THE CITY TO PROVIDE

PUBLIC WORKS FOR THE BENEFIT OF THE UNEMPLOYED.

On the Solicitation of the Board of Trade, the City Council Decides to Take Action at Once.

A deputation from the Board of Trade, on Wednesday evening, had no trouble in getting the City Council to take immediate action with regard to providing work for the unemployed. The need of making preparations at once to meet the needs of many men who will be without the means of making a livelihood owing to industrial conditions, caused by the war, was fully recognized, and the council will do all within its power to carry out some public works that will benefit the toiler as well as the municipality.

The Board of Trade deputation consisted of President R. Meek, W. J. Nickle, H. W. Richardson, Cornelius Birmingham, R. Crawford, J. G. Elliott, R. E. Burns, Capt. J. Donnelly and F. Conway. The first four were the speakers.

Mr. Meek, after emphasizing the need for looking after the unemployed, who were willing to work, suggested that a register should be opened at the city hall in order to find out how many men were out of work and wanted something to do in order to earn a livelihood for themselves and their families. When the City Council secured the names of the unemployed and offered them remunerative work then it would have done its duty. The Board of Trade committee was appointed to render any assistance in the matter that it could.

Mr. Nickle stated that the council might do various things to provide work. Some of them were to build a public wharf in front of the city buildings, to rebuild the King street breakwater and to construct roads. He thought that work for some might be secured by co-operating with the farmers of the county. Some farmers would be willing to let their board and house young married or single men in return for what work they might perform. Owing to market conditions there were some vegetables that could not be sold, and Mr. Nickle suggested that a central depot might be opened in the city, so that farmers could draw to it what vegetables or apples were going to waste on their farms. These products could be distributed by the organized charitable bodies of the city. With regard to work that might be provided by the council, Mr. Nickle advised that care be taken to employ only men who were bona fide residents of Kingston.

QUEEN'S WORKING HARD

FOR THE GAMES WITH HAMILTON AND VALENCIA.

Trick Plays Tried on Wednesday Afternoon - "Ken" Williams Well Pleas'd With the Player's Efforts

Thirty-four of Queen's rugby players turned out to practice on Wednesday afternoon on the lower campus. (Capt. J. D. McLeod and "Ken" Williams slipped them into shape in a short time and put them through in a vigorous way. They used some new signals made by Prof. Lindsay Malcolm earlier in the year. Some of the signals were known to both sides and therefore, were used to a slight disadvantage, but it is customary this year to re-arrange signals and the closer working out of trick plays.

Those who will go to Hamilton for Monday's game have not yet been picked. It is likely that this will be done about Thursday or Friday night. The Hamilton club is never "busy" and expenses and a number of extra men will likely have an opportunity to go. This game will be a great help to the team. Men take far more chances in tackling and other ways in a game than in a practice. Monday's game will make an opportunity for the selection of the best men.

Every one of the players is very anxious to go to Hamilton and the practice are lively as a result. The men are progressing rapidly in the finer points and are able to figure out the next probable play of their opponents and prepare for it. The men are taking an intense interest in the work, and, therefore, are all working together to the best advantage.

"Ken" Williams, after the practice remarked that the men are rounding into shape in a splendid way. This was a lot from the acting coach and is a compliment to the players. It has been practically decided to reduce to play Ottawa here on Saturday, as they did not answer Queen's acceptance. The men are not sorry, as it would mean two games and the trip in the three days, which would not be all pleasure.

Weather Notes.

The weather is showery in the western provinces and also in Northern Ontario. Elsewhere it is fair. The temperature is comparatively uniform throughout the dominion.

Rummage Sale.

Will be held by Queen street church Friday and Saturday, Oct. 9th and 10th, in store next to Jas. Reid's.

"Belladonna Plasters," Gibson's Drug Store.

James Devine and Napoleon Newell, who claim Kingston as their home, were arrested in Belleville on a charge of vagrancy. They denied that they were vagrants but were allowed their liberty. "Cod Liver Oil, easy to take," Gibson's. Agnes Gibson, aged seventy-one years, a Kingston woman, was fined \$10 and costs in Belleville court for drunkenness. She was caught with a man in Thurlow township and making a scene on the street. "Huvler's and Nylo's Fresh Can-terian church, Westport.

LOTS OF HARD WORK

Done By the Army Service Corps at Valcartier.

After seven weeks of hard work at Valcartier camp, No. 3 company, Army Service Corps, in command of Major W. A. Mitchell, is back in Kingston. The local volunteers had no "couch" while under canvas, as they were kept busy from early morning until late at night distributing rations. The men state that the meals served at the camp were all that one could ask for under the conditions. When the horses were unloaded at the C.P.R. station they were very thirsty, as they had not been given a drink for almost twenty-four hours. As soon as they were taken from the trucks they were led to the drinking fountain on the market square. Norman Greenlee, of Cusheonville, who was injured while at the camp over him, appears to be none the worse of his accident. He was confined to the military hospital for three weeks. The volunteer stated that he saw a couple of thousand pairs of good military boots burned after the overseas contingent had gone. Saddles and halters were disposed of in the same manner.

A Wonderful Discovery.

An eminent scientist, the other day gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a sore, or a sore, such injury is insured against blood poisoning. Not one species of microbe has been found that Zam-Buk does not kill! Then again, as soon as Zam-Buk is applied to a sore, or a cut, or to a skin disease, it stops the smarting. That is why children are such legends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again, as soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of fresh healthy tissue from below is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are permanent.

Only the other day Mr. Marsh, of 161 Delorimier Ave., Montreal, called upon the Zam-Buk Co. and told them that for over twenty-five years he had been a martyr of eczema. His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him, and in a few months it cured him. To-day — he is still cured, and has had no trace of any return of the eczema!

All druggists sell Zam-Buk at 50c. box, or we will send free trial box over three years after his cure of a disease he had for twenty-five years — he is still cured, and has had no trace of any return of the eczema!

On October 6th, George A. Bell and Miss Elizabeth Barker, both of New- were married within the Presbyterian church, Westport.

CHILDREN'S AID SOCIETY

Short of Funds, and Must Curtail Its Work.

The Children's Aid Society executive met on Wednesday afternoon with Rev. Douglas Laing, the president, in the chair. Some important matters were dealt with which included the fixing of the date for the annual executive meeting of this society. On the afternoon of November 4th, the executive will come together for the discussion of the year's work. The public meeting of the society will be held at a later date. J. J. Kelso, Toronto, will be asked to address this meeting. As yet no successor has been appointed to fill the vacant position of Inspector, although Rev. Laing from various sources, some locally. The resignation of Rev. A. E. Smart was received with regret. Rev. J. W. McIntosh spoke of the untiring work of the late inspector. On behalf of this society he extended the sincere appreciation of all to Mr. Smart for his careful guidance of affairs. Prof. A. Laird had nothing but the highest praise to offer for valuable services of Mr. Smart. Progress along all lines had been made he asserted and it is with deep regret that the society loses him.

The financial status of the society was discussed at some length by Prof. Laird, and owing to the extremely low resources of the treasury, a reduction will have to be made in various branches of the working of the society.

During the last month of Rev. A. E. Smart's inspectorship much work was accomplished. The number of children dealt with was 31, number of county families, 2; number of county children, 7; immigrant families, 4; immigrant children, 11; child-made wards of society, 2; placed in foster homes, 2; placed in Industrial school, 1; visits made, 72; prosecutions, 3.

Some Warm Things Said.

In the discussion of the Princess about having contract by the City Council on Wednesday evening some warm things were said by Ald. Graham with reference to the specifications. It seems that the city engineer recommended six inches of concrete for the foundation, whereas the council accepted a tender for four inches. However, six inches is now being laid, the council having seen fit to authorize the additional two inches, as originally recommended by the city engineer.

Taxes Well Collected.

The city taxes have been well paid in the city, notwithstanding the hard financial year. The Whig asked the tax collector, W. A. Newlands, how the collections stood at present, and he stated that so far \$281,192.52 had been collected. At this time, \$1,141,824.77.55. Allowing for the increase in the amount of taxes this year the proportion of the 1914 total equals that collected at this date a year ago. The collector hopes to end the year with the taxes pretty well paid up.
