## REINFORCEMENTS CHOSEN AT THE BARRIEFIELD CAMP

From 7th Artillery Brigade and 8th C.M.R.

### ALL THE MEN ANXIOUS TO BE CHOSEN TO GO OVERSEAS AT ONCE.

And There Were Many Disappointed Ones—Tuesday Was Very Hot In The Drill Ground Of The Camp.

In camps all over the country where cavalry is stationed the question has been brought up of sending the men over as infantry until such times as the cavalry is needed. In conversation with several officers and men of the 8th C.M.R. at Barriefield the general opinion was found to be that they wanted to go overseas as cavalry but would be patriotic enough to go over as infantry if necessary. The 8th C.M.R. is undoubtedly one of the best trained cavalry units in the country, and if the opportunity occurred would do splendid work at that kind of work. As infantry, the work would be quite different.

The men of the 8th C.M.R. and 7th Artillery Brigade paraded on Tuesday for the selection of the men for the draft which leaves in a few days. The officers in both cases asked for volunteers to step forward. Every man immediately stepped forward. The officers then realized that to choose the men to be sent would be a difficult task indeed. In several cases the choice would be between two men and lots would be drawn. In every case the men did their utmost to be included in the list and there are many disappointed ones who will have to wait for the next draft. After most of the afternoon had been taken up in selecting the best for the positions the list was made public.

The 8th C.M.R. list showed Sergeants Nelson and Courtney, Corporals Labrass and Mourand, Troopers Evans and forty-five men. Lieut. Clements, as mentioned in Monday's Whig, will go with this party. From the 25th and 26th Batteries, Sergt. Fraser and Magarison, Corporals Smith, Brig. Clancy, Trooper Grover and fifteen gunners and twenty drivers were chosen. The Ammunition Column list is not quite ready.

One incident in choosing the officers from the artillery shows the officers' true sporting nature. Lieut. Hilliard to a major in the militia, and was also officer commanding the Cobourg Heavy Battery. For this reason he had the seniority and was chosen to go as a subaltern. Lieut. C. J. Allen is a Toronto "Varsity" graduate, and which he was given a commission in the 26th Battery and that battery was short of men he went to Toronto and was successful in enlisting seventy-two "Varsity" students. In consideration of this good work, although he was very anxious to go, Lieut. Hilliard offered to take even chances as to which would go. The two went to the Commandant's office and consulted Col. T. D. R. Hemming. It was decided that Col. Hemming would toss a coin and the winner go overseas. Lieut. Allen won.

The officers from the 7th Artillery Brigade for the reinforcements are Capt. William Harry, Jr., graduate of the Royal Military College, Lieut. Meikle and Lieut. Allen.

Practically nothing but routine work was accomplished by the 7th Artillery Brigade on Tuesday due to the choosing of the men to be sent overseas as reinforcements.

Ninety horses of the very finest type arrived in camp on Tuesday for the 7th Brigade.

The orders for the commencing of a Provisional School of Infantry have been issued. This will be for the qualifying of five attached officers of the recruiting base and eleven officers of the 38th Battalion. The school will be held by the officers of the base. The equitation classes will be given by either the B. C. H. A. or the 8th Regiment, C. M. I.

The soldiers in camp have been permitted to attend the production of "Leo, the Royal Cadet" up to 11:30 p. m. daily.

Sergt. Jaquith of the Ordnance Corps, has taken a patent out on a new style of tent and has had one made and erected on the grounds. Near the base of the pole is a circle of wood and from this extends eight bars to the outside of the tent. The triangles formed are webbed with canvas and eight of the most comfortable beds desired are found to result.

Sergt. Jaquith has also taken a patent on a metal tent pole which can be made, it is claimed for seventy cents as against the \$1 cost of the wood variety now in use.

The attractions of camp life have given recruiting in this district a decided stimulus. Every day half a dozen to a dozen strangers drop in and want to go overseas. They are directed to the recruiting base which is under the command of Lieut.-Col. Fee, and after being examined and found fit, they are attested and supplied with uniform. It takes less than half an hour to change a civilian into a soldier.

Among those who enlisted with the base on Tuesday was Kenneth Mullin, formerly of Mitchell's hardware store, and of late in the Bank of Toronto branch in Gananogue. He has a brother at the front.

The change in the water-supply has had a detrimental effect on a large number of the soldiers in camp, cramps being the usual trouble. As this is not serious, no action will be taken. The limestone in

the water is taken to be the cause and the men will soon become used to the change.

Capt. S. H. Simpson, dental surgeon at the camp, although he only commenced work on Tuesday, has handled nine cases. These were mostly minor troubles.

Trooper Drake, 8th C. M. R., had the misfortune to be kicked in the knee by his horse on Tuesday and will be laid up for a week.

Lieut.-Col. Edwards, officer commanding 38th Battalion, C. E. F., returned on Tuesday from Ottawa. While away the battalion was in charge of Major C. Ferguson, senior major.

Q. M. S. Wm. McLean, Ammunition Column, 7th Brigade, while unloading boxes of supplies on Tuesday, had one fall on his head. He was rendered unconscious and removed to the Military Hospital, Kingston. It is feared that he may have concussion.

The second section of ovens for the bakery of the Army Service Corps is being installed and it is expected that the additional nine ovens will be in use in a few days.

Several taxis are being run from the city to the camp and a number of other vehicles for carrying passengers are in use. The jitney-vehicles are found to be too low a charge for the service however and from ten cents to twenty-five cents is being charged.

A lecture tent has been erected near the Administration Building and in this the men and officers will be given lectures during bad weather.

The buildings around the camp are receiving a coat of paint to preserve the wood against the elements.

Tuesday was the hottest day yet experienced in camp. There was not a breath of air and the soldiers simply boiled in the sun on the parade grounds. The officers were considerably annoyed, and a great amount of work was carried on in the wood near the lake. Some, however, were drilled all afternoon in front of the Administration Building.

Even the officers play baseball on the parade grounds in the cool of the evening. A record number went in for a swim in the lake on Tuesday afternoon.

The signallers of the 28th Battalion were divided into three parties on Tuesday, one being stationed near Fort Henry, one near the village of Barriefield and the other near the W.M.R. camp. Messages of different kinds were exchanged and the men were found to be very proficient on this outdoor work.

Major G. L. Starr, camp chaplain, will address the soldiers in the Y.M.C.A. tent on Wednesday evening, on the war as seen by him in France a short time ago. A meeting of the Social Committee was held on Tuesday evening.

Two tents have been erected at the east end of Cataragui bridge for the sentries on duty there.

In orders of Tuesday: "On no account are fires to be lighted, and great care must be taken that lighted matches, cigar or cigarette ends are not thrown away carelessly, thereby creating danger of bush-fires breaking out."

The paying of the men of the 38th Battalion was commenced on Tuesday afternoon.

On Wednesday morning Capt. W. E. Steacy addressed the N.C.O.'s taking the Royal School of Artillery course and asked for fifty additional volunteers for "C" Battery, Q.M. S. shown left on Tuesday evening for Toronto where he will recruit.

About fifty infantrymen for Barriefield Camp arrived in the city on Wednesday morning. Some of them have been training with the Army Medical Corps at Ottawa.

The overseas volunteers from "C" Battery are being drilled on Tete de Pont Barracks square, and are a fine body of artillerymen. They will leave before the end of the week.

On Friday evening a smoker in honor of the officers and N.C.O.'s taking the course will be given by the sergeants of the R.C.H.A.

Capt. J. F. Sparks has resumed his duties as medical officer of the R.C.H.A.

The Ontario Laundry at the camp is a concern doing business the same as the drug store or cafe. The company has no contract with anybody but is handling the laundry of officers and men who pay for the service themselves.

The order was issued on Tuesday that Capt. W. E. Steacy, officer commanding "C" Battery R.C.H.A., would go overseas with the reinforcements from that battery which leave this week. After consideration of the splendid work that Capt. Steacy has been doing in connection with "C" Battery the authorities thought that as suitable an officer could not be secured for his position, and he was requested to remain, at least for the present. Capt. Steacy is very anxious to go overseas but selected Lieut. A. R. Stewart, son of Postmaster James Stewart and Lieut. Williamson, formerly of the 21st (Westmount) Battery, to go. Both are highly qualified and have done excellent work with the R.C.H.A. here.

An extra session of the United States Congress may be called for October.

## THE BOARD OF WORKS

DISCUSSES TREATING BROCK STREET WITH TARVIA.

The Engineer Would Not Recommend It But the Board Will Carry Out Its Recent Decision.

The Board of Works on Tuesday afternoon had a warm discussion upon the question of treating the roadway on Brock street with tarvia. Recently the City Engineer and Ald. C. J. Graham made a trip to Ottawa to inspect roads similarly treated with this preparation. Ald. Graham was convinced that if Brock street from Bagot to Division streets was done this summer in like fashion a very good and substantial roadway would be the result.

Ald. O'Connor took exception to this, after reading from a document wherein it was stated by Mr. Stuart at Ottawa that roadways so treated would not withstand heavy traffic. Ald. O'Connor raised the objection of laying out money that would only be wasted.

Ald. O'Connor finally asked the Engineer if he would recommend tarvia for Brock street. The latter replied that he would not.

Ald. Nickle and the Engineer had a lively argument, the former upholding the good qualities of tarvia, and favoring the treatment of Brock street roadway as recommended to the City Council recently.

"We are going to carry out what we passed at last Council meeting," emphatically stated the chairman. "We will get off alright with tarvia B treatment. I will put it on myself."

The tenders were left to the City Engineer to tabulate and submit at a meeting in a few days. The question of treating Barriefield road from Cataragui Bridge was dealt with but no conclusion was reached. Some work amounting to \$28 had been done upon it and the Board ordered the amount paid.

The by-law pertaining to the erection of porticos was discussed, and a statement submitted showing the danger arising from such as the city will be held responsible should there be any injury to persons or damage to property in case of the erection of porticos upon the street. Instructions were given the Chief of the Fire Department and the City Engineer to suggest amendments to the by-law.

Approval was given for the removal of trees from in front of the residences of W. R. Clugston, Brock street, and George Bawden, Barriefield street. Approval was also given for the Engineer to construct a curb at the junction of Albert and Alice streets so that a pretty flower bed may be placed there and maintained by certain professors of Queen's University. In close proximity, a new street, known as Leonard avenue, will be opened. It runs from Collingwood to Albert street.

Those present were: Aldermen Graham (Chairman), Couper, O'Connor and Nickle.

## Young Soldier Badly Injured And May Die

Through the reckless driving of two automobilists, who were about to cross Cataragui bridge shortly before seven o'clock Tuesday evening, Pte. J. A. Goodall, Ottawa, attached to the 38th Battalion, now lies in the General Hospital in a critical condition, not being expected to live. The injured soldier was a recruit, and had first enlisted at Toronto, whence he was transferred to Smith's Falls. From there he was later transferred to Ottawa, and came with the 38th to Barriefield Heights.

The young soldier was walking along the roadway leading up to the bridge coming to the city, and before he had even time to jump from in front of a rapidly-approaching automobile, he was struck and hurled twenty feet into the air. He alighted on the roadway. His head either struck on the macadam or else the automobile ran over his head, because his skull was fractured. He lay in an unconscious state, and the driver of the machine and others about hurriedly placed him into the auto and rushed him to the General Hospital.

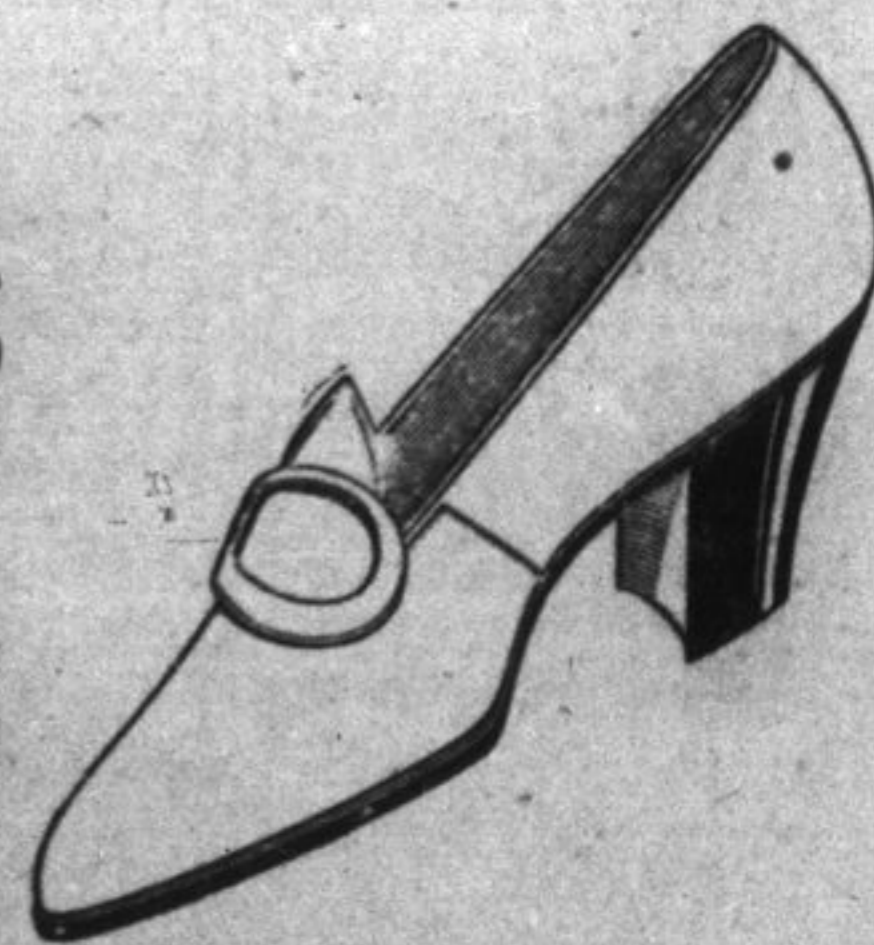

Dr. G. W. Mylks attended to the soldier's injuries, but up until Wednesday morning at ten o'clock the young man had not regained consciousness. Very small hopes are held out for his recovery.

Building During May. During May, the building permits issued amounted to \$22,410. Since the beginning of the year the permits totalled \$79,024, or just one-half the amount during the same period of 1914.

## The Season For New Shoes

We Are Showing All the New Styles in Summer Shoes.

New Patent Colonials, with Black Cloth, Grey Cloth and Sand cloth backs at \$3.50  
New 3-Eyelit Patent Oxford, with Grey and Sand Cloth Backs. This is the new shoe. Price \$3.50
