

THE GARBAGE DEBATE

REPLY IS MADE BY PROF. J. P. R. MARICHAL.

To Joseph McQuade—He Takes Issue With the Statements the Collection Makes.

Kingston, Jan. 19.—(To the Editor): It is much to be regretted that statements, right or wrong, cannot be made by him, McQuade, without indulging into vulgar abuse. What, has, pray, my "cognomen" to do with the questions I raised in connection with the unspeakable system of garbage collection? Yet, since it seems to Mr. McQuade a "supernatural" name, let me tell him that it has been constantly born by men who distinguished themselves in other paths of life than the fattening of "nice, juicy, succulent, healthy pork" however, honorable and soul-elevating the latter occupation may be! My credentials are simply those of a ratepayer entitled as such to decent and sanitary treatment and this whether I am a Pole, a Chinaman or a Senegalese!

I will now answer very briefly, for my time is precious, the few points raised and freely diluted into gallons of the best condensed wisdom of past aldermen (a suspicious-looking word, almost like Germanic) generations.

(1) My mention of two outstanding disgraceful features of Kingston, not the only ones it seems from a perusal of yesterday's local papers, does not imply a connection between the two, and I was quite aware at the time that the managers of the Garbage Co., Ltd., had a totally inadequate knowledge of chemical "Kultur" (which Mr. McQuade spells Kultur) and could not therefore attend to the chlorination of drinking water.

(2) With regards to the by-laws, how on earth could a "new arrival" be possibly acquainted with Mr. McQuade's encyclopedic knowledge? I confess that coming from civilized countries (since I am not a German, and have no special liking for Germans, having four relatives at the front against them we will leave out Germany so as not to offend further our susceptibilities) I was totally ignorant of the fact that a sanitary matter of such importance as the collection of house refuse was diverted in this city into a pig-fattening business. In spite of Mr. McQuade's statement, I have never seen this done elsewhere and my horizon is certainly far wider than his limited local experience.

I know so little about that eyegore, the fragrant establishment in the vicinity of a local cemetery, that I remember putting, quite innocently, some disinfectant into my bin to avoid unpleasant smell during the summer. No doubt, if Mr. McQuade had known this, he might have constructed this sanitary precaution into a willful and malicious attempt at poisoning his pipe!

(3) The last point is also the most important and Mr. McQuade will probably realize its seriousness before long. In referring to two statements scattered in the midst of his treatise on local by-laws, the first to the fact that Inspector Timmerman made a visit to my premises in August, advised me to clean them and witnessed fact number two, i.e. that I was using "an old dilapidated bucket" instead of "a tin" for the present my answer is, Inspector Timmerman interviewed by me emphatically denied having ever called to my house; or witnessed any old or new bucket, Dr. McCarthy refuses (no wonder!) to swear that the refuse shown him (under the belief that he was the Medical Health Officer) came from my house. The "bin" in use since May last was bought new from Messrs. Simmonds Bros., Princess Street, at the cost of \$1. possesses a lid which still fits and can be witnessed here at any time by Mr. McQuade or any members of his "band."

I can well afford to take no notice of Mr. McQuade's vulgarity and slanderous lies, but I wish these not to divert readers from the points at issue, which I raised in my letter of the 12th inst. to the press. These points are:

1. If the contract of the city with the Garbage Co., Limited, does not involve complete removal of all kinds of house refuse then the sooner such contract is modified the better.

2. In the meantime steps should be taken to insure that the garbage collector does not scatter house refuse about for selected purposes, especially when he fails to replace the "remnants" into the bin.

In full justice to this man I may say that since my letter of the 12th the contents of my bin have been carefully and completely removed, and wonder of wonders! the lid replaced on the bin each time, a thing which never occurred during the whole of last summer.—J. P. R. MARICHAL.

Wood-Babeck Nuptials. The marriage took place at the Sydenham Street Methodist Church parsonage on January 14th of Miss Lillian M. Babeck, daughter of Kenneth Babeck, Koper, and Wilfrid Wood, son of Charles Wood. Rev. Alfred Brown officiated. Mr. and Mrs. Wood will reside at Koper.

Girls! Clean and Beautify Hair. NO DANDRUFF—25 CENT DANDERINE. Stop Washing Hair! Try This! Makes Hair Glossy, Soft and Abundant. Surely try a "Danderine Hair Cleanse" if you wish to immediately double the beauty of your hair. Just moisten a cloth with Danderine and draw it carefully through your hair, taking one small strand at a time, this will cleanse the hair of dust, dirt or any excessive oil—in a few minutes you will be amazed. Your hair will be wavy, fluffy and abundant and possess an incomparable softness, lustre and luxuriance. Besides beautifying the hair, one application of Danderine dissolves every particle of dandruff; invigorates the scalp, stopping itching and falling hair.

DISPOSAL OF GARBAGE

COST OF AN INCINERATOR WILL BE CONSIDERED.

Board of Health Desires to Have Satisfactory Collection—Hugh McBratney Elected Chairman.

The inaugural meeting of the Board of Health was held on Wednesday afternoon, when Hugh McBratney was elected chairman.

The members present were Mayor Sutherland, Dr. W. Gibson, B. Blackhall and Dr. A. R. B. Williamson, the medical health officer.

The question of garbage collection was discussed at some length, and on the suggestion of Mayor Sutherland it was decided to have a committee secure information regarding the cost of installing an incinerator.

The committee appointed will consist of Mayor Sutherland and Mr. Blackhall. The mayor said that some definite scheme should be put forth for the proper disposal of garbage, and he was of the opinion that a suitable plant could be installed at a cost of \$1,700 or \$1,800.

All the members of the board were agreed that the present system of the collection of garbage was far from satisfactory, and an effort will be made to put a system into effect that will give satisfactory results.

A request was received from Anderson Bros., for a permit to cut ice for cooling purposes, the ice house to be closed under the direction of the board. The request will be granted under these conditions. Two other requests of a similar nature have been granted by the board.

Dr. Williamson reported that the area for the cutting of pure ice had been mapped out on Jan. 14th, and that there was no reason for ice being cut in the prohibited area.

The chairman drew the attention of the members to the great need of an inspector to work for the board the entire year. Last year the board had the services of Constable Timmerman for a few months, but the chairman held that there was a great deal of work to be done, and that it would warrant the hiring of an inspector to work all the time. The mayor was asked to take up the matter with the City Council.

On motion of Mr. Blackhall it was decided to recommend to the City Council the installation of a sterilizer for the use of the city creche and for citizens who desire to have milk for infants sterilized.

A SPLENDID SHOWING. How a Policy in the Sun Life Company Turned Out. Kingston, Jan. 19, 1915.

"G. A. Bateman, District Agent Sun Life Assurance Co., Kingston, Ont. Dear Sir—Please convey to your company my sincere thanks for their prompt and liberal settlement of my \$10 payment, 35-year endowment policy just matured, No. 53,925. I paid a total of \$936.00 in premiums and have now received a cheque for \$1,312.00, being a return of over \$1.40 for each dollar paid into the Company, with fifteen years' protection thrown in, or deducting \$17.10 a year from the premium for carrying the risk. I received over 60 per cent. compound interest on the balance of the premiums paid. Yours sincerely, G. A. Bateman."

Big Room in Calcium Carbide. Engineering and Mining Journal. The Otto works in Sweden have a plant capable of making 90,000 tons per annum. All European makers separate the nitrogen from the atmosphere by the fractional distillation of liquid air. The production of calcium nitrate in Europe is between 100,000 and 120,000 metric tons.

Facts About 1915. The year 1915 comprises the latter part of the 19th and the beginning of the 14th year of American independence, and it corresponds to the year 6628 of the Julian period; the year 5675-5676 of the Jewish era; the year 2658 since the foundation of Rome; the year 2575 of the Japanese era; and the year 1324 of the Mohammedan era. In the year 1915 there will be two eclipses both of the sun. The first will be the annual eclipse on Feb. 12, visible to Australia and large portions of the Indian and Pacific oceans, and the second will be on Aug. 10, visible in Eastern Asia.

THE HALLS OF QUEEN'S WIN FOR FRONTENACS

PRESBYTERIAN MODERATOR WHO DEFEATED BELLEVILLE BY 3 GOALS TO 2

In Junior O. H. A. Game—Two Hundred Belleville Supporters Came Down To See The Game.

The expected happened on Wednesday night when the junior Frontenacs defeated the Belleville junior O.H.A. team on the covered rink by a score of 3 to 2. Owing to both the Collegiate and Queen's having the rink for practices shortly before, the ice was sticky and cut up. The game all through was an excellent exhibition for the large crowd present, among whom were over two hundred Bellevilleites, who came down on a special train, with a band.

The game was won for the local squad by superior combination, stick-handling and skating. The sticky ice kept the puck rolling, and made it very hard to handle. The fault of the Belleville team seem to be too much bunching, every man playing the puck and not watching his opponent.

The Frontenacs played a good game all through and worked together wonderfully. For the local team Stinson and Cooke shared the honors equally. Captain Millan also played a very fast game but had a habit of not always passing the puck when it was advantageous to do so. Stewart and McCallum, on the defence, did good work, the former playing one of his best games of the season.

For the Belleville squad Pimlock, the theologian from Albert College, played the best. He is very heavily built and a dangerous body-checker. Arnott also played a good game. Nurse, the visitors' goal-keeper, played an excellent game, saving the team from a far worse defeat, and he was constantly busy.

The game started at a quarter to nine o'clock, and after twelve minutes of play Millan passed to Stinson, who scored the first goal. The play was very spectacular, as both of the Frontenac defence men were resting on the fence for tripping. Arnott, two minutes afterwards, tied the score, knocking in the rubber in a scrimmage near the nets.

To the tune of Janet T.'s voice through a megaphone shouting "Pass the puck," Stinson made his second tally, after a pretty piece of combination by the local forwards. The puck was in use only another two minutes before Millan, on a long shot, made the Frontenacs' third score. A minute later Arnott made his second goal, the only two that Belleville made.

The second period was probably the fastest of the game, although not as good an exhibition of team work as the first part of the game. One of the lights went out and the game was delayed for twenty minutes while "Ed." Harrick patched it up. In a mix-up near the Belleville nets Smith made a tally, about five minutes after the puck was kept in the home team's district but no score was made by either team.

In the last period, after seven minutes of play Millan brought the puck down to centre ice and passed to Cooke, who after some juggling, got it past the Belleville defence and scored. The play was more open after this score but both teams finished the game with heavy body-checking. Frontenacs played the offensive for the remainder of the game.

Dr. Gillman, of Uxbridge, umpired very satisfactorily. The time-keepers were E. Laing, of Belleville, and James T. Sutherland. The penalty time-keepers were J. Frechette, of Belleville, and Harrick, for the home team. Elliott was on the defence five times during the game. The Belleville squad was given nine tests and the Frontenacs eight all of two minutes duration.

The line-up: Frontenacs—Mills, goal; McCallum and Stewart, defence; Millan, rover; Stinson, centre; Cooke, right wing; Smith, left wing. Belleville—Nurse, goal; Pimlock, and White, defence; Elliott, rover; Arnott, centre; Duesberry, right wing; Whalen, left wing.

The summary: First period: 1—Frontenacs, Stinson, 12 min. 2—Belleville, Arnott, 3 min. 2—Frontenacs, Stinson, 7 min. 3—Frontenacs, Millan, 2 min. 4—Belleville, Arnott, 1 min. Second period: 6—Frontenacs, Smith, 6 min. Third period: 7—Frontenacs, Cooke, 8 min.
