There is, perhaps, no one thing that shows the passing of our youth so much as the herrible tendency of some of us to put on too much weight after we have reached the age of 25 or 30. However young our face may appear, our figures "give us away."

The cause of this over-stoutness is that our stomachs convert the food we est into fat because there is not enough oxygen in the blood to produce a proper combustion to destroy the fatty tissue. To reduce your weight go to a good druggist and get oil of orliene in capsule form, and take one after each meal. It is sold only in original scaled packages. Oil of orliene taken at meal.
