8100 NEWARK, 8100 The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Import Pebbles For Mill Work.

Washington, Oct. 16.—In 1913 nearly \$320,000 worth of flint pebbles were imported into the United States, mainly from Denmark and France. In these countries the flint occurs as irregular nodules in the chalk cliffs that border certain parts of the coast, and under the impact of the waves on the shore the hard flint becomes freed from its relatively soft chalk matter and is gathered in great quantities from the beaches for shipment to all parts of the world.

At their destination the more irregular nodules are calcined and ground to a fine powder for use in pottery manufacture, but those that have been well rounded by the waves are reserved for use in tube mills, their hardness and chemical inertness making them a desirable grinding agent.
