Shackleton says: "The question of the concentrated beef supply is most important—it must be Bovril." Shackleton knows. He is taking no risks. He chooses Bovril because the food he takes must yield every ounce of nourishment to his men. Follow Shackleton's example. Into a single bottle of Bovril is packed the nourishment value of many pounds of beef, and even a plain meal yields much more strength and nourishment if you are taking Bovril. But remember Shackleton's words: it must be Bovril.
