The days before the order came for mobilization this old woman of the cradle was one of the happies in Normandy. She had five great sons, who lived with her upon the farm that had been in her family name since William the Conqueror sailed out of the River Dives for England. They owned horses and cattle and sheep, and their granaries were filled. Harvest time came, and her sons and their men went at the standing grain.

There are enough men guarding country roads and forty dollar culverts and sitting about rural guardhouses to have saved the harvest.
