The Germans Continue Their Enveloping Move ment in the Northwest of France to Lens and Labassec.

The French Are Steadily Advancing in Woevre District, and the Germans Cannot Check Them---German Destroyer Sunk in the North Sea by Mine or British Destroyer.

Parls, Oct. 7 .- The Germans continue their enveloping movement in north-western France, according to the official three o'clock communique which states that the battle continues with great violence on the French left and has now extended to the vicinity of Lens and Labassec (Labassec is in the department of Nord and is midway between Arras and Lille while Lens is some six miles further south.)

The battle here is declared to be prolonged by the enormous masses of cavalry which are said to be centred at Armentier, near Lille.

In Woevre district, it is stated that the Germans are trying vainly to check the French steady advance. Elsewhere it is announced that the situation is unchanged.

German Destroyer Sunk.

The Hague, Oct. 7 .- It is announced that a German destroyer has been sunk either by a mine or a torpedo in the North Sea, at a point the location of which is withheld. All of the crew were saved by a German

The message received here says that at the time of the disaster this mies of Generals Von Boehn and morning, the destroyer was to the north-east of Schlernonnik, not from the estuary of Ems. Observers on the isalnd heard a sudden ex- able distance along the German plosion, and a huge mass of water arose from under the bows of the destroyer. The boat keeled over and disappeared under the waves, within three minutes. The periscopes of two submarines appeared on the scene. Their nationality could not be ascertained. A German cruiser ar rived from the estuary, the despatch says, in time to save the crew the destroyer.
