

SWAT the FLY

The fly has been tried and found guilty. There is not one extenuating circumstance that can be cited in his favor. Where there is an abundance of filth, there will the flies gather together; there they will multiply and increase. Their function to-day is nothing more or less than a danger signal to indicate insanitary conditions. Abolish these, and the breeding places of the flies will be eradicated. Their disease carrying abilities are known far and wide. It is a first duty to keep them out of the home, and away from the food. This can be accomplished in various ways. A campaign of extermination should be begun at this season of the year. The merchants of the city can furnish you with the means of carrying on this campaign. The announcements that follow are therefore of timely interest.
