### FIFTY YEARS A CLERIC

**REV. R. S. FORNERI CELEBRATES THE ANNIVERSARY**

He is a Native of Belfast Ireland—Has Been Rector of St. Luke's Church Since 1905.

Rev. R. S. Forneri, rector of St. Luke's church, Kingston, who to-day celebrates the fiftieth anniversary of his ordination into the priesthood of the Church of England, is a native of Belfast, Ireland. His father came to this country with his family in 1853, and was one of the first professors of the newly-created university of Toronto. The Kingston rector, after taking his M.A. and B.D. degrees, was admitted to holy orders on the 28th of October, 1864, by the Right Rev. John Strachan. His fifty years in the ministry have been spent in Penatungishene, Uxbridge, Belleville, Adolphustown, Merrickville, and in this city, since 1905. Spiritual results cannot be tabulated, but he

Among the tangible fruits of his labors are six churches and a parsonage. His most ambitious effort was the erection of the United Empire Loyalist church in the historic locality of Adolphustown, the cornerstone of which was laid by Lieutenant-Governor Robinson during the United Empire Loyalist centenary celebration in 1884. It is a beautiful little Gothic structure of Kingston limestone. The interior is surrounded with a band of memorial tablets on which are inscribed the names of leading U. E. Loyalists of Canada, namely, Bishop Inglis, Stuart, D.B., Cartwright, Macaulay, Robinson, etc.

Mr. Forneri was for some time curial dean of Lennox and Addington, and examining chaplain to the present bishop of Ontario. Since his induction at St. Luke's, with the cooperation of the congregation, one improvement after another has marked the progress of the parish. This tribute was recently paid to the aged rector by a writer:

With the right to sign his name as the nobles do, there lives in Kingston, in a humility which is almost meekness, a clergyman who has brains far beyond the average scholarship, and a charm of manner which this generation calls "the charm of the old school." He is known as the Rev. Richard Sykes Forneri, M.A., B.D., and he has never risen to a high place in the church because he has persisted in remaining in the background, content with the adoring affection of parishioners who, rightly, call him "saintly."

Mr. Forneri is the son of the late Dr. Forneri, an Italian of high birth, who held the chair of moderns at Yassity, in the days of Dr. McCaul, and college contemporaries tell us that "Forneri never saw the outside of a Greek grammar till six months before his matric," but he headed the honor list. After his graduation he went in for divinity at Trinity, and it was his good pleasure to champion the late Provost Whitaker, when controversy raged round that cleric's high churchmanship. "On my reputation as a low churchman," Mr. Forneri has often declared, "I never saw the cloven hoof of the Scarlet Woman anywhere near the provost in all my days at Trinity." And he declares it with the slight foreign accent, which, mingling with a touch of the brogue he

### LOTS OF POTATOES

**AN IMMENSE YIELD FOR FRONTENAC COUNTY.**

Herman A. Buck Has Made a Record—His Acre Yielded 478 Bushels by Actual Measurement.

The past season has been particularly favorable for potato growers, especially those men who planted their potatoes rather late, remarks C. C. Maffa, agricultural representative for this district. We have reports to hand of yields per acre considerably above the average but the one in particular I wish to mention seems almost incredible. The yield per acre was 473 bushels by actual measurement. The quality of tubers were absolutely free of scab, smooth in outline, shallow-eyed, good quality and of varying weights, being from one-half pound up to two and three-quarters pounds per tuber. While the large potato is not desirable, yet it is possible for the grower to pick out a splendid sample of potatoes for seed purposes and I believe it would be interesting to know the methods followed in the culture of this potato field, as it is just possible that it may be of value to other farmers in the locality.

Herman A. Buck, Sydenham, on whose farm, and under whose supervision, this immense crop of potatoes was produced, states that he never plants his potatoes until after the 15th of June, and by following that rule during the last five years he has always had an excellent crop of potatoes, and has never had to use one ounce of paris green for controlling bugs. The field for potatoes is prepared the fall before, being plowed as soon as possible after haying and cultivated at frequent intervals during the fall. If manure, be required, this should be applied either before the land is plowed out of sod or immediately after and under no conditions use horse manure, as it has a tendency to produce scabby potatoes. The field is again plowed in the spring and worked until the 15th of June, then planted to potatoes. The potatoes are harrowed until about three inches high, then a hand cultivator is used for the rest of the cultivation. If the fall and spring work has been done thoroughly it will not be necessary to cultivate the potatoes very often as the weeds will be pretty well eradicated.

The name of the variety of the potato is the Green Mountain which is one of our standard varieties and was grown this year by the competitors of the Frontenac potato growing contest, and any farmers wishing to obtain excellent seed of one of

### CAUSES NO ANXIETY.

**German Successes Offset by Tremendous Losses.**

Paris, Oct. 28.—The news that the Germans had crossed the Yser has occasioned the French press little anxiety. The Intransigent comments:

"It has cost the Germans enormous losses to penetrate the allied lines, but it is doubtful whether they will gain thereby, since the country at that point is intercepted with a multitude of canals, which, with the nearness to the sea, greatly limit the area of the battlefield, forcing them to frontal attacks and to advance over their own dead. Such tactics were possible for the highly-trained and fresh troops at Namur, but it is beyond the power of the second line levies, which the Germans are now reduced to employing against us."

The Temps remarks:

"It is only a local success that their violence has obtained, which is far from compensating for the losses in other parts of the fighting area."

### NURSES ALREADY WORKING.

**Canadian Corps Doing Duty in Military Hospitals.**

Ottawa, Oct. 28.—The Canadian corps of nurses who went to England with the first contingent is already at work. Word received by the authorities here is that the nurses have been detailed for duty in the military hospitals in England. They will remain there until the Canadian division goes to the front when they will, of course, leave with them as an integral part of the division. Meanwhile, they will be receiving a splendid training for the work they will do.

Well, why shouldn't a green grocer fall in love with a grass widow? Laugh and the world laughs with you—unless you are telling the joke.

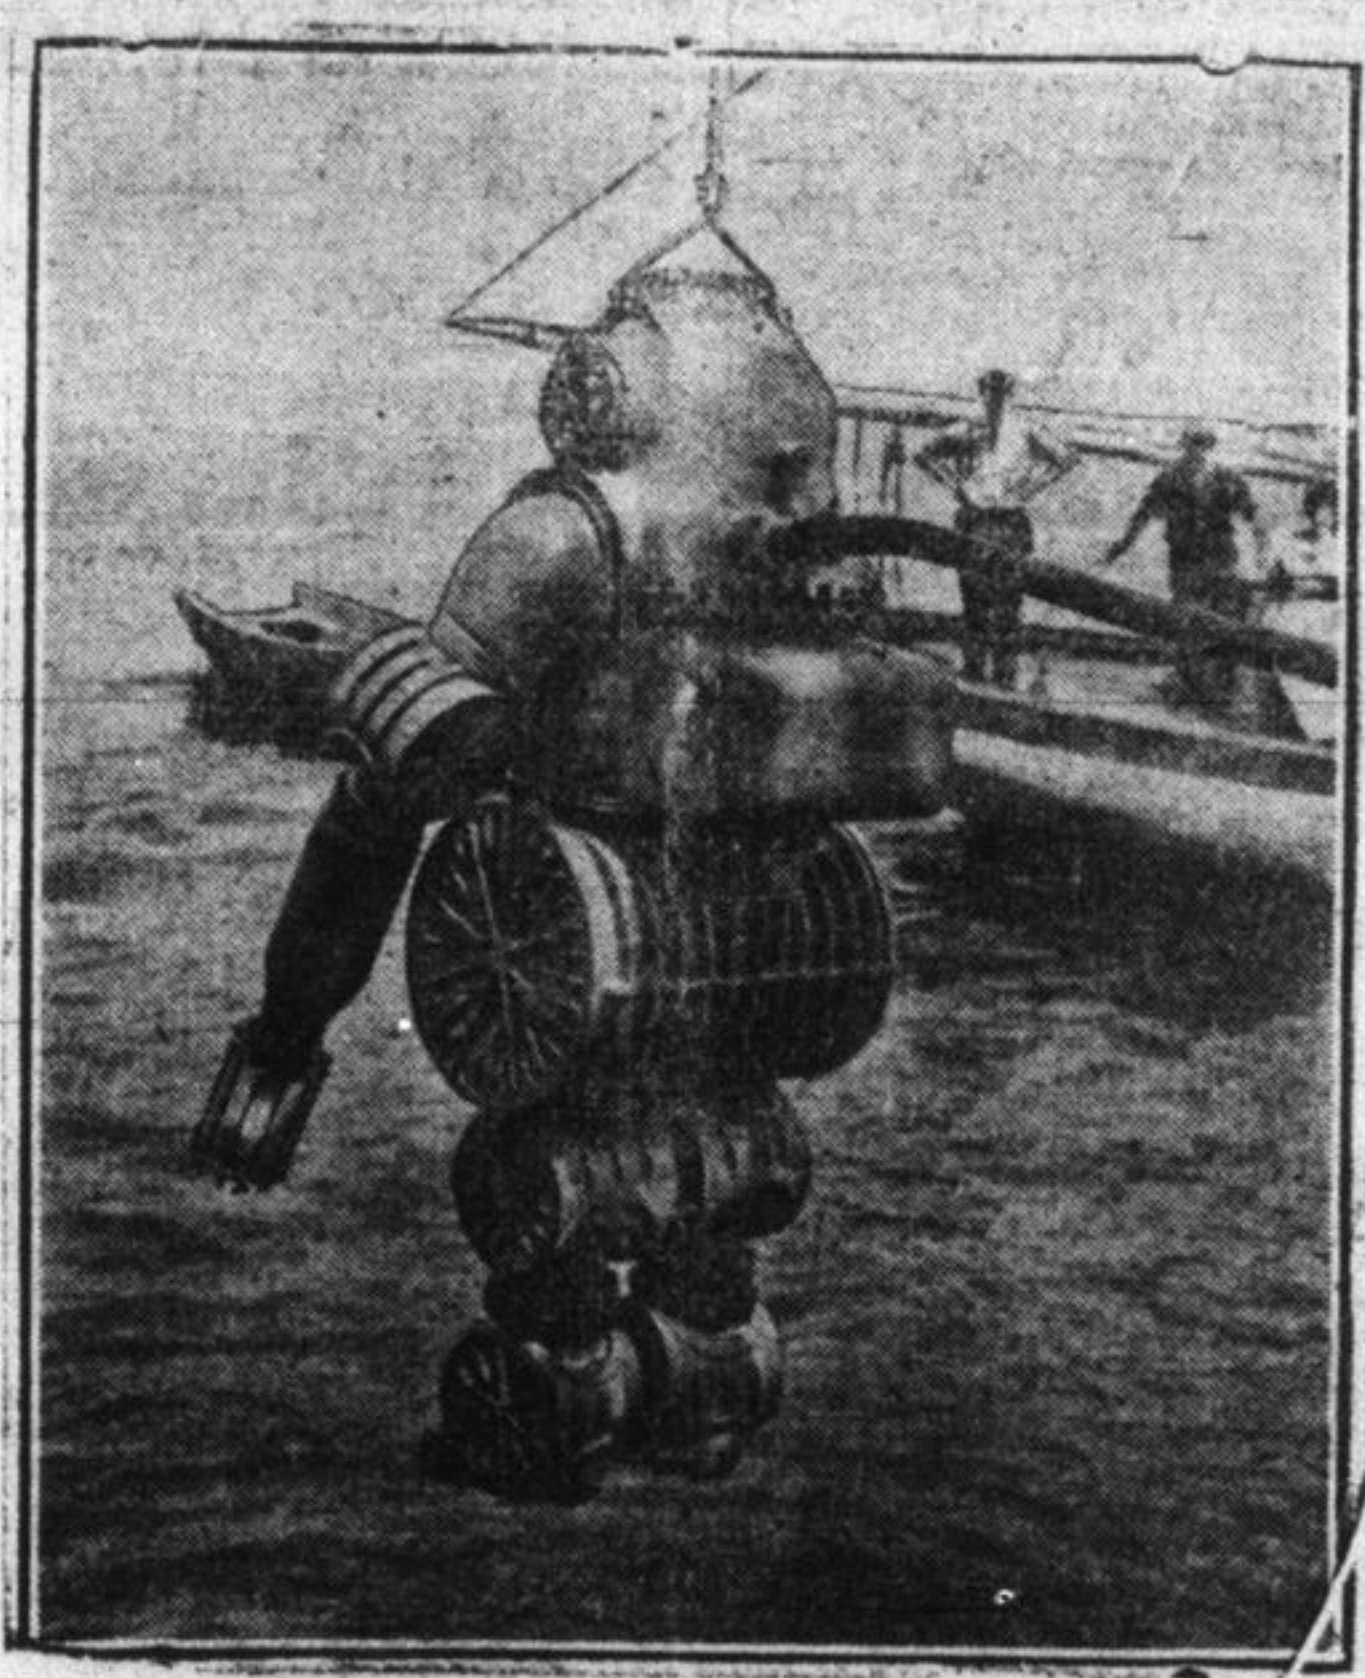

### Crippled With Rheumatism

**And Skeptical After Trying Many Medicines—Dr. Chase's Kidney-Liver Pills Cured Him.**

When the kidneys fail to purify the blood the poisons left in the system cause pain and suffering, such as backache, lumbago and rheumatism. Read how this skeptic was cured by Dr. Chase's Kidney-Liver Pills.

Mr. F. W. Brown, Kingsbury, Que. writes:—"I have been completely cured of backache and lame back by using Dr. Chase's Kidney-Liver Pills. I also recommended the pills to a man who was a cripple from rheumatism. He was skeptical, as he said that he had tried nearly everything on earth. Finally he consented to try them, and to his surprise was greatly benefited in the first week, and the pains left his legs until he was so supple he could walk without pain or difficulty. Dr. Chase's Kidney-Liver Pills have worked wonders in this place, and we think there is no medicine like them."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box. Sold by all dealers, or Edmondson, Bates & Co., Limited, Toronto.

**WORLD'S RECORD DIVING APPARATUS.**

An American invention of an all-metal diving apparatus enabling a diver to work at much greater depths than previous. Tests in Long Island Sound showed that a diver could work with ease at over two hundred feet of water in this apparatus.

### Experts Who Know

They speak from their own experience; years of practical work in the preparation of perfect food for particular people. Their testimony cannot be gainsaid:

"To obtain the best results we use and recommend for use 'Royal' Baking Powder. We find it superior to all others."  
—The International Mutual Cooks and Pastry Cooks Assn.  
"Adolph Meyer, Sec'y."

## ROYAL BAKING POWDER

Absolutely Pure No Alum

### TORONTO MAN ESCAPES.

**Held Prisoner in Brussels by the Germans.**

London, Oct. 28.—Charles L. Gould, of Toronto, of Gould, Abraham & Co., bond dealers in Brussels, has succeeded in getting away from the Belgian capital after being held a prisoner there by the Germans since August 20th. Under the cover of darkness he escaped to Antwerp ten days ago, and with the Belgian refugees crossed the Dutch border. He is certain he would have been shot if his identity had been discovered.

Mr. Gould tells of wanton cruelty by the Germans who are killing their own seriously wounded. Besides destroying churches, and houses the Germans in Belgium are demolishing tomb stones in cemeteries, which they use as practice targets for their recruits who have just arrived on the fighting line. Arriving in England Mr. Gould received intelligence of the death of his father, H. P. Gould, aged 97 years, a retired export merchant of Toronto.

### GERMANY GETTING PETROL

**Thousands of Tons Exported From Rumania.**

Paris, Oct. 28.—The attention of the Rumanian government is to be called to the manner in which petrol is being exported to Germany in violation of the rules of neutrality. Some thousands of tons of petrol have found its way into Germany and Austria and the railway lines are positively blockaded in part by the enormous number of tank cars conveying oil to the belligerents. Communications from Holland published here demonstrate that despite the difficulties that government is doing its utmost to preserve neutrality. One writer says that the Dutch regiments on the frontier have been changed constantly because they get so worked up by the sights they see that it is almost impossible to restrain them from attacking the Germans.

Unrequited love is one brand of heart failure. But it's never fatal. Diplomacy is the art of concealing our dislikes. Contrariness is often taken for tenacity.

### FARM HELP TO BE SCARCE.

**Immigration Official Advises Farmers to Offer Yearly Engagements.**

Toronto, Oct. 28.—H. A. Macdonell, director of immigration for Ontario, is of the opinion that next spring there will be a larger demand for farm labor than ever known in the province, and that it will be to the advantage of farmers to secure help at the present time. Owing to the facts that immigration from the old-country has been practically brought to a standstill, and that so many farm hands have gone with the Canadian contingent, a shortage of labor will be experienced when the spring comes. There is no reason, Mr. Macdonell thinks, why farmers cannot make arrangements now by hiring help on a yearly engagement. In response to the circulars which have been sent out to farmers, it is stated that a good many applications are being received each day for help.

### INVASION OF CANADA

**Brewery Workers to Be Led By Pro-Germans.**

London, Oct. 28.—Discussing Count von Bernstorff's statement that, because Canada is sending troops to fight for the motherland, Germany would be justified in disregarding the Monroe doctrine and landing troops in North America, the Daily Express declares that the German ambassador to the United States has replaced "Mr. Dooley" as a humorist, adding that possibly the count will find a way to invade Canada by enforcing conscription in the Milwaukee breweries, and descending upon the dominion with forces led by Hrs. Ridder, Bartholdi, Munsterberg, Schiff and Speyer.

### FARMERS' WIVES OBJECT.

**Won't Bring Chickens to Market With Heads and Legs On.**

Chatham, Oct. 28.—Farmers' wives say that they will not bring chickens to the market if the by-law providing that heads and legs must be left on the fowl is enforced. This by-law will go into force on November 1st, and is causing much criticism and discussion. The by-law does not apply to stores.
