A SPLENDID MARK.

Finds White Uniform a Target For Snipers.

Washington, Dec. 3.—Another plea for uniforms of khaki and forestry green to replace the bullet-drawn white worn by American seamen was made by Surgeon-General Braisted of the navy in his annual report submitted to-day to Secretary Daniels. It was pointed out that the disadvantages of the white uniforms were strikingly illustrated at Vera Cruz, where the sailors offered perfect targets for sharpshooters and snipers.

The surgeon-general reported that the medical department of the navy apparently was efficient and prepared to meet all present peace time demands, and that the health of the navy personnel during the year showed a satisfactory improvement over last year.

WOMEN TO CHECK SPIES.
 Asking Members To Stay Away From Their Clubs.

London, Dec. 3.—Women's clubs in England have been enlisted in the movement to head off the activities of possible German spies, and Austrian and German women have been asked to resign or discontinue their attendance at many clubs which formerly welcomed them.

A number of prominent literary women have urged that English women should be as cautious as English men about their associates and should shun all women of German or Austrian sympathies at a time when chance remarks might give valuable information to the enemy.

Reports from Belgium and Holland of the activities of women spies who served as governesses and servants in Belgium and Dutch families have also thrown suspicion on German and Austrian women in service in various parts of England. The Belgian refugees who are in England have issued a general warning against German women, as well as German men, and their tales of how Belgian cities were betrayed by German spies in all walks of life have alarmed the English.

Alarming tales have been printed in London papers of alleged German spies in high social and financial circles, and practically all of the leading men clubs have asked men of German or Austrian birth to resign or refrain from frequenting the club rooms during the war.

Many suspected spies high in official life voluntarily left England before the movement against suspected persons became so acute. Charges were generally made that even Germans who had become naturalized had often done so only for business and social reasons, and were at heart Germans as much as ever.

OFFICE CALLS EX-OFFICERS
 Temporary Commissions For Those Medically Fit in Canada.

Ottawa, Dec. 3.—The government are advised by the imperial authorities that the army council have reason to believe that there are some ex-officers of the regular army of the territorial forces residing in Canada between the ages of twenty-five and forty who have not joined the Canadian expeditionary forces, but who would rejoin their old corps. The army council is prepared to offer temporary commissions for the duration of the war to such persons if they are certified medically fit. It is also stated that free passages will be provided to and from England and an allowance of £50 will be made for the provision of a uniform and £7, 10s. for the camp kit.

Naval Battle Must Be Soon.

London, Dec. 3.—According to British opinion, sooner or later, the British and German navies must meet in decisive battle. This opinion is based on the assumption that the allies finally will beat Germany on land and so force the German ships-of-war into action on the water. It is fully recognized, too, that after process of attrition has been applied to them a little longer, Germany's fleet may make a dash into the North Sea in full force and try to work terrible havoc among the British ships.

Short Notes On the War

The birds of Belgium and Northern France have been dispersed by the din of war.

It is stated that apartments have been secured in Antwerp for the Kaiser. The British Red Cross has appropriated \$50,000 for fighting the epidemic of typhoid fever in the Belgian army. If the troops of the Kaiser are to reach Calais by December 10th, they have a very busy seven days in front of them.

At Brussels, English subjects up to the age of fifty-five are being taken to concentration camps.

A letter found on a German prisoner taken near Muehhausen reads: "There are 1,600 more widows here than there were before the war."

Germany is threatened with a match famine, all the supplies of Russian wood used for this purpose having been exhausted, with no more available.

The Red Cross Association at Geneva is endeavoring to arrange for the exchange of the seriously wounded prisoners of war, who by reason of injuries or amputations can never return to military service.

According to the Paris Eclair, the terrible German shelling during the Ypres fighting produced several cases of "wounded without wounds." Men have been so dazed by the shock as to be incapable of remaining at the front.

A hundred German aeroplanes have been lost since the war started. To replace them three factories are turning out new machines at the rate of two daily.

Word from Zebrugga says that the harbor works have all been put out of commission by the guns of the British fleet, and until repairs are made, can no longer be used as a submarine base by the Germans.

Germans have evacuated several villages east of the Yser, and are concentrating heavy reinforcements south of Ghent for a decisive battle with the British.

According to one authority, Austrian troops on Wednesday occupied Belgrade, the former capital of Serbia. Arrangements are being made to concentrate all the able-bodied Belgian men of Alberta in Calgary. They will be mobilized and lodged preparatory to being sent forward to take their places on the firing line in their own country.

One Belgian stated that the Germans were dying rapidly, as they had practically no shelter from the biting weather, and in addition had to fight without ration.

A commission appointed to investigate the alleged violation of neutrality by Ecuador, has left by the national transport Constitution for the Galapagos Islands, in the Pacific ocean.

In well-informed quarters it is stated that the German admiralty regarded the British preponderance in dreadnoughts as hopeless unless a great German force of submarines and aircraft first launches an attack on the British battle fleet.

The Germans are bitterly regretting that they damaged so badly the railway line from Kalisch to Lodz, which would now have been very valuable. Most of their heavy reinforcements are obliged to march the entire distance.

George Bernard Shaw, in a letter to the Irish press on the duty of Ireland during the war, says that the Irishman who declared himself to be the friend of Potsdam declared himself to be an enemy of France.

The war has brought about an appalling state of affairs in the Ottoman empire. Turks appear everywhere to have become thieves and brigands at the expense of subjects of the allied nations.

The strong efforts made by the Swedish government to bring about the exclusion of wood from the German contraband list have failed. For this purpose Count Trolle visited Berlin on behalf of the government, but has returned without success.

King George, in a visit to the hospitals at the front, spoke with a wounded German officer, and expressed the hope that he would be supplied with German literature.

The Nieuwe Rotterdamse Courant, of Rotterdam, claims that no fewer than eight additional railway tracks have been or are being laid between Berlin and Cologne. The enormous capacity of this octuple system renders it the most wonderful strategic railway in the world.

The Turks have surrounded the christian quarters in the town of Chococa, an ancient Greek town on the west coast of Asia Minor, twenty-five miles north-west of Smyrna, and have taken many hostages. The Turks also have seized the churches, and have sunk several lighters, full of merchant dice, to block the entrance to the port.

Deafness Cannot Be Cured
 by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. The cases of ten years standing are cured, and it is not a matter of months, but of days, that you are restored to normal condition. Hearing will be destroyed by Catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
