

FROM THE COUNTRYSIDE

TO CORRESPONDENTS.

Again we remind our friends, the correspondents, that the war tax stamps is NOT necessary on any letters containing news and addressed to us. Simply fold in the flap, put a one-cent ordinary stamp on it and let it go. Postmasters have no right to refuse these letters, though some of them have been doing so. The Whig has taken up this matter with the Post-Office Inspector's Department, and they have advised us that the Postmasters in such cases have been at fault, and that they have been given further instructions.

Many of our correspondents are still sending us letters addressed to us, and many of our letters are being held up or sent to the Dead Letter Office. If the instructions were carefully read these delays would not occur.

THE SPORT REVIEW

The London Canadian League Baseball team has a pitcher and utility player named Labate, who throws both right and left handed. He is only eighteen years of age, and it is expected to become a regular.

For disputing Empire Club's decision at Chicago, First baseman "Chick" Gandil, of the Washington Club, has been suspended for three days.

Guy Smith, the Cornwall boy who for several seasons played lacrosse for the Toronto Tecumsehs, has enlisted for active service with the 59th Regiment. Smith was very popular during his stay in Toronto because of his clever playing.

The Royal St. Lawrence Yacht Club, Montreal, will not draw up any definite schedule of races this summer, and it is not likely that they will hold their annual regatta at the Thousand Islands. The club have no less than seventy-five members on the firing line.

"Home Run," Baker has been heard from again. This time he has disputed the Delaware County League. Baker was protested as a "contract jumper," but on a vote he was declared eligible by a vote of 9 to 7. The announcement of the vote was followed by three clubs resigning.

Edouard Faber, the famous Montreal runner, who won the Boston Marathon Race some time ago, will have to face the charge of assault in one of the local courts. Faber was arrested on a warrant by "Ned" Scullion, of the Richmond club, and appeared before Judge Lanctot, when he pleaded "not guilty." The case was remanded until May 18th. The dispute arose through some trouble over the runner's expense account for his trip to Boston.

No Tea-Time Fighting. The English soldiers who have conquered France spend their money freely, and are loyal fellows, but French officers hold aloof from their English comrades, for the highly educated French officer is essentially a serious-minded man who is irritated at the English soldier's lethargic indifference to anything but sport and his own comfort.

A French superior officer recently remarked, "For every 300,000 men at the front the English need 200,000 cooks behind the front." Moreover, between the hours of four and six in the afternoon Tommy cannot under any pretext be induced to fight. It is tea time; and tea-drinking is an important national task which no English soldier would neglect.

Meanwhile the war has in no way, then, been the Allies; on the contrary, it has accentuated them.—Deutsche Tage Zeitung.

A man who plays the races contributes to the support of those who work them. Modesty and wealth are a handsome couple but seldom seen together. Language denotes the man—Don't "cuss".

Maxwell Wins Test Over 40 Cars

Result of the great Yale University Sheffield Scientific School Test. Of the forty automobiles tested at the famous Sheffield Scientific School laboratory the Maxwell stands first in economy of Gasoline consumption.

The Biever Motor Car Company,

New Haven, Conn.

Gentlemen:

I am enclosing report of test of your Maxwell automobile recently made in our laboratory.

I should like to add the following comments:

1. RELIABILITY OF TEST.

A preliminary test was made on April 19th, using a new car which was rather stiff. The showing was so good that we decided to make a second test. This was made on April 30th, using same car. On this test, the car showed less stiffness and the performance was better than on the first car. The second test was supervised by our most careful experts, and the results, I believe to be perfectly reliable.

2. MILEAGE.

The efficiency of the Maxwell automobile as indicated by the number of miles on a level road, is exceptionally high. This mileage record is better than that of any one of forty automobiles tested in our laboratory to date.

3. MOTOR PERFORMANCE.

The efficiency of the motor and carburetor as indicated by the pounds of gasoline used per hour per horse-power at rear tires, is exceedingly good, and indicates very perfect carburetor action over the whole range of speed and load. This record like that on mileage per gallon, is the best one that we have had.

Very truly yours,

E. H. Lockwood

ASSISTANT PROFESSOR MECHANICAL ENGINEERING.
