Ensign Pugmire, Major Atwell, Mrs. Atwell, Little Grace Hanagan, whose parents, Baudmaster and Mrs. Hanagan both were drowned, Miss Eva Bales, and Mrs. Cook of Vancouver.

Hampshire cadets, 512; officers' training corps, 499; Hampshire, 448. Six prizes for individual scores were all awarded to Canadians.

Players Ben Bebee, of London, and Schultz, of Toronto, Canadian league teams, have been suspended for three days and fined \$25 each for fighting at London. Manager Reising's case is laid over for a week for further evidence as to whether he was acting as peacemaker or not. Meanwhile Reising may play.

Although Willie Ritchie was soundly thrashed by Charley White in Milwaukee on Tuesday night, his bout with Freddie Welsh in London on June 29th has been clinched. Ritchie, who is to receive \$40,000 for his bid, will sail for England on June 6th. Welsh, it is reported, will probably sail for the other side to-day.

LAWNS SHOULD BE CUT LONG

Cuttings Should be Left to Protect Roots

Washington, D. C., June 2.—Grass should be cut "long" so that the roots will be protected after the cutting. This means, says the department of agriculture's landscape gardener, that the lawn mower should be set just as high as it will go.

Lawns should be cut frequently and in ordinary cases, where the cuttings are normal, notwithstanding the contrary opinion of the energetic person who follows up his cuttings by raking with an iron rake. Lawns should never be raked with an iron rake, except to prepare them for the sowing of grass seed, for such raking harrows up the soil. Neither should they be swept.

If the diligent caretaker of a lawn must follow up the cutting by some other operation, only a wooden rake should be used, and this should be employed carefully so as not to disturb such of the grass cuttings as have sifted down around the roots. These grass clippings that settle around the roots afford them a very important protection and will do much to keep the lawn in fine condition when there is lack of rain later in the season, for they will hold the moisture and act as a shield from the sun. In fact, the grass cuttings are generally needed about the roots, and should not detract from the looks of the lawn, for they soon shrivel, dry up, and work their way down, so that they are no longer noticed. Grasses are naturally cool-climate plants and are liable to be harmed by the hot sun about the roots.

MILLERS AT THE CAPITAL.

The Question of Ocean Freight Rates on Flour.

Ottawa, June 2.—Representatives of the Dominion Millers' Association will take up with Hon. George F. Foster, minister of trade and commerce, the question of ocean freights on flour.

The deputation consists of Messrs. Goldie, of Guelph, Nelsie, of Newmarket, of Ailsa Craig, Watts, of St. Marys, and Moore, of Meaford. This is the second deputation from the Dominion Millers' Association, a former having asked the government to establish a line of ocean freight steamers to bring down the steadily advancing rates on flour for export. The present deputation, it is understood, will ask for immediate action of some kind by the government to regulate rates.

PORT NELSON ELEVATOR

Work on the Structure is Now Progressing.

Ottawa, June 2.—Work has commenced on the government transfer elevator at Port Nelson. Plans for this elevator were made by the Canadian Stewart company. The grain commission has handed over to the board of railways and canals the construction of the foundations of this elevator and this is the work now under way. It was thought that by so doing greater progress could be made. Part of the material necessary for this work was sent in last year and the first boats for the Bay this season will take in enough more for this year's work. As soon as the foundations are completed the grain commissioner will arrange for the construction of the superstructure.

Preston, Brock street, has received all his spring and summer goods for his order clothing department, also in ready-made clothing and gents' furnishing department. They are all well assorted with new goods. Gilbert's Ice cream bricks. Sold only at Prince's Drug Store, Telephone 32.

INQUIRY INTO WRECK

BILL IS BEFORE THE HOUSE OF COMMONS.

Limit to Damage Claims—Body of Great Hunter Identified—Ottawa Victims of the Empress.

Ottawa, June 2.—A bill to provide for special investigation of the disaster to the Empress of Ireland was put through all its stages except third reading in the House of Commons yesterday.

The bill was introduced by the Hon. J. D. Hazen. He stated that the present law provided that in the case of shipping accidents the minister had power to appoint one commissioner and assessors. The commissioner may be an official of the government, a judge of the superior court, of the county court, or of the admiralty court, or a stipendiary magistrate.

Owing to communications received from the home authorities it was thought desirable to constitute a special court to enquire into the foundering of the Empress of Ireland which would carry more weight than would be the case by the finding of an ordinary court.

Limit to Damage Claim

Montreal, June 2.—In the matter of liability for loss of life at sea, the Merchant's Shipping Act of Britain, provides limitations for steamship owners. Where improper navigation has been shown, the vessel is liable to a maximum of £15 for every ton of her net shipping tonnage, plus tonnage for her engine room space.

The net tonnage of the Empress of Ireland is 6,028, and 2,000 tons can be allowed for her engine room and boiler space, which, therefore, leaves her owners open to damage claims amounting to about £150,000 at the most, should fault be attributed to Captain Kendall or his officers.

The Stordad on the same basis of tonnage, is limited in damage to about £68,500 at the most. Her net tonnage is 3,551, and local authorities allow about 1,000 tons for her engines and boilers.

In both vessels the crew space is privileged from damage estimates and claims.

Sister Took Her Place.

Quebec, June 2.—Numbered among the dead yet walking the mortuary chamber at shed 27, in vain search is the statue of Miss Lily Ingleton, of Hamilton, Ontario, who, before 1 was to start for Montreal for the trip home to see my parents I decided I would not go for a little while," she said. "My sister Violet took my place gladly. Now she is gone."

King Aids Relief Fund.

London, June 2.—The Empress of Ireland relief fund subscriptions include: The King, £300; Queen Mary, £250; Sir Harry Poland, K.C., £100; Commercial Travellers' Association, £25; Lord Derby, £200; Countess Derby, £25. The Liverpool fund already totals £1,500.

CHURCH ISSUE IN PRESTON

Mayor and Clergyman at Odds Over a Procession.

London, June 2.—The mayor of Preston, Lancashire, and the chief constable, have banned the carrying of the statue of the Madonna and child by the Roman Catholics in processions yesterday. The priest concerned replied that he would adhere to the programme unless satisfied that in so doing he was breaking the law. Preston is renowned for the religious sensitiveness resulting in frequent riots.

So far as goodness is concerned, none of us are in any particular danger of being over-estimated.

Beware of ointments for catarrh that contain mercury as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price 15c per bottle. Hall's Family Pills for constipation.

Easy & Practical Home Dress Making Lessons Prepared Especially For This Newspaper by Pictorial Review

A REMODELED DRESS. Although it is one of the latest designs of the season, this dress is really a "make-over." The upper part is formed from a dainty silk left from last season, while the lower part is of crepe de Chine. The same idea may be employed with any two materials, with splendid results at small expense. A lawn or silk lining may be used for the waist, and it will probably be necessary to have a bit of new lace for the vest and neck. A yard of 27-inch satin will make the girde, which should be finished at the back with a large bow. For the outer blouse, close the under-arm and arm seams, hem the back on both sides and add hooks and eyes. Gather lower edges to the size of stay and stitch the same. Now adjust the bib, back and front, being very careful to see that the ends are even and well-pointed. This may be outlined with a piping of silk or satin if desired. Take the skirt, slash down the center back fold of back gore from upper edge to large "O" perforation for opening. Pleat as perforated and bring folded edge to small "o" perforations; then stitch. Join the gores, matching the notches and if there is any unevenness let it come out at the bottom of the skirt. Pleat extension creasing on slot perforations, bring folded edge to small "o" perforations and press. Close back seams of flounces from large "O" perforations to lower edges; finish edges above for openings. Gather upper edges between double "IT" perforations. Adjust to position on skirt centers even, stitching gathers in lower flounce along small "o" perforations and bringing double "oo" perforation to side seam; stitch upper edges of upper flounces and skirt together, small "o" perforation in flounce at seam. Sew skirt to lower edge of waist centers even.

Above Patterns Can be Obtained from Newman & Shaw, Princess Street
