# Between the ages of 6 and 12

Here is advice for parents

"It is between the ages of 6 and 12 that the jaws as a rule fail to develop to their normal size," writes H. P. Pickerill, M. D., a world-quoted authority.

"During this period, therefore, the need for generous mastication (chewing) is imperative," the eminent Doctor continues.

For new and larger teeth are coming. The jawbone must grow normally to accommodate them.

Otherwise "crowding" of teeth is very apt to follow— and "crowded" teeth invite lodgment of food particles between them. The food particles make the acid which hastens decay.

At this period of the child's life judicious chewing of Sterling Gum gives the jaw much needed exercise—promoting full growth and full room for the important second set of teeth.

Welcomed as a "goody," the delicious peppermint flavor of Sterling Gum pleases the children while doing them good.

Sterling Gum is the gum for lasting flavor and absolute cleanliness.
