Gun Metal and Patent Leather, 3 Buttoned Oxford \$2.50 and \$3.00

H. JENNINGS, - King Street

KIDNEY TROUBLE CURED AT 82.

Intense Power of Dr. Cassell's Tablets again Proved.

Back pains so severe as to be like knife-thrusts.

Operation said to be the only chance of Cure.

So Weak and Wasted he could hardly drag about.

Now in Splendid Health through **DR. CASSELL'S TABLETS.**

Age makes no difference to the extraordinary curative power of Dr. Cassell's Tablets; they cure old or young, from the infant in its mother's arms to the white-haired grandparent bowed with the weight of years. That is the one conclusion to be drawn from the testimony to Dr. Cassell's Tablets, which grateful people in the Mother Country are constantly giving to their Canadian brothers and sisters.

Here, for example, is Mr. Benjamin de Grey, of 2, Clifton Terrace, Queen-street, Sparkbrook, Birmingham, England, telling how Dr. Cassell's Tablets cured him of acute kidney trouble when nothing else tried could even relieve, and Mr. de Grey is 82 years of age. He says:

A few years ago I began to have a dull, heavy feeling after everything I ate, and this was very soon followed by gnawing pain across my back and other indications of kidney trouble. At all times this pain was with me, but it became sharp as knife thrusts when I had to straighten up from a sitting or stooping position. I was told it was kidney trouble. I knew that, but no sort of medicine I had did any sort of good. I cannot describe the suffering I underwent. I could not rest anywhere, and I was so

Dr. Cassell's Tablets put new life and vigour into the kidneys by strengthening the nerves that control kidney action. That is why Dr. Cassell's Tablets cure even most severe cases.

LADY OF 67 CURED after 30 years' suffering.

Here is yet another instance of the intense re-vitalising powers of Dr. Cassell's Tablets. Mrs. Walker, of 49, Kelburn-street, Barrhead, Glasgow, Scotland, says—

"I am glad to tell you that my mother, Mrs. Cairns, and myself have derived very great benefit from Dr. Cassell's Tablets.

My mother is now sixty-seven years of age, and has suffered for about thirty years from a functional complaint which used to make her unable to move, and which, about two months ago she caught a chill, which affected her kidneys, and laid her up altogether. She was in frightful pain all round her body, and in her back, and to move at all costed her intense suffering. We tried all sorts of things for her, but she got no better; in fact, I thought she was never going to be well again. However, reading about Dr. Cassell's Tablets, I decided to get her some, and from that time she improved wonderfully. She is now better than she has been for years, and it is all due to Dr. Cassell's Tablets. She was very run-down in health as well as suffering from kidney trouble, and the Tablets simply worked wonders.

"I have taken them myself for severe headache brought on by strain, and they soon cured me, too."

BRITAIN'S FINEST REMEDY
Popularity Now World-Wide.

The world-wide reputation which Dr. Cassell's Tablets have achieved, as a really reliable Nerve and Body Restorative for young and old, must be due to merit and merit only. Mere advertisement will sometimes ensure a reputation of a sort, but it is true worth that tells, and particularly in this case with Dr. Cassell's Tablets. This famous medicine is a true and tried remedy for Nervous Breakdown, Nerve Failure, Infantile Weakness, Neurasthenia, Sleeplessness, Anæmia, Kidney Trouble, Dyspepsia, Stomach Disorders, Wasting, Palpitation; and they are specially valuable for nursing mothers, and girls approaching womanhood. All druggists and storekeepers throughout the Dominion sell Dr. Cassell's Tablets at 50 cents. People in outlying districts should keep Dr. Cassell's Tablets by them in case of emergency. A Free Sample will be sent on receipt of 5 cents for postage and packing, by the sole agents for Canada, H. F. Ritchie and Co., Ltd., 20, McCaul-street, Toronto, Ont.

The Newest Notes of Science

Greece imports every pound of the coal that it consumes.

A suit case has been patented with a handle on one end as well as on top.

England's per capita consumption of codfish is the greatest of any country.

As a preventive of writer's cramp there has been invented a padded elbow rest.

A machine for stringing beads by centrifugal force has been invented in France.

The handle of a new saw is adjustable to enable horizontal cuts to be easily made.

Copper ore has been discovered in the Westmanna islands, which lie south of Iceland.

One tablespoonful of lemon juice to two of water makes an efficient gargle for a sore throat.

A Frenchman has invented a machine for dealing cards that is said to make mistakes impossible.

Rocks and stone buildings that are struck by lightning often are magnetized by electricity.

The German patent office rejects about two-thirds of the 45,000 applications it receives annually.

Adjustable feet for bath tubs have been patented so that they can be made level on an uneven floor.

An electric pen that carbonizes paper over which it is passed has been patented by a native of India.

The vacuum principle has been applied to a jar to keep a substantial meal hot or cold for a substantial time.

In some parts of Siberia milk is sold frozen around a piece of wood, which serves as a handle to carry it.

So that keys may be more accessible there has been invented a double key ring that separates them into groups.

A substantial prize has been offered in France for the aeroplane that can fly the fastest and also the slowest.

To give a man working on a slanting roof a level seat a stool has been invented that clamps securely to shingles.

Paddy-husk, a by-product of rice milling, is used as fuel under the boilers of a municipal electric plant in Siam.

Chemists know of about 150,000 organic chemical compounds, and are increasing the list by from 5,000 to 8,000 a year.

The world's most active volcano is Mount Sangay, in South America, which has been in constant eruption since 1728.

California retained its lead in gold production last year, and was followed by Colorado, Alaska, Nevada and South Dakota.

Sweden's waterfalls are estimated to contain about 6,000,000 horsepower, of which only about sixteen per cent. is being utilized.

A New Jersey inventor has patented a combination of an electric light and small shelf which may be used for many purposes.

Weather records compiled for more than a quarter of a century indicate that the atmosphere of London is becoming less foggy.

A patent has been granted for a chronometer which has invented a German thermal resorts at which the thermometer is used for scientific purposes.

One of the most luxurious private cars in the world has been built in England for the use of an official of a Chinese railroad.

Practically every part except the diaphragm and horn of a new talking machine that reproduces the usual records is made of cement.

A French investigator has given Julius Caesar the credit for being one of the earliest and most earnest opponents of race suicide.

Chicago leads the cities of the United States in concrete building construction, with Seattle in second place, and Philadelphia in third.

A copper mining company in Peru operates a smelter at an altitude of 14,000 feet above sea level, the highest altitude for such an industry in the world.

Overheating is prevented in a new electric motor by blowing through its coils air cooled by passing through a water-cooling apparatus.

The present week, seven days, without reference to solar or lunar cycles, was adopted by Egyptian astrologers.

transmitters more than 3,600 years ago.

To keep cinders and dust from entering car windows is the purpose of a new patent device at right angles catches and diverts them downward through from their machines and to absorb part of the shock of a fall.

An electrically operated machine sharpens safety razor blades by subjecting their cutting edges to 1,200 feet of stropping leather a minute.

For mission work in rural England an automobile has been equipped with an altar and other fittings and duly consecrated by church authorities.

A holder for a spool of silk, combined with a small pocket to contain fancy work, the whole to be fastened to a woman's belt, has been patented.

So successful have wireless telephones proved on Italian warships that the government plans to install them on merchant and passenger vessels.

For tying knots in thread there has been invented a machine to be strapped to the wrist of a textile worker and do the work almost automatically.

Of French invention is a rubber stepper with a flexible projection which can be folded down around the neck of a bottle for additional security.

More effective to guard the contents of milk bottles from contamination is a new paper stopper so shaped as to cover the entire top of a bottle.

An electric motor with a number of flexible rods moving at right angles to its shaft has been invented in Germany for heating and renovating furs.

A machine which resembles an enlarged lawn mower has been invented by a Massachusetts agriculturist to harvest cranberries without injuring them.

Telegraph poles have been dispensed with entirely in one Welsh town in which the residents have permitted the wires to be strung from house to house.

An Indiana electric railway company has built a repairman's tower propelled by a gasoline motor and so light that two men can raise it from the track.

Natives of a province in India have succeeded in breeding egrets in captivity and in obtaining plumage superior to that of the wild birds.

Folding to about the size of a half dollar, a new combination tool serves as scissors, cigar cutter, glove and shoe buttoner, key ring and bottle opener.

A German automobile builder is experimenting with hammock seats, suspended from steel spring frames, which he claims are the easiest riding seats yet developed.

What will be the highest concrete structure of the kind in the world is a railroad viaduct being built in Pennsylvania, 242 feet above a stream and 2,350 feet long.

Tests by German scientists have proved that the old plan of tightening a man's belt to lessen hunger pangs is the scientific method for accomplishing the desired result.

A Colorado Springs garage owner has invented automatic apparatus that opens the doors of the building for the cars, and closes them after it has passed.

Thirty miles an hour is the speed attained by a novel motor-boat in Europe which is propelled by the revolution of an outer casing on which are a series of projecting blades.

The present week, seven days, without reference to solar or lunar cycles, was adopted by Egyptian astrologers.

A California inventor's idea of a life-preserver for aviators consists of a suit of heavy clothing with wings extending from the head to the hands, from the hands to the feet and between the legs.

WINSTON CHURCHILL'S UNCLE
Hit by the new legislation, which enormously increases the taxation on spirits and beers.

Lord de Ramsey is among other things custos rotulorum of the Isle of Ely, which, although situated within the county of Cambridge, is the only division of the kingdom that is subject to a custos rotulorum appointed by the crown and enjoying the right to appoint magistrates, who are styled justices of the peace for the Island of Ely, marches an oasis in the midst of the marshes and fen lands of Cambridgeshire, is wholly independent of the lord lieutenant of Cambridgeshire, and subject to Lord de Ramsey, who is the Duke of Marlborough, one of the earliest directors of the East India Company. It was through him that William Fellows inherited Ramsey Abbey, in Huntingdonshire, a once famous monastery, which at the time of the Reformation had been granted by Henry VIII, to his favorite, Thomas Cromwell, from whom it went through the Titus family to the Coulsens. The main portion of the present wealth of the Fellows is derived from their immense brewing interests, which are likely to be hard

For Merit

A packet of Black Cat cigarettes is its own reward. It immediately removes one from the rank and file of indiscriminate smokers and singles him out as a man of exceptionally good taste.

As a mark of distinction always have a packet or two handy. Be liberal. Initiate your friends into the secret of good smoking—for Black Cat has everything that satisfies a smoke lover's appetite—fragrant aroma, pleasing flavor, mildness—all in the proper degree.

Your dealer sells Black Cat cigarettes. So do all others. Any one is worth looking for—and soon.

Black Cat Cigarettes - 10 for 10 Cents

Save the coupons. The Black Cat war game will be sent for 30. Hundreds of other valuable gifts will be awarded at the Black Cat headquarters in Montreal.

THE ADRIATIC SEA

A Description Of This Historic Body Of Water.

"Once more the peoples upon the opposite shores of the Adriatic Sea are in a duel with one another for the mastery of the Mediterranean—just as neighbors across this arm of the hand-locked sea have always clashed—for upon the Adriatic South European supremacy has been contested since the days when Rome fell heir to the sea power of Athens and Carthage. Over this waterway Rome met the pirates of Itria and Delmatia, aggressive Teutonic tribes and pressing hordes of Slavs; over it the Empire of the East sent its expeditions to attack the Empire of the West; and Austria a generation ago waged war with disintegrated Italy over Adriatic paths, and for the suzerainty of the sea."

After giving the above brief review of this historic theatre for the transport of invading armies and the actions of battle fleets, youngest of the war theatres in the present European struggle, around whose shores the interest of South European battles will centre through the months to come, the bulletin issued by the National Geographical Society continues in a presentation of the geographic details of the Adriatic Sea.

"The Adriatic Sea is 500 miles long and about 130 miles wide in the greatest width. It separates the Italian and Balkan peninsulas as far as Brindis and the lower coast of Albania, and ends at the Strait of Otranto, by which it communicates with the Ionian Sea. Its average width is 110 miles, but the islands off the Dalmatia and Istrian coasts decreased this average to about 100 miles. The water of this sea therefore from 500 feet in the north to more than 4,000 feet in its southern area.

"The Austrian, or eastern coast, is very broken, strewn with fine harbors, and lined with numerous rocky islands, which belong to Itria and Dalmatia. This western coast is of great naval and commercial value, well formed for the upbuilding of great, thriving trade ports, and, by reason of its almost continuously mountainous shores, its deep gulfs and bays, and its screening fringes of rocky islands, advantageously defended. The western, or Italian coast, on the other hand, is low, sandy and almost unbroken. It lacks good harbors and offers few natural advantages for defense.

"The commercial importance of the Adriatic Sea throughout the Dark Ages and the Middle Ages was very great. This importance was somewhat impaired by the opening of the all-sea route to India and by the determined growths of the Dutch and English merchant marines. With the opening of the Suez Canal and the commercial and industrial awakening of Italy and Austria-Hungary, the Adriatic regained much of its old-time significance. The most important commercial points are Trieste, Venice, Fiume, Ancona and Brindis, Venice and Trieste, at the head of the Adriatic, are the two foremost cities.

"Owing to the systems of screening mountains, the Adriatic receives but little drainage. There are only two rivers of any considerable size that empty into it, the Adige and the Po. The water of this sea therefore is very salty. Navigation is safe, although there are some dangerous points upon the eastern coast, and sudden, northerly squalls often lash the waters with terrific force against the rock-bound coast.

"The principal gulfs of the Adriatic are those of Manfredonia on the west, Venice and Trieste on the north, and Quarnero on the northeast. There are numerous and admirable bay harbors, extending from Fiume and culminating in the wonderful land-locked harbor, the Bocche di Cattaro. The Strait of Otranto, where Italy approaches nearest to the Balkan mainland, is 45 miles wide. Here is the magnificent Albanian harbor, Avlona, over which Italy aspires to win control."

"Telephone, Mr. Jones!"

Is It Like This In Your Office?

CAN you expect good work from your staff when they have to waste so much time walking to and from the telephone or in waiting until your single instrument is not in use?

The time wasted more than equals the cost of an adequate equipment, to say nothing of the annoyance and loss caused your customers.

Let our Contract Department tell you to-day how cheaply you can equip your business with adequate telephone facilities.

The Bell Telephone Co. of Canada.

Pack "ENO'S" First!

YOU cannot take a better travelling-companion than "ENO'S" when off for a trip. It is your health-insurance during the time you are away—and prevents train and sea-sickness. You should pack—

ENO'S FRUIT SALT

in your grip or suitcase as surely as you do any other necessary article. Errors in diet, and change in mode of living while travelling, often result in disorders of the stomach. "ENO'S" quickly corrects any irregularities and keeps you healthy. Never travel without ENO'S FRUIT SALT.
