HOW THIN PEOPLE CAN PUT ON FLESH

A NEW DISCOVERY men and women - that big. You haven't gained in weight one ounce. That food passed from your body like unburned coal through an open grate. The material was there, but your food doesn't work and stick for either and the plant of the state and the plain truth is you hardly get The paper is of excellent quality, in Your nutritive organs, your functions and need reconstruction.

Cut out the foolish foods and funny sawdust diets. Omit the flesh cream rub-ons. Cut out everything but the meals you are eating now and eat meals you are eating now and eat with every one of those a single Sargol tablet. In two weeks note the difference. Five to eight good solid pounds of heaithy, "stay there" fat should be the net result. Sargol charges your weak, stagnant blood with millions of fresh new red blood corpuseles — gives the blood the carrying power to deliver every ounce of fat-making material in your food to every part of your body. Sargol, too, mixes with your food and prepares it for the blood in easily assimilated form. Thin people gain all the way from 10 to 25 pounds a month while taking Sargol, and the new flesh stays put. Sargol tablets are a scientific combination of six of the best flesh-producing elements known to chemistry. They come 46 tablets to a package, are pleasant, harmless and inexpensive, and all druggists in Klingston is interested in the Knighthood of Sir John S.
