CITY COUNCIL TO CALL

FOR TENDERS FOR 50,000 YARDS OF SHEET PAVING

In the Residential Area—Permission Given R. W. and Monk to Quarry Stone in No Name Street.

The City Council spent two hours and a half on Monday night discussing three Board of Works questions. The results of its lengthy deliberations and some warm cross-firing were to call for tenders for 50,000 square yards of sheet paving in residential sections; giving Roddy and Monk permission to do a little quarrying in No Name street and to have the Board of Works chairman and the city engineer to consult with H. McRow, as to whether he was not overstepping his agreement in selling so much stone to the road contractors, and out of the city's quarry.

In attendance at the meeting were: Mayor Shaw, and Alds. Bawa, Cooper, Clugston, Graham, Hanley, Hoag, Hughes, Kent, Litton, Newman, Nickle, O'Connor, Peters, Richardson, Sutherland and White.

On the motion of Ald. Hoag, A. H. Muir was appointed city clerk during the absence, on leave of Dr. W. W. Sands.

These communications were read: W. L. Driscoll applying for the position as building and scaffold inspector.

Alexander Fowler for position of scaffolding inspector.

E. E. Newman, re. removal of tree at corner of Earl and Clergy streets.

Report of special committee appointed to interview Messrs. Foley and Gleeson re. foreign labor.

Capt. M. VanDresar, re. street watering on Stuart street, from University avenue, west of St. Lawrence avenue.

W. E. Carey and W. E. McNeill re. walk in Alice street, west side from Albert street, entirely to east limit lot, 2.

The Finance Report.

These recommendations of the finance report were adopted:

That the following accounts in connection with the visit of H.H.M. governor-general be paid, no funds having been provided for same in the budget: Finkle & Co., \$5; Frank W. Cooke, \$24.30; The Jackson Press, \$1; Edith E. Shaw, \$100; J. Sinnott, \$81.

That the request of the Public Utilities commission for \$650 for gas mains on Victoria street and Chestnut street be granted.

That W. W. Sands, city clerk, be granted one month's leave of absence.

Road Paving.

On recommendation of the Board of Works the council decided to pave the following streets and instructed the city engineer to call for tenders:

Aberdeen street, from Johnson to Earl

Barrie street, from Princess to York

Clergy street, from Brock to Ordinance

Earl street, from King to Bagot

Earl street, from Barrie to Albert

Frontenac street, from Union to Princess

Gore street, from King to Bagot

Johnson street, from Wellington to Bagot

North street, from Ordinance to Barrie

Ordinance street, from Sydenham to North

Sydenham street, from Princess to Ordinance

Union street, from King to Bagot

University avenue, from Stuart to Princess

West street, from King to Earl

William street, from King to Bagot

William street, from Barrie to University

York street, from Barrie to Ordinance

Ald. Graham held that the Barrie street pavement on a macadam base was good enough for Kingston's residential streets.

Ald. Litton explained that some of the streets might be paved on a macadam base, but there were some others which should have a concrete base, as for instance a new street like Aberdeen avenue.

Mayor Shaw thought that with the paving experience the council had this year, it should decide to call for tenders for a definite kind of paving material.

Ald. Nickle declared that if the City Council could afford to expend \$125,000 for sheet paving, it should buy its own plant and do the work itself. It could save more thereby.

The Board of Works recommendation was changed to read to call for tenders for laying 50,000 yards of sheet paving on concrete or macadam base.

The city engineer will enquire into the cost of a plant, and as to what it would cost if the city did the work itself.

The Board of Works also recommended that the tender of the Patterson Manufacturing company, of Montreal, for 16,000 imperial gallons of tarvis at ten and a half cents a gallon be accepted, on condition that they supply a man to superintend the application of the same to the satisfaction of the city engineer.

Permission to Quarry.

the council cancel the agreement with Henry McRow, regarding the selling of stone from the city quarry to outside parties, in two weeks' time.

Ald. Graham said he had learned that Mr. McRow, who supplied the city with stone by contract, was selling wholesale out of the city quarry.

According to the agreement between the city and Mr. McRow, the latter was allowed to sell all the surplus stone he crushed, and which was not needed by the city, on paying the city fifty cents a ton.

There was a long discussion as to whether the agreement could be cancelled, it being held by some of the aldermen that it ran concurrently with Mr. McRow's contract with the city.

It was finally agreed to have the chairman of the Board of Works and the city engineer interview Mr. McRow and come to some satisfactory arrangement whereby he would not use so much of the city's quarry. Ald. Hoag withdrew his motion.

THE SPORT REVIEW

Both Fabre and Duffy Are Out and Out Pros.

Fabre and Duffy, the so-called amateur runners, got only what they deserved when they were suspended by the amateur unions of Quebec and Ontario. They're nothing but professional runners, and might just as well announce themselves as such. They didn't come to Kingston for nothing.

Montreal Herald:—There is a big possibility that Fabre will now take one more hop, this time to the professional ranks and will take up running for purpose. Fabre has been tempted on more than one occasion and has only remained amateur through the entreaties of his friends, but now when he can no longer hold an amateur card, chances are that he will throw care to the winds and take the leap.

Walsh of Rochester leads the International League with .522. His team mate, Schmitt, is next with .362, and then come Sullivan, Toronto, .360; Kritchell, Buffalo, .342; Derrick, Baltimore, .341; Tooley, Newark, .340; Bugz, Jersey City, .331; Cree, Baltimore, .324; J. Onslow, Providence, .322; Dovel, Montreal, and Pipp, Rochester, .320.

The auto craze is blamed for the poor showing of the Cleveland Naps. American League tail-enders, in a sport page editorial in the Cleveland Press. Speaking of Birmingham's men, the editorial says: "They drive to the baseball park in automobiles, and when the automobile fever infected the Naps the club began to lose effectiveness. That was last year. The craze spread—every player secured a car—and the team began to go back."

PICTON'S NEW RECTOR

Inducted on Sunday By the Bishop of Ontario.

Picton, June 8.—The Lord Bishop of Ontario visited the Church of St. Mary Magdalene, Picton, yesterday evening and administered the rite of confirmation to fifteen young people, and also inducted the new rector of Picton, Rev. F. Louis Barber, L.H. There was a rather interesting ceremony of the dedication of the new organ given by the Ladies Guild of the church, and of a beautiful new stained glass window given by the Barner family in memory of the late Judge Jellott, of this town. As this was the first visit of His Lordship since the opening of the new church, he took the opportunity of congratulating the congregation on the fact of having such a beautiful large and comfortable place of worship.

The Rev. S. B. Lindsay, B.A., accompanied the bishop and took part of the services. The former rector of the parish, Rev. Canon Loucks, was also present. The church was crowded and there was a crowded congregation.

Earlier in the day the Lord Bishop had visited Waspos and Wilford, where he had also preached and administered the rite of confirmation.

ROSY AND PLUMP

Good Health, From Right Food.

"It's not a new food to me," remarked a man, in speaking of Grape-Nuts.

About twelve months ago my wife was in very bad health; could not keep anything on her stomach. The doctor recommended milk, half water, but it was not sufficiently nourishing.

"A friend of mine told me one day to try Grape-Nuts and cream. The result was really marvellous. My wife soon regained her usual strength and to-day is as rosy and plump as when a girl of sixteen."

"These are plain facts and nothing I could say in praise of Grape-Nuts would exaggerate in the least the value of this great food."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

BIG WATER LEAKAGE

WAS DISCOVERED BY INSPECTION CARRIED ON.

R. H. Toye's Plan Will be Continued All Over the City—In Small Area There is Waste of Over 800 Gallons a Day.

When R. H. Toye, a few weeks ago, at a meeting of the Civic Utilities Commission discussed the question of leakage from water taps, and asked that an inspector be put on the job to make an inspection, he certainly made a good move.

The members of the commission at their meeting on Monday afternoon received the first report of the inspector, and it was of an alarming nature, showing that in just a very small area just taking in three streets there was an enormous leakage of water. The estimate was that between eight and nine hundred gallons of water were wasted every twenty-four hours. In his report the inspector said:

"On Ontario, King and Wellington street there are forty-two closets and twenty-six taps leaking. I should judge that there are between eight and nine hundred gallons of water wasted every twenty-four hours."

That the money had been well spent, on the inspection was the opinion of all the members, so much so, that it was decided to keep the inspector at work.

"We must not stop this," said said Chairman Rigney, when the report was read, and the members were agreed on the question.

At a recent meeting Mr. Toye suggested that the inspector be appointed to go over a small area for the purpose of making the belief that there was a great leakage of water as the result of faulty taps.

Manager Folger stated that Mr. Toye's idea was a good one.

Mr. Toye made a further suggestion that self-closing taps would be a good thing to prevent so much waste of water.

The chairman, T. J. Rigney, presided at the meeting, and the other members present were Mayor Shaw, R. H. Toye and J. H. Birkett.

The business of the meeting was for the most part of a routine nature.

On the recommendation of the manager, water main extensions asked for on Elzabeck and Victoria streets, and on Alvington avenue will be proceeded with.

The manager was given authority to proceed with the renewal of gas and water services on Princess street between Clergy and Barrie streets.

A letter was received from the three local moving picture theatres regarding the change from direct to alternating current, pointing out that the change would mean an extra outlay of \$1,600, while at the same time the license fee would be due, making the expense \$2,200. The request was made that the theatres receive some consideration.

The commission is bound in this change of current by the report of the expert, Ketch, made to the commission last year.

Mayor Shaw said he did not know if the change in current was wise or unwise.

"But I am beginning to think that the move was an unwise one," he added.

The commission will arrange for a pipe to be laid to furnish water for the Bagot street dump. The chairman was convinced that the dump was a source of great nuisance to the people in the neighborhood.

HUGE SWINDLE ALLEGED.

Belgian on Trial on Charges of Getting Millions Wrongfully.

Brussels, Belgium, June 9.—The trial began here of Nestor Wilmart, formerly a prominent banker and sportsman, who, with six associates, is accused of swindling the public out of about \$3,400,000 by the over issue of shares in the Great-Ternouzen railroad. The first reports gave the sum as \$10,000,000 or \$12,000,000.

The operations of the accused placed twenty-four small Belgian banks in difficulties and ruined hundreds of small investors, as well as causing a loss of \$80,000 to the state savings bank.

The chief prisoner and his accomplices are said to have possessed a private printing press with which they produced bogus bonds of the railway.

With the proceeds of his operations Wilmart kept up several country residences and a large racing stable. He was a director in several banks and prominent in politics. The hearings are expected to last six weeks.

The Crisis in England

London Chronicle.

It is worth noticing how one by one weapons on which unionists meant to rely have broken in their welders' hands. Parliament today is the dash of that race's hopes—once more; and therefore, that, in Mr. Redmond's words, no matter how the general election comes and no matter which British party it returns to power, "the union of Pitt and Castlereagh can never be again set on its feet, and the assembling of an Irish parliament, under the provisions of the Home Rule Bill, is as certain as the rising of to-morrow's sun."

LETTERS TO THE EDITOR.

A Blas for the House Fly Set Forth By Writer.

Kingston, Ont., June 8.—(To the Editor): Whereas, the K.H.S. and other Humane Societies are paying good attention for the prevention of cruelty to animals and to the abolition of vivisection, I have never noticed any protest raised against that atrocious method of torture to the annoying house fly. The sticky fly paper, by which billions of these pests are allowed to die a slow and painful death. Not only is the method of extinction cruel, but dangerous to human life. The wretched flies when dead, are lying round in billions on these innumerable papers of torture and decomposition, filling the air with poisonous microbes of probably yet unknown diseases to wit, infantile Paralysis, a new and alarming disease and which I believe is still keeping the doctors guessing as to its origin and particular microbe.

A law should be passed, to at once prohibit the use of sticky fly papers, the poisonous fly and is much more humane and not so dangerous to human life, but, the best of all, is the globular wire screen trap which catches the flies quickly and by millions. These traps can be plunged in boiling water once a day, thus killing the flies instantly, when the bodies can be emptied into the fire and burnt up.

Trusting that the Kingston Humane Society will also take this up with other humane societies, I am, JUST A MAN.

Parents Should Know Where Their Daughters go at Night.

Kingston, June 8.—(To the Editor):—There is one thing which some parents are very lax about and that is the way in which they let their children, especially their daughters, wander about the streets at night without knowing their whereabouts. The girls come home in the evening, dress up and hardly before they have the last morsel of their supper eaten they are ready for the street again.

Now the question arises, where do some of these girls go? It would be safe to say that some of their parents do not know where. I could name five or six business places in the city where young men and girls put in the greater part of evening. The time is spent more in revelry than in business matters; still to see these parties leaving these offices again, somewhere between eleven and twelve o'clock at night one would almost think that the cares of the world were upon their shoulders.

A short while ago a certain place had such frequenters making their abode until the early hours of the morning, but the police rounded up the party.

It is now almost time that some other places, that the police themselves know about, were brought to account.

I would strongly advise the parents to keep a check upon their boys and girls, for if not the inevitable is sure to happen and bring disgrace to some families.—Observer.

At the End of the Rainbow.

This drama will be presented in St. Luke's hall, Wednesday, June 10th, at 8 o'clock.

Engagement Announced.

Dr. Chase is No Stranger

In This Home—Receipt Book and Medicines Kept at Hand All the Time.

There is no better safeguard against disease and suffering than a good cathartic medicine. In a great majority of homes Dr. Chase's Kidney-Liver Pills are constantly kept at hand, because they quickly awaken the action of the liver, kidneys and bowels, and cure the most common ills of life.

Mrs. Thos. Smith, Jamestown, Ont., writes: "Dr. Chase is no stranger in our home, for we have two of his Receipt Books in the house. My father and my husband's father each had one, and I have been familiar with it ever since I can remember. It was only natural that we should use the Kidney-Liver Pills, and we found them so satisfactory in regulating the digestive system and curing the common ills of life that we always keep them on hand. Many a time these pills have saved me from much suffering and prevented serious disease. We also keep the Ointment in the house all the time."
