Old Ways Merely Quieted The Corn The New Way Ends It Some folks still cling to liquids, to inefficient plasters or to merely paring corns. They wrong themselves. Their own friends keep free from corns by using Blue-jay plasters. They apply one in a jiffy, then forget the corn. In 48 hours, without pain or soreness, the entire corn comes out. A famous chemist found this way which makes corns out-of-date. One can't prevent them easily, but to keep them is folly. Millions of people know that.
