Denmark Marine Risks

Government Commission Announces Special Arrangements. Copenhagen, Aug. 19.—The government commission for the regulation of the prices of food stuffs, etc., announces that the ministry of home affairs will assume three-quarters of the risk of sea-transportation on cargoes to and from Denmark on condition that the insurance companies take the remaining quarter. This arrangement has been specially made on account of the scarcity of coal in Denmark. The commission says that if England maintains her decision to guarantee three-quarters of the value of coal exports, the difficulty confronting Denmark will doubtless be overcome.

OWES HER LIFE TO "FRUIT-A-TIVES"

Cured Both Stomach Trouble and Headaches

PALMERSTON, ONT., JUNE 20th, 1913. "I really believe that I owe my life to 'Fruit-a-tives'. Ever since childhood, I have been under the care of physicians and have been paying doctor's bills. I was so sick and worn out that people on the street often asked me if I thought I could get along without help. The same old Stomach Trouble and distressing Headaches nearly drove me wild. Sometime ago, I got a box of 'Fruit-a-tives' and the first box did me good. My husband was delighted and advised a continuation of their use.

Today, I am feeling fine, and a physician meeting me on the street, noticed my improved appearance and asked the reason. I replied, 'I am taking Fruit-a-tives'. He said, 'Well, if Fruit-a-tives are making you look so well, go ahead and take them. They are doing more for you than I can.' Mrs. H. S. WILLIAMS.

Stomachs Kept Doctor Busy

"An old-fashioned doctor, a number of years ago, told us stomachs kept him busy. And he argued that a more conscientious care of the stomach would practically put his profession out of commission."—National Food Journal, June, 1914.

It was a new process of milling that had considerable to do with keeping this old doctor on the jump. This process—which made flour look white and pretty—unfortunately removed nearly all of the really vital mineral elements of the wheat—the invaluable phosphate of potash, etc. This kind of milling has now become almost universal. Think what it means to deprive the system of these elements which are necessary for its daily rebuilding?

Grape-Nuts

—a delicious food made of wheat and barley, contains all the nutriment of the grains, including their mineral elements. Many forms of stomach trouble are due to a lack of these elements in daily food; and a regular ration of Grape-Nuts and cream along with other food is admirable to set one right.
