Real Estate Fire Insurance

**COMB SAGE TEA IN LIFELESS, GRAY HAIR**

If Mixed With Sulphur It Darkens So Naturally Nobody Can Tell.  
Grandmother kept her hair beautifully darkened, glossy and abundant with a brew of Sage and Sulphur. Whenever her hair fell out or took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Witch's Sage and Sulphur Compound" you will get a large bottle of this old-time recipe, ready to use, for about 50¢. This simple mixture can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, itchy scalp and falling hair.  
A well-known down town druggist says everlastingly "Witch's Sage and Sulphur, because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and abundant."

**500 Cakes**  
On Saturday we will give free to each customer making a purchase of 25 cents or over a full size cake.  
**Finest Toilet Soap**  
At any time everyone appreciates something for nothing. No soap with our usual good service and goods, we send you this soap.  
**FREE**  
While it lasts. Make up your drug lists and shop early.  
**SATURDAY**  
And do not forget to shop always  
**AT BEST'S**  
Satisfactory Druggists and Opticians.  
Open Sundays, 1.30 to 5; 6.30 to 9.

**JENKINS' New Fall Styles Now Ready**

Be sure to make an early selection. Don't wait until the most attractive patterns are sold out. We can't repeat this season. Give your order and we will hold the clothes for you.  
Every pattern a special. No advanced prices on any of our lines this year.

**AGRICULTURAL TOPICS FOR WHIG READERS**

**Spraying To Kill Dandelions.**  
The Ontario Agricultural College has been conducting investigations for several years with the object of discovering some less laborious method of eradicating dandelions than spreading them out. Very encouraging results have been achieved by spraying iron sulphate. A twenty per cent. solution is used and it has been found that six sprayings during the season will kill ninety per cent. of the weeds. In spraying lawns, the solution may be applied with a hand sprayer or a watering can with a very fine rose, so that all dandelions will be thoroughly drenched. About forty-eight hours after application, the dandelion leaves will be found to be blackened and burned. These can be raked up and the plot left for about two weeks till new leaves appear, when another spraying may be given. No permanent injury is done to the grass, but white Dutch clover is almost entirely killed. The process has the further merit of being inexpensive.  
It should be mentioned that other experimenters, both in the United States and Canada, have not found iron sulphate satisfactory for the destruction of dandelions, but the results obtained at the O.A.C. warrant giving it a trial on badly infested lawns.

**Poultry Pointers.**  
Early disappointment is not uncommon among beginners in poultry keeping who purchase their first flock in the fall of the year. At this season the hens are usually in heavy moult and the young stock not yet matured. Hens will take from forty-five days to two months or over to complete their moult, and during this time their egg production is usually very low, if indeed they lay at all. Whether they will resume their laying after the moult is completed, or not, depends on when the moult takes place, if it is quickly completed, and also, to a large extent, whether the hen is from a winter laying strain or not. In any event it is not likely that hens that have not yet completed their moult will do much egg laying before November. Indeed, if they are not well cared for, both during the moult and after, eggs may not be forthcoming until after the first of the new year.  
Pullets of the heavier breeds hatched during March or April should, if properly cared for, commence laying in October or November and continue to do so throughout the winter. Pullets of the lighter breeds hatched a month or two later should come into laying about the same time, though they do not stand the cold weather as well as the heavier kind and are not generally as reliable winter layers.  
As a rule it is the early hatched pullet that supplies the winter eggs. A beginner is much more likely to succeed in getting results from pullets than from hens, largely because there is little danger of overfeeding pullets while there is great danger of hens becoming overfat in the hands of an amateur through over-feeding.  
Whether hens or pullets are purchased, the beginner must exercise patience and not be discouraged if the fowl fail to deliver the goods during the early fall months. As a rule it is the early hatched pullet that does the winter laying and for this reason beginners should try and secure them, and having secured them, so manage the flock that they will put forth their best efforts when eggs are scarce and consequently high priced.

**The Cream Separator.**  
At the Pardu experimental station, Indiana, very exhaustive tests were carried on to show the tremendous losses through wrong operation of cream separators. A separator was run at its normal speed of fifty-five turns to the crank handle per minute. Fifty pounds of milk were run through the separator. At this speed it delivered 45 lbs. of skim milk and 5 lbs. of cream. This cream tested 2.11 lbs. of butter-fat. When the speed was increased to seventy-five turns per minute the skim milk discharged was 46 1/2 lbs., reducing the cream to 3 1/2 lbs. And the amount of butter-fat was slightly less than when the separator was turned at normal speed.  
Next, a test was made by letting the speed of the machine drop down to that at which it has been found that the average dairyman operates a cream separator, with the astonishing result that the discharge from the "cream" spout went up to 9 1/2 lbs., but it tested only 11 per cent. of butter-fat—only 1.04 lbs. of fat out of 50 lbs. of milk, as against 2.11 lbs., when the separator was operated correctly.  
Dairymen, says a writer in the "Scientific American," are losing 20 to 50 per cent. of their butter-fat with every operation. This is a matter of waste that is simply appalling when the aggregate figures of all the dairymen in the country are considered. It probably runs into thousands of dollars with each daily milking.  
Now a speed indicator has been invented to be applied to cream separators, mounted on the crank shaft of

the separator. As a separator handle is turned, the exact number of revolutions per minute that the crank handle is making is shown in definite figure, so that it may be read at a glance. There is no calculating to be done; it is only necessary to keep on turning the crank-handle until the proper speed is reached, and then continue at that exact speed throughout the separation. This eliminates all work entirely. It also adds zest to the otherwise monotonous operations, particularly where the separator requires upwards of an hour's turning, as it does in many instances.  
**Ploughing Neglected Art.**  
The art of ploughing, if not lost, has certainly been much neglected during recent years and very few of the younger generation of farmers have really acquired it. In travelling through the country one sees repeated evidences of the lack of interest in this very important branch of tillage operations. Ploughing, as the first and heaviest operation in preparing the soil to receive the seed, should receive particular attention.  
Many attribute the present-day lack of interest in ploughing to the advent of the two-furrow and machine plough. In using two-furrow or machine ploughs it is necessary first to acquaint oneself with the workings and mechanism of the plough with which one is familiar, no difficulty with operation; little or no need in obtaining satisfactory results. A plough suitable to the soil should be chosen. If the soil is loamy, and requires to be turned, it is, of course, a plough with sufficient width of share, turning capacity, a beam high enough to permit the use of the double mouldboard, and sufficient length of handles to enable the ploughman to control it with ease. If the soil is heavy and inclined to cement, use a narrow plough—one that will set the soil up, give a good harrow edge, and have sufficient press to the board so that it will not fall back. In using a single or two-furrow plough, care should be taken to turn over the whole furrow and to leave no part unploughed. Get away from the boys that anything worth doing is worth doing well, especially ploughing. The old adage that more grain grows on crooked furrows than on straight ones is a poor incentive, and is not helpful, in building up a reputation as a model farmer. Plough the back field as carefully as the field adjoining the road, and see that all fields are ploughed in such a way as to attract attention by their neatness. It is cheap and efficient advertising. Good ploughing pays, a fair crop can be grown on a field which has been poorly ploughed, a better crop can be grown on a well ploughed field.—F. C. N., in "Conservation."

**MOTHER! GIVE CROSS, SICK CHILD ONLY "CALIFORNIA SYRUP OF FIGS."**  
If Peevish, Feverish, Tongue Coated, Give "Fruit Laxative" at Once.  
No matter what ails your child a laxative should be the first treatment given.  
Look at the tongue, mother! If coated, it is a sure sign your "little one's" stomach, liver and bowels need a gentle, thorough cleansing at once. When cross, peevish, listless, pale, doesn't sleep, eat or act naturally; if breath is bad, stomach sour, system full of cold, throat sore, or if feverish, give a teaspoonful of "California Syrup of Figs," and in just a few hours all the clogged-up, constipated waste, sour bile and undigested

food will gently move out of the bowels and you have a well, playful child again.  
Sick children needn't be coaxed to take this harmless fruit laxative. Actions of mothers keep it handy because they know its action on the stomach, liver and bowels is prompt and sure. They also know a little given to-day saves a sick child to-morrow.  
Ask your druggist for a 50 cent bottle of "California Syrup of Figs," which contains directions for babies, children of all ages and for grown-ups plainly on the bottle. Beware of counterfeiters sold here. Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt.

**Produce And Prices.**  
Kingston, Oct. 2.—The market clerk reports the following:  
Meat, beef, local, carcass, 11c; carcass, 10c; 10c; mutton, 12c; 12c; live hogs, \$9.75; dressed hogs, 14c; pork, 12c; lamb, 16c to 18c per lb.; by quarter, western beef, 14c to 15c; by carcass, J. A. McFarlane, Brook street, reports grain, flour and feed selling as follows:  
Oats, 60c per bush; wheat, \$1.15 per bushel; yellow corn, 95c per bushel; bakers' flour, 95 lbs., \$3.25 to \$3.50; cornmeal, \$2.25 per cwt.; bran, \$25.50 per ton; shorts, \$28; baled straw, \$8 per ton; pressed hay, \$9 a ton; pressed hay, \$15; ground and cracked corn, \$1.80; molasses meal, \$1.90 cwt.; buckwheat, 90c bush.  
The Dominion Fish company reports the following prices: Whitefish, 15c lb.; pike, 12c lb.; blue fish, 15c; chinook salmon, 30c per pound; fresh haddock, 12c per pound; teal cod, 12c per pound; 15c per lb.; mackerel, 15c per lb.; pickerel, 15c per lb.; kippers, 60c; dozen; finnan haddies, 12c per lb.; oysters, 50c and 60c a quart.  
Poultry—Fowl, 70c to 90c a pair; chickens, 60c to 80c a pair; ducks, \$1 to \$1.25 a pair; turkeys, \$1.50 to \$2 each; live fowl, 60c to 70c a pair.  
Dairy—Butter, creamery, 35c to 35c; prints, 30c to 32c; rolls, 27c to 30c; eggs, 26c doz.  
Vegetables—Onions, 25c to 30c pk; parsley, 7c bunch; beets, 50c doz; cabbage, 20c per dozen; radishes, 5c a bunch; cucumbers, 10c to 15c a doz; potatoes, 50c to \$1 a bag; apples, 25c a pk; pumpkins, 10c each; corn, 15c to 25c a doz; tomatoes, 40c to 50c a bush; turnips, 75c a bag.  
H. H. Toye quotes fruit thus: Bananas, 10c to 20c a doz; oranges, 20c to 60c a doz; pears, 75c a basket; peaches, \$1.10 a basket; grapes, 25c a basket; apples, 25c to 30c a peck; watermelon, 30c to 25c each.

**HEARST IS PREMIER.**  
Toronto, Oct. 2.—Announcement is made that Hon. W. H. Hearst is the new premier of Ontario. Sir Adam Beck quits the cabinet but remains at the head of the Hydro-Electric Commission. Finlay McLeod succeeds Hon. Dr. Reaume as minister of public works.

**VICTORIAN NURSING.**  
More People Should Take Advantage Of It.  
The Victoria Order of Nurses executive met in St. George's hall on Thursday. The report for the month showed 191 visits paid. The patients were: Roman Catholics, 4; Anglicans, 4; Methodists, 3; Presbyterians, 1.  
It is a matter for regret that more persons do not avail themselves of the services of the trained Victorian Nurse, particularly in obstetrical cases. Neglect or incompetency in the care of a mother and babe often leads to serious results, even lifelong in effects and sometimes the frailty begun at birth, through lack of proper care, means a weakening through life. A card or phone call, night or day, will bring the nurse to the home of the poorest. No fee is expected, unless freely proffered, circumstances governing all cases. Mothers are also urged to seek the advice of the nurse in the care of children.  
The collection for the support of this cause will be carried on by the committee during October, when the annual report, wherein all contributions are credited, will be distributed and every contribution, however small, will be greatly appreciated by the committee. The address of the V. O. nurse, Miss Leaver, is 302, Queen street, phone 609.

**HEARST IS LIKELY.**  
To Be the Next Premier of Ontario Province  
Toronto, Oct. 1.—The atmosphere on Parliament Hill is clearing. Hon. William Howard Hearst, K.C., representative from Saint Ste. Marie, and at present minister of lands, forests and mines, will be the next premier of the province of Ontario, according to information given your correspondent to-day.  
Mr. Hearst is said to be favored by Hon. Frank Cochrane, minister of railways and canals, in the federal house, who has, of late, been taking very active interest in provincial affairs and is, at the same time, the compromise choice among other aspirants. While the second to the youngest member of the Ontario cabinet, in point of service, and with but six years experience in the legislature, Mr. Hearst is, nevertheless, regarded as the man having the greatest wielding influence upon the party.

J. E. Dairymple, G. T. R. vice-president. In charge of traffic, announces the appointment of W. P. Hinton, assistant passenger traffic manager of the Grand Trunk Pacific railway, at Winnipeg, as assistant passenger traffic manager of the entire Grand Trunk system, with headquarters in Montreal. The appointment is effective, October 1st.  
Many checks are historical only because, like history, they repeat themselves.  
Knowledge that is not used soon ceases to be knowledge.  
If wishes were horses, we would all ride in automobiles.

**TOOK PLACE ON THURSDAY.**

The funeral of the late Edmund Scrutton took place Thursday afternoon from his late residence, No. 8, Orchard street, to Cataract cemetery, service being conducted at the house by Rev. Mr. McGee, of St. George's cathedral. The cortege, a very lengthy one, was headed by the local lodge of the Sons of England, of which the deceased was one of the oldest and most valued members. The bearers were the life-long friends and brother members of the S.O.E. The floral offerings, which were beautiful, completely filled a carriage, which preceded the hearse.  
The following were the floral contributions: Wreaths, Sons of England Society, employees of Hotel Randolph, Mr. and Mrs. J. O'Connor, Crosses, Mr. and Mrs. Geo. Maxam, Mr. and Mrs. A. Scrutton, Sprays, Mr. and Mrs. Chas. Scrutton, Marion Revell, Mr. and Mrs. C. J. Rand, Mr. and Mrs. John Scrutton, Mr. and Mrs. F. Campbell, Mr. and Mrs. C. H. Pickering, Mrs. Connolly, Mrs. McDonald, Mrs. Sherswood, Sheafs, Mr. and Mrs. Geo. Cannon, Mrs. D. Egan, Mr. and Mrs. J. Lamoureux, Mr. and Mrs. Brown, Mr. and Mrs. F. Forsythe, Mr. Thomas Robinson and family, Mr. and Mrs. A. Potter, Mr. and Mrs. George Revella, Mr. and Mrs. S. Cannon, Mrs. Hagan and family, Mr. and Mrs. Charles Parachis, Mr. and Mrs. Dunlop, Mr. and Mrs. Joseph Eves, Mrs. John Randolph, Mr. and Mrs. D. Ben, Mr. and Mrs. E. Scrutton.

**ARGUED OVER ACCIDENT**

For Over Half An Hour On the Market Square on Thursday.  
An accident which occurred in front of the Whig office on Thursday afternoon, in which an automobile from Aggro's garage, and operator of a young woman, ran into a light bus, resulted in an argument which lasted over half an hour, and in which the occupant of the car and the owner of the horse and rig, Harold G. West, of Westbrooke, and several others engaged in a heated argument, and each one blamed the other for the accident, and several people who had witnessed the accident gave their view of the matter, the parties having supporters. The auto, when it smashed into the buggy, took one of the rear wheels off and it was indeed a wonder the horse did not run away. The driver was thrown out on the road.

**LEEDS TEACHERS CONVENTION**  
In Gahanoque — Chicken Killers at Neil McCarney's.  
Gahanoque, Oct. 2.—A large delegation of the school teachers of this section assembled yesterday morning in the assembly room of the Gahanoque high school for the annual convention of the West Leeds Teacher's association. At the afternoon session Miss Agnes Maule Macchar contributed a valuable paper on "The Ideal Teacher," and W. J. Karr of Ottawa Normal school gave a splendid address on "Literature in Classes." A public session was held at 8 p.m. at which Deputy Reeve W. J. Wilson and Dr. J. A. Black, chairman of the Provincial Board of Education, formally welcomed the delegates to the town. A feature of the evening was an excellent illustrated lecture on "The London and Theatres of Shakespeare's Time," by Prof. W. E. McNeill, of Queen's university. Miss Gussie Dempster favored the gathering with a solo.  
Some persons or persons wrung the necks of some twenty-five or thirty chickens belonging to Neil McCarney, proprietor of the Provincial hotel. Some of the poultry it is understood, were taken, while the greater portion was left on the premises. So far no clue to the perpetrators has been discovered.  
Dr. C. H. Bird, is in Baltimore, Maryland, taking a short post graduate course of lectures at the Johns Hopkins university.  
Miss Annie Shaneman, daughter of Oliver J. Shaneman left yesterday for New York city where she will enter a hospital as nurse-in-training.

**Notes From Colebrook.**  
Colebrook, Oct. 1.—Thomas Townsend, a respected resident of this place, aged here last Saturday evening, aged sixty-six years. The funeral service was held at the Anglican church at Camden East, who will also conduct a memorial service at the Anglican church at Yarker, Sunday, October 4th. The remains were taken to Harrowsmith vault for interment. He leaves to mourn, his widow, four sons, and one daughter, Amos, of Hartington; Malcolm, of Moscow, Earnest, of Harrowsmith, Frank of Saskatchewan, and Mrs. Alice Potter, of Ottawa. Rally day services were held in the church Sunday evening. The primary class gave a splendid chorus and recitations were excellently given by the Misses Florence Purcell, Bertha Dafoe, Florence Hart and Leta Gilligan. Mrs. H. P. Carter has returned after attending the Waagar-Gillet wedding at Enterprise.

**MISS EVELYN GARRAH, HOWE ISLAND,** daughter of Mr. and Mrs. Edward Garrah, a graduate of Notre Dame convent, Kingston, has left for Ottawa Normal school.

**LIVER ILLS**  
Are Cured by HOOD'S PILLS  
25c

**OUR TOBACCO**  
With the "Hooster" on it
